Subject: Re: EB-2011-0004

To Whom it may concern,

I would like to nominate Energy Aware Technology Inc to take part in the Smart Grid Working Group.

Energy Aware Technology has had extensive experience in the consumer-facing side of the smart grid. Through the development of our product and through exposure to our international markets over the past few years, we have seen many types of approaches to enabling the modern smart grid, as well as different technologies and different trends. We have also been a part of international pilot projects (in Finland and Australia), so we can provide a fresh perspective on how other utilities, markets and regions are engaging with consumers and informing them about energy awareness and time of use energy pricing.

Energy Aware nominees who are interested in participating in the SGWG:

Janice Cheam
President & CEO
Energy Aware Technology
ph: 604.282.7697
janice.cheam@energy-aware.com

and

Kirk Hutton
Business Development Manager
Energy Aware Technology
ph: 604.282.7699
kirk.hutton@energy-aware.com

Thank you for this opportunity and I look forward to hearing from you soon.

Regards,

Kirk
