## 1 INTRODUCTION AND SUMMARY

Niagara Peninsula Energy Inc. (Niagara Peninsula Energy) filed an application with the Ontario Energy Board (OEB) to change its electricity distribution rates effective January 1, 2021. Under section 78 of the *Ontario Energy Board Act, 1998*<sup>1</sup>, a distributor must apply to the OEB to change the rates it charges its customers.

Niagara Peninsula Energy provides electricity distribution services to approximately 56,000 customers in the City of Niagara Falls, the Town of Lincoln, the Town of West Lincoln, and the Township of Pelham.

The OEB's *Renewed Regulatory Framework for Electricity* (RRF)<sup>2</sup> and *Handbook for Utility Rate Applications* (Handbook)<sup>3</sup> provide distributors with performance-based rate application options that support the cost-effective planning and efficient operation of a distribution network. This framework provides an appropriate alignment between a sustainable, financially viable electricity sector and the expectations of customers for reliable service at a reasonable price.

Niagara Peninsula Energy asked the OEB to approve its rates for five years using the Price Cap Incentive rate-setting (IR) option. With an approved test year (2021), Niagara Peninsula Energy can apply to have its rates adjusted mechanistically in each of the following four years based on inflation and the OEB's assessment of Niagara Peninsula Energy's efficiency.

A settlement conference was held on December 9, 10, and 11, 2020, which was attended by Niagara Peninsula Energy and the intervenors in this proceeding, namely: School Energy Coalition (SEC), Vulnerable Energy Consumers Coalition (VECC), Distributed Resource Coalition (DRC), and Hydro One Networks Inc (Hydro One) (collectively, the parties). OEB staff also attended the conference but was not a party to the settlement. On January 7, 2021, the parties filed a settlement proposal, which represented a complete settlement on all issues.

Having considered the settlement proposal and submissions of OEB staff, the OEB approves the settlement proposal as filed.

---

<sup>1</sup> *Ontario Energy Board Act, 1998* S.O. 1998, c. 15, Schedule. B

<sup>2</sup> *Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach*, October 18, 2012

<sup>3</sup> *Handbook for Utility Rate Applications*, October 13, 2016

As a result of this Decision and Rate Order, it is estimated that for a typical residential customer with a monthly consumption of 750 kWh, the total bill impact will be an increase of \$1.79 per month before taxes or 1.20%.

---

## 2 THE PROCESS

Niagara Peninsula Energy filed an application on August 18, 2020 for 2021 rates under the Price-Cap IR option of the RRF. The OEB issued a Notice of Hearing on September 10, 2020, inviting parties to apply for intervenor status. SEC, VECC, DRC, and Hydro One were granted intervenor status. SEC, VECC, and DRC were also granted cost award eligibility. OEB staff also participated in this proceeding.

The OEB received 40 letters of comment, which were placed on the record of this proceeding. These comments were taken into consideration during the evaluation of the application by the OEB.

The OEB issued Procedural Order No. 1 on October 13, 2020. This order established, among other things, the timetable for a written interrogatory discovery process and a settlement conference. Niagara Peninsula Energy responded to the interrogatories and follow-up questions submitted by OEB staff and the intervenors. The OEB issued its approved Issues List on December 4, 2020.

A settlement conference took place on December 9, 10, and 11, 2020. Niagara Peninsula Energy filed a settlement proposal with the OEB on January 7, 2021 (see Schedule B attached). OEB staff filed its submissions regarding the settlement proposal on January 13, 2021.

---

### 3 DECISION

The settlement proposal addressed all issues on the OEB's approved Issues List for this proceeding and represented the parties' full settlement on all the issues. The settlement proposal contained further explanation and rationale on specific issues for the OEB to consider.

OEB staff filed a submission on January 13, 2021 supporting the settlement proposal. OEB staff reviewed the settlement proposal in the context of the objectives of the RRF, the Handbook, applicable OEB policies, relevant OEB decisions, and the OEB's statutory obligations and submitted that the settlement proposal reflected a reasonable evaluation of the distributor's planned outcomes in this proceeding.

