**Re: 2014 Natural Gas Market Review – Consultation and Stakeholder Conference  
(Board File No. EB-2014-0289)**

Dear Ms. Walli:

Please be advised that TransAlta Generation Partnership and TransAlta Cogeneration LP (TransAlta) intend to participate in the above-captioned consultation and stakeholder conference.

TransAlta owns gas-fired plants in Ontario. Like many interested parties, TransAlta was affected by Utility conduct and decision making during the winter 2013/2014 season. Events during that period highlighted concerns regarding the way that Daily Contract Quantities (DCQ) are administered for generators operating under Board-approved Rate T2 service contracts. We would therefore appreciate having the issue of obligated DCQ for Rate T2 service contracts included on the Stakeholder Conference Agenda, and more specifically, whether obligated DCQ should be required from generators under Rate T2 contracts.

Please direct all correspondence related to this proceeding to:
