**Re: Milton Hydro Distribution Inc., Distribution licence ED-2003-0014  
Smart Grid Working Group, Board File No. EB-2011-0004  
Expression of Interest for Participation**

The Ontario Energy Board (“OEB”) is creating a Smart Grid Working Group (“SGWG”) and has requested that individuals submit their willingness to be active participants within this group. By way of this letter I would request the OEB’s consideration to be selected as an active member of the SGWG.

Milton Hydro has completed the installation of smart meters and Time of Use billing for 100% of its Residential and small General Service customers. In my current role as President of Milton Hydro, our next steps are to integrate the Smart Meter data into the development of a Smart Grid concept for the benefit of our consumers as well as improved the effectiveness of the Distribution Network.

I am a Professional Engineer and a Certified Management Account with 25 years of experience in both the electricity distribution and telecommunication industries. This experience has provided me with a solid technical and financial understanding of electricity distribution system design, construction and operation. I believe that this education and experience will be of significant value in addressing the number of technical issues that have or will arise during this consultation.

I would be pleased to discuss my credentials in greater detail and look forward to being selected to participate in this SGWG project that will have a significant impact in the future development of the electricity distribution systems.

Respectfully submitted,