#### **Findings**

The OEB accepts the settlement proposal. The OEB finds that the settlement proposal represents a reasonable outcome for ratepayers and will result in just and reasonable rates. The approved settlement proposal is attached as Schedule B.

---

## 4 DECISION ON CONFIDENTIALITY

On January 7, 2021, Niagara Peninsula Energy filed a revised confidentiality request to the confidentiality request it originally filed on November 19, 2020, which was part of the interrogatory responses. The revised confidentiality request contained only one document, and Niagara Peninsula Energy reiterated that this document should remain confidential.

On January 22, 2021, the OEB issued Procedural Order No. 2 seeking clarification on whether this refiled document, for which confidentiality was requested, is required to support the settlement proposal.

On January 28, 2021, Niagara Peninsula Energy responded that while the document is relevant to the application, it is not, strictly speaking, required to support the settlement proposal. Niagara Peninsula Energy also submitted that the document contains highly confidential personal information throughout its entirety and the difficulty in redacting portions of the document, without effectively disclosing confidential information, is too great and has therefore sought confidentiality over the entire agreement.

### Findings

The OEB approves the confidentiality request and will treat the entire document confidentially, pursuant to the OEB's Practice Direction on Confidential Filings. The OEB finds that the document refiled on January 7, 2021 contains sensitive, employment related information. The OEB acknowledges Niagara Peninsula Energy indicated in its letter of January 28, 2021, that since a full settlement had been reached, it had been informed that no intervenor would object to Niagara Peninsula Energy's request for confidentiality.

---

## 5 IMPLEMENTATION

The new rates approved in this Decision and Rate Order are to be effective January 1, 2021.

Included in the settlement proposal, Niagara Peninsula Energy filed tariff sheets and detailed supporting material, including all relevant calculations showing the impact of the implementation of the settlement on its revenue requirement, the allocation of the revenue requirement to its rate classes and the determination of the final rates and rate riders, including bill impacts.

The OEB made some changes to the wording on the tariff sheets attached to the settlement proposal in order to ensure consistency with the tariff sheets of other Ontario electricity distributors. The final approved Tariffs of Rates and Charges are attached as Schedule A to this Decision and Rate Order.

SEC, VECC, and DRC are eligible to apply for cost awards in this proceeding. The OEB has made provision in this Decision and Rate Order for these intervenors to file their cost claims. The OEB will issue its cost awards decision after the steps outlined in the following Order section are completed.

## 6 ORDER

### THE ONTARIO ENERGY BOARD ORDERS THAT:

1. The Tariffs of Rates and Charges set out in Schedule A of this Decision and Rate Order are approved as final effective January 1, 2021. The Tariffs of Rates and Charges will apply to electricity consumed, or estimated to have been consumed, on and after January 1, 2021. Niagara Peninsula Energy Inc. shall notify its customers of the rate changes no later than the delivery of the first bill reflecting the new final rates.
2. Intervenors shall submit their cost claims with the OEB and forward to Niagara Peninsula Energy Inc. by **February 18, 2021**.
3. Niagara Peninsula Energy Inc. shall file with the OEB and forward to intervenors any objections to the claimed costs by **February 25, 2021**.
4. Intervenors, to which Niagara Peninsula Energy Inc. filed an objection to the claimed costs, shall file with the OEB and forward to Niagara Peninsula Energy Inc. any responses to any objections for cost claims by **March 4, 2021**.
5. Niagara Peninsula Energy Inc. shall pay the OEB's costs incidental to this proceeding upon receipt of the OEB's invoice.

All materials filed with the OEB must quote the file number, **EB-2020-0040**, and be submitted in a searchable/unrestricted PDF format with a digital signature through the OEB's web portal at <https://p-pes.ontarioenergyboard.ca/PivotalUX/>. Filings must clearly state the sender's name, postal address, telephone number, fax number and e-mail address. Parties must use the document naming conventions and document submission standards outlined in the [Regulatory Electronic Submission System \(RESS\) Document Guidelines](#) found at [www.oeb.ca/industry](http://www.oeb.ca/industry). We encourage the use of RESS; however, parties who have not yet [set up an account](#), may email their documents to [registrar@oeb.ca](mailto:registrar@oeb.ca).

