I would like to know why this board feels that Embridge is entitled to margin protection. Their inept ability to forecast consumer consumption is not the people of Ontario's fault. I work in the snow-sports industry and when there is a bad winter (no snow) we are not compensated. Why is this business any different?

The Ontario Energy board is clearly a corrupt organization, one that is supposed to protect the people of Ontario. If you can't stop a 40% increase in natural gas prices, what do you do? What's your purpose?

Shame on you. (though you clearly have no shame). The fat cats are getting fatter
