To raise the cost of hydro in the middle of an ongoing pandemic is morally wrong, and financially devastating to those of us who are already barely able to afford this essential service. Covid-19 will still be here in 2022, to pretend like it won't be impacting our jobs and finances is foolish. With more and more people working from home, hydro is essential, and these hydro costs are only getting higher as working hours are now spent using utilities in the home instead of at our places of business. If you decide to allow this increase in cost, know that you will be forcibly tightening the belt of thousands of struggling Canadian citizens. I ask that you officially decline this request to raise its electricity distribution rates effective May 1, 2022. I will be watching, and I will be voting.