All communications should be directed to the attention of the Registrar and be received no later than 4:45 p.m. on the required date.

With respect to distribution lists for all electronic correspondence and materials related to this proceeding, parties must include the Case Manager, Donald Lau at [donald.lau@oeb.ca](mailto:donald.lau@oeb.ca) and OEB Counsel, Ljuba Djurdjevic at [ljuba.djurdjevic@oeb.ca](mailto:ljuba.djurdjevic@oeb.ca).

## RESIDENTIAL SERVICE CLASSIFICATION

This class pertains to customers residing in detached, semi-detached or duplex dwelling units, where energy is supplied single-phase, 3 wire, 60 hertz, having a nominal voltage of 120/240 volts. Large residential services will include all services from 201 amp. Up to and including 400 amp., 120/240 volt, single phase, three wire. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	35.31
Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2021) - effective until December 31, 2021	\$	0.62
Rate Rider for Recovery of COVID-19 Foregone Revenue from Postponing Rate Implementation - effective until October 31, 2021	\$	0.28
Rate Rider for Disposition of Group 2 Accounts (2021) - effective until December 31, 2021	\$	(0.08)
Rate Rider for Disposition of Account 1576 - effective until December 31, 2021	\$	(0.09)
Smart Metering Entity Charge - effective until December 31, 2022	\$	0.57
Low Voltage Service Rate	\$/kWh	0.0014
Rate Rider for Disposition of Deferral/Variance Accounts (2020) - effective until October 31, 2021	\$/kWh	0.0012
Rate Rider for Disposition of Deferral/Variance Accounts (2021) - effective until December 31, 2021	\$/kWh	(0.0006)
Rate Rider for Disposition of Global Adjustment Account (2021) - effective until December 31, 2021 Applicable only for Non-RPP Customers	\$/kWh	(0.0008)

## GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This class pertains to non-residential customers taking electricity at 750 volts or less whose monthly average peak demand is less than, or forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	42.01

## GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or forecast to be equal to or greater than 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	130.43

## UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electricity demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

## STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. Street lighting profile is derived through the use of a "virtual street lighting meter" that uses a street light control eye, consistent with the model type and product manufacturer of devices currently in service in the Applicant's distribution area, to simulate the exact daily conditions that the typical street light is exposed to. This simulated street light load is captured using an interval metering device, and is processed as part of the distributor's daily interval meter interrogation, validation and processing procedures. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

## APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

## MONTHLY RATES AND CHARGES - Delivery Component

Service Charge (per connection)	\$	1.15
Rate Rider for Recovery of COVID-19 Foregone Revenue from Postponing Rate Implementation - effective until October 31, 2021	\$	0.01
Distribution Volumetric Rate	\$/kW	4.5132
Low Voltage Service Rate	\$/kW	0.3672
Rate Rider for Disposition of Deferral/Variance Accounts (2020) - effective until October 31, 2021	\$/kW	0.4317
Rate Rider for Disposition of Account 1576 - effective until December 31, 2021	\$/kW	(0.0447)
Rate Rider for Disposition of Deferral/Variance Accounts (2021) - effective until December 31, 2021	\$/kW	(0.2015)
Rate Rider for Disposition of Group 2 Accounts (2021) - effective until December 31, 2021	\$/kW	(0.0410)
Rate Rider for Recovery of COVID-19 Foregone Revenue from Postponing Rate Implementation - effective until October 31, 2021	\$/kW	0.0416
Rate Rider for Disposition of Global Adjustment Account (2021) - effective until December 31, 2021 Applicable only for Non-RPP Customers	\$/kWh	(0.0008)
Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2021) - effective until December 31, 2022	\$/kW	4.1496
Retail Transmission Rate - Network Service Rate	\$/kW	2.2007
Retail Transmission Rate - Line and Transformation Connection Service Rate	\$/kW	1.3708

