In these times where people are struggling to the point where they have to choose between paying hydro (with it's obscene delivery charge for those in rural areas to the degree that delivery is more than hydro usage) and paying rent, mortgage or healthy food, now they want to raise the price of rental on poles. Ontario pays the most for hydro in Canada, while Canada sells hydro to America because it is producing too much. Hydro is a renewable resource. There is no reason, other than greed, to keep raising prices. We are tired of this corruption. Hydro is a multi-billion corporation. It's time to REDUCE prices, not add to them. I do realize this is not an actual "hydro increase" but it is an increase in hydro bills for the customers. Please, please stop the increases. We can't take anymore.
