Dear Ms. Walli:

RE: Smart Grid Working Group – File Number EB-2011-0004

On January 13, 2011 the Ontario Energy (“Board”) issued a letter to all electricity distributors with its intent to form a Smart Grid Working Group. Erie Thames Powerlines (ETPL) would like to nominate Tim Fry, a member of ETPL’s third party ERTH Corporation. ETPL is working with the ERTH Corporation in identifying potential smart grid activities. Short statement of Mr. Fry’s relevant experience and qualifications is provided below.

Tim Fry has held the position of Chief Technology Officer at ERTH since July 2010. Tim brings over 25 years of technology experience to ERTH. Prior to joining ERTH, Tim was one of the founding partners of The SPi Group, and was instrumental in driving the technologies that allowed SPi to become the dominant retail electricity market service provider in Ontario. Tim’s experience ranges from building real-time trading systems for UK financial markets, through designing ISP billing systems for Solect Technology Group, to in recent years, running the software development, QA, and IT infrastructure and services groups at The SPi Group.

For more information please contact Jay Lee at 416-520-6589.

Regards,

Chris White
 President
 Erie Thames Powerlines Corporation