## MONTHLY RATES AND CHARGES - Regulatory Component

Wholesale Market Service Rate (WMS) - not including CBR	\$/kWh	0.0030
Capacity Based Recovery (CBR) - Applicable for Class B Customers	\$/kWh	0.0004
Rural or Remote Electricity Rate Protection Charge (RRRP)	\$/kWh	0.0005
Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

## EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION

This classification applies to an electricity distributor licensed by the Ontario Energy Board that is provided electricity by means of this distributor's facilities. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	141.53
Rate Rider for Recovery of COVID-19 Foregone Revenue from Postponing Rate Implementation - effective until October 31, 2021	\$	0.91

## RETAIL SERVICE CHARGES (if applicable)

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	104.24
Monthly fixed charge, per retailer	\$	41.70
Monthly variable charge, per customer, per retailer	\$	1.04
Distributor-consolidated billing monthly charge, per customer, per retailer	\$	0.62
Retailer-consolidated billing monthly credit, per customer, per retailer	\$	(0.62)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.52
Processing fee, per request, applied to the requesting party	\$	1.04
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.17
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.08

### LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0423
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0318

BY EMAIL AND RESS

Ms. Christine Long  
Registrar  
Ontario Energy Board  
PO Box 2319  
2300 Yonge Street, 27<sup>th</sup> Floor  
Toronto, ON M4P 1E4

**RE: 2021 Cost-of-Service Rate Application EB-2020-0040  
Niagara Peninsula Energy Inc.  
Settlement Proposal**

Dear Ms. Long:

In accordance with the revised filing deadline approved in the Board's letter dated January 6, 2021, please find enclosed Niagara Peninsula Energy Inc.'s ("NPEI's") Settlement Proposal and updated live Excel models.

NPEI is also submitting its Responses to Pre-Settlement Conference Clarification Questions.

Should NPEI receive from the Board a Decision and Order on or before February 5, 2021, NPEI is able to implement the billing changes for rates effective January 1, 2021.

If there are any questions, please contact Suzanne Wilson at 905-353-6004 or [Suzanne.Wilson@npei.ca](mailto:Suzanne.Wilson@npei.ca).

Yours truly,  
NIAGARA PENINSULA ENERGY INC.

Suzanne Wilson, CPA, CA  
Senior Vice-President, Finance

**Niagara Peninsula Energy Inc.**  
**EB-2020-0040**  
**Proposed Settlement Proposal**

**Filed with OEB: January 7, 2021**

On April 17, 2020, Niagara Peninsula Energy Inc. (the “Applicant” or “NPEI”) sent a letter to the Ontario Energy Board (“OEB”) deferring the filing of the rate application. In response, on April 20, 2020, the OEB responded with a letter that stated: “The OEB anticipates that the OEB panel hearing the application will take into consideration any COVID-19 related delays in setting the effective date for NPEI’s 2021 rates.”

NPEI filed a Cost of Service application with the OEB on August 18, 2020 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the “Act”), seeking approval for changes to the rates that NPEI charges for electricity distribution and other charges, to be effective January 1, 2021 (OEB Docket Number EB-2020-0040) (the “Application”).

The Application was accepted by the OEB as complete and a Notice of Hearing was issued on September 10, 2020, and Procedural Order No. 1 on October 13, 2020, the latter of which required the parties to the proceeding to develop a proposed Issues List by November 26, 2020 and scheduled a Settlement Conference for December 9, 10, and 11, 2020.

NPEI filed its Interrogatory Responses with the OEB on November 19, 2020, pursuant to which NPEI updated several models and submitted them to the OEB as Excel documents. On November 26, 2020, following the Interrogatories, Ontario Energy Board staff (“OEB Staff”) submitted a proposed Issues List as agreed to by the parties. On December 4, 2020, the OEB issued its Decision on the proposed Issues List, approving the list submitted by OEB Staff (the “Issues List”) and adding three issues: 5.3, 5.4, and 5.5. This Settlement Proposal is filed with the OEB in connection with the Application and is organized in accordance with the Issues List.

A Settlement Conference was convened on December 9, 2020 and continued to December 11, 2020, in accordance with the OEB’s *Rules of Practice and Procedure* (the “Rules”) and the OEB’s *Practice Direction on Settlement Conferences* (the “Practice Direction”).

Jim Faught acted as facilitator for the Settlement Conference which lasted for three days.

NPEI and the following Intervenors (the “Intervenors”), participated in the Settlement Conference:

School Energy Coalition (“SEC”);  
Hydro One Networks Inc. (“Hydro One”);  
Vulnerable Energy Consumers Coalition (“VECC”); and  
Distributed Resource Coalition (“DRC”).

NPEI and the Intervenors are collectively referred to below as the “Parties”.

OEB Staff also participated in the Settlement Conference. The role adopted by OEB Staff is set out

in page 5 of the Practice Direction. Although OEB Staff is not a party to this Settlement Proposal, as noted in the Practice Direction, OEB Staff who did participate in the Settlement Conference are bound by the same confidentiality requirements that apply to the Parties to the proceeding.

This document is called a “Settlement Proposal” because it is a proposal by the Parties to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB’s approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties, it is null and void and of no further effect. In entering into this Agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

The Parties acknowledge that this Settlement Conference is privileged and confidential in accordance with the Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB’s Practice Direction on Confidential Filings and the rules of that latter document do not apply. Instead, in this Settlement Conference, and in this Agreement, the Parties have interpreted “confidential” to mean that the documents and other information provided during the course of the Settlement Conference, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the Settlement Conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the Settlement Conference except for the purpose of enforcement aforementioned. However, the Parties agree that “attendees” is deemed to include, in this context, persons who were not in attendance via video conference at the Settlement Conference but were a) any persons or entities that the Parties engage to assist them with the Settlement Conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the “evidence” in this Settlement Proposal shall, unless the context otherwise requires, include:

(a) additional information included by the Parties in this Settlement Proposal; (b) the Appendices to this document; and (c) the evidence filed concurrently with this Settlement Proposal titled “Responses to Pre-Settlement Clarification Questions” (“Clarification Responses”). The supporting Parties for each settled and partially settled issue, as applicable, agree that the evidence in respect of that settled or partially settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal.

There are Appendices to this Settlement Proposal which provide further support for the proposed settlement. The Parties acknowledge that the Appendices were prepared by NPEI. While the Intervenor has reviewed the Appendices, the Intervenor is relying on the accuracy of those

Appendices and the underlying evidence in entering into this Settlement Proposal.

Outlined below are the final positions of the Parties following the Settlement Conference. For ease of reference, this Settlement Proposal follows the format of the final approved Issues List for the Application attached to the Issues List Decision dated December 4, 2020.

The Parties are pleased to advise the OEB that they have reached a complete agreement with respect to the settlement of all of the issues in this proceeding. Specifically:

<p><b>“Complete Settlement”</b> means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted by the OEB, the Parties will not adduce any evidence or argument during the oral hearing in respect of these issues.</p>	<p># issues settled:  <b>All</b></p>
<p><b>“Partial Settlement”</b> means an issue for which there is partial settlement, as NPEI and the Intervenors who take any position on the issue were able to agree on some, but not all, aspects of the particular issue. If this Settlement Proposal is accepted by the OEB, the Parties who take any position on the issue will only adduce evidence and argument during the hearing on those portions of the issues not addressed in this Settlement Proposal.</p>	<p># issues partially settled:  <b>None</b></p>
<p><b>“No Settlement”</b> means an issue for which no settlement was reached. NPEI and the Intervenors who take a position on the issue will adduce evidence and/or argument at the hearing on the issue.</p>	<p># issues not settled:  <b>None</b></p>

According to the Practice Direction (p. 3), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties who take a position agree in writing that any part(s) of this Settlement Proposal that the OEB does accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties who take a position agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties who take a position agree that all of the Parties who took a position on a particular issue must agree with any revised Settlement Proposal as it relates to that issue, or decide to take no position on the issue, prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not NPEI is a party to such proceeding.

Where in this Agreement, the Parties “accept” the evidence of NPEI, or the Parties or any of them “agree” to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words “for the purpose of settlement of the issues herein” shall be deemed to qualify that acceptance or agreement.

## SUMMARY

In reaching this complete settlement, the Parties have been guided by the Filing Requirements for 2021 rates, the approved Issues List attached as Schedule A to the OEB’s Issues List Decision of December 4, 2020 and the Report of the OEB titled *Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach* dated October 18, 2012 (“RRFE”).

This Settlement Proposal reflects a complete settlement of the issues in this proceeding. NPEI has made changes to the Revenue Requirement as depicted below in Table A.

**Table A: Revenue Requirement Summary**

	Application (a)	Interrogatories (b)	Variance (c) = (b)-(a)	Clarification Responses (d)	Variance (e) = (d)- (b)	Settlement (f)	Variance (g) = (f) - (d)
Regulated Return on Capital	8,679,929	8,463,790	(216,139)	8,463,790	-	8,342,809	(120,981)
Regulated Rate of Return	5.11%	5.00%	-0.11%	5.00%	-	5.00%	-
Rate Base	169,952,205	169,435,865	(516,340)	169,435,865	-	167,013,952	(2,421,913)

The Parties believe that no oral hearing is required if this Settlement Proposal is accepted.

Based on the foregoing, and the evidence and rationale provided below, the Parties who take a position agree that this Settlement Proposal is appropriate and recommend its acceptance by the OEB. Refer to Appendix A for the Schedule of Draft Tariff of Rates Charges resulting if this settlement is accepted by the OEB. Also, refer to Appendix E – Bill Impacts.

This Settlement Proposal reflects the Parties’ agreement on an effective date for new rates of January 1, 2021.

This Settlement Proposal has incorporated the OEB’s updated cost of capital parameters issued on November 9, 2020 for rates effective January 1, 2021 into its calculations as well as recent Board communications regarding joint use pole attachments. NPEI has filed a draft rate order enclosed as Appendix A together with underlying supporting materials including a full set of models with the updated cost of capital parameters.

## 1.0 Planning

### 1.1 Capital

*Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:*

- *customer feedback and preferences*
- *productivity*
- *benchmarking of costs*
- *reliability and service quality*
- *impact on distribution rates*
- *trade-offs with OM&A spending*
- *government-mandated obligations*
- *the objectives of Niagara Peninsula Energy Inc. and its customers*
- *the distribution system plan*
- *the business plan*

**Complete Settlement:** NPEI agrees to reduce its test year capital expenditures by \$2,570,053 (based on the Clarification Responses as a starting point). This would result in NPEI adjusting its Net Capital Expenditures to \$12,800,051. This amount can be seen in Appendix B – Capital Expenditures Summary to this Settlement Proposal. The reduction depicts a more balanced pacing of NPEI’s capital work during the Distribution System Plan period (2021-2025). NPEI’s 2021

Table 1.1A below is a summary of capital expenditures for the test year and the forecast period. The total test year capital expenditures are set out in the Table 1.1B below, and is more fully justified in the Applicant’s Distribution System Plan. The Parties taking a position on this issue accept the revised level of planned capital expenditures, and accept the rationale for planning and pacing choices. The Applicant confirms that this level of spending is sufficient to maintain a safe and reliable distribution system.

NPEI has included in its distribution system planning from 2022-2025, consideration for non-wires alternatives for capacity constraint projects that NPEI determines may have a material impact on one or more of the following: reducing line losses, improving reliability or reducing costs. When NPEI considers non-wires solutions it shall do so early enough to allow for cost-effective solutions that require a longer lead time (e.g. opportunities that are only cost-effective at the time of new construction of the applicable distribution infrastructure).

**Table 1.1A  
 Summary of Capital Expenditures**

Category	Test Year	Forecast Period (planned)			
	2021	2022	2023	2024	2025

## 1.2 OM&A

*Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:*

- *customer feedback and preferences*
- *productivity*
- *benchmarking of costs*
- *reliability and service quality*
- *impact on distribution rates*
- *trade-offs with capital spending*
- *government-mandated obligations*
- *the objectives of Niagara Peninsula Energy Inc. and its customers*
- *the distribution system plan*
- *the business plan*

**Complete Settlement:** NPEI agrees to the following adjustment:

- Reduce its proposed OM&A expenses in the Test Year (based on the Clarification Responses as a starting point) by \$650,000 to \$19,734,010. Table 1.2A below illustrates the reduction of \$650,000 by operational area.

NPEI confirms the Bad Debt Expense in the amount of \$357,000 included in the total Test Year OM&A of \$19,734,010 excludes any impacts related to Covid-19.

Based on the foregoing and the evidence filed by NPEI, the Parties taking a position on this issue accept the revised level of planned OM&A expenditures, and accept the rationale for planning and pacing choices.

**Table 1.2A Summary of OM&A Expenses with Variance**

## 2.0 Revenue Requirement

*2.1 Are all elements of the revenue requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?*

**Complete Settlement:** The Parties taking a position on this issue accept that the Base Revenue Requirement is reasonable and has been appropriately determined in accordance with OEB policies and practices. See Appendix D – Revenue Requirement Work Form (RRWF) Specifically:

- a) *Rate Base:* The Parties taking a position on this issue accept the opening 2021 Net Fixed Asset balance that includes the construction of a new garage and fleet facility at a cost of approximately \$3.6 million. The garage is part of a property which includes NPEI's main office and other facilities. NPEI confirms that the construction of the new fleet garage facility was not completed in the context of a long-term facilities review plan. Should NPEI propose or undertake to vacate, or comprehensively redevelop the existing facilities within the current rate plan term or as part of the next rebasing application. NPEI will undertake to include the rationale and evidence for the fleet maintenance facility investment as part of such comprehensive facility plan. Subject to the adjustments expressly noted in this Settlement Proposal, the Parties taking a position on this issue accept that the rate base calculations are reasonable and have been appropriately determined in accordance with OEB policies and practices.
- b) *Working Capital:* NPEI's Cost of Power calculation incorporates the changes outlined in the Letter from the OEB Re: New Regulated Price Plan Prices Effective January 1, 2021, dated December 15, 2020. The Parties taking a position on this issue accept that the working capital calculation, has been appropriately determined in accordance with OEB policies and practices.
- c) *Cost of Capital:* NPEI's cost of capital calculations reflect the cost of capital parameters for 2021 Cost of Service Rate Applications in accordance with the letter from the OEB dated November 9, 2020. The Parties taking a position on this issue accept that the cost of capital calculations, have been appropriately determined in accordance with OEB policies and practices.
- d) *Other Revenue:* NPEI agrees to reduce its proposed Other Revenue in the Test Year (based on the Clarification Responses as a starting point) by \$10,472 to \$2,971,502. The adjustment to Other Revenue reflects the OEB Wireline Pole Attachment Charge Order, dated December 10, 2020, whereby the Wireline Pole Attachment Charge will remain at the 2020 rate of \$44.50 per attachment per year per pole. NPEI also agreed to update the Retail Service Revenue Rates using the 2021 inflation factor of 2.2%.

The Parties taking a position on this issue accept that the other revenue calculations, as updated to reflect this Settlement Proposal, have been appropriately determined in accordance with OEB policies and practices.

The updates to Other Revenues reflecting this Settlement Proposal are provided as

part of the supporting material in file named:  
 Niagara\_Peninsula\_Energy\_Settlement\_2020\_Filing\_Requirements\_Chapter2\_Appendices\_20210105 at Appendix 2-H Operating Revenue.

- e) *Depreciation:* The Parties taking a position on this issue accept that the depreciation calculations have been appropriately determined in accordance with OEB policies and practices. Please refer to Appendix C which illustrates the OEB’s Chapter 2 Filing Requirements Appendix 2 BA.
- f) *Taxes:* NPEI’s 2021 Test Year PILS was calculated using the depreciation under the Accelerated Investment Incentive Program (AIIP) related to the 2021 Test Year capital expenditures. The Grossed Up PILS for the 2021 Test Year amount to \$494,303. NPEI agreed to reduce the 2021 Test Year PILS by \$86,571, representing one-fifth of \$432,857, resulting in PILS of \$407,732 to be included in NPEI’s 2021 Test Year Revenue Requirement. Also see Issue 4.2 for additional detailed explanation. See Appendix F – PILS Settlement Proposal.

Table 2.1.1 below illustrates the calculation of the Balance in Account 1592 as a result of the Accelerated Investment Incentive Program (AIIP) related to capital cost allowance (CCA) between the period November 20, 2018 and December 31, 2020, in the amount of \$651,987. NPEI agreed to dispose \$238,188 of the principal balance in Account 1592 in the 2021 Test Year. The principal balance of \$238,188 represents the PILS amount NPEI had in its’ Revenue Requirement for the period November 20, 2018 to December 31, 2020.

NPEI’s PILS amount included in its Revenue Requirement from the last Cost of Service rate application in 2015 was \$109,157.

The principal balance of \$238,188 is comprised of the following:

Description	Amount
Proportion of 2018 PILS using actual% of claimed additions under AIIP (November 20, 2018 to December 31, 2018)	(19,874)
PILS underpinning NPEI's rates for 2019	(109,157)
PILS underpinning NPEI's rates for 2020	(109,157)
Total Principal for disposition	(238,188)
Carrying Charges	(6,389)
<b>Total Proposed for Disposition</b>	<b>(244,577)</b>

The carrying charges to be disposed in the 2021 Test Year, in the amount of \$6,389 was calculated on the principal balance of \$671,045 from December 1, 2018 to December 31, 2020. See Appendix F – PILS Settlement Proposal.

The residual balance in Account 1592 after disposition amounts to \$432,857. The reduction of \$86,571 in the 2021 Test Year PILS is equivalent to a rate rider of \$432,857 in Account 1592 sub-account CCA changes disposed of over five years.

NPEI will calculate and record carrying charges in Account 1592- PILS and Tax Variance – sub-account CCA changes, on the residual balance of \$432,857 over the period of the next five years or until NPEI’s next Cost of Service rate application.

**Table 2.1.1 Reduction to 2021 Test Year PILS**

	2018 using 2018 actual % claimed under the All	2019 Balance	2020 Balance	Total
CCA under the legacy rules using the actual capital additions (a)	10,397,485	10,410,893	10,378,418	31,186,796

Residual balance in Account 1592 to be disposed of over the number of years until next COS (h=f-g)	2,531	(264,980)	(170,408)	(432,857)
# of Years until next Cost of Service				5
<b>Reduction to 2021 Test Year PILS Grossed Up</b>				<b>(86,571)</b>

NPEI and the parties who take a position agree to use the unsmoothed accelerated depreciation approach in its 2021 Test Year PILs calculations and to use sub-account Account 1592 – PILs and Tax Variances – CCA Changes Sub-account – Incentive Phase Out to account for the lost revenue during the eventual phase out of the Accelerated Investment Incentive anticipated to begin after 2023 and to track eventual increase in tax expenses as part of the phase out. The balance in this variance account is to be disposed of at NPEI’s next Cost of Service filing in accordance with the OEB’s rules and accounting guidance. The Parties taking a position on this issue accept that the PILs calculations, as updated to reflect this Settlement Proposal, have been appropriately determined in accordance with OEB policies and practices.

The PILs workforms reflecting this Settlement Proposal are provided as part of the supporting material in the files named:

**2.2** *Has the revenue requirement been accurately determined based on these elements?*

**Complete Settlement:** The Parties taking a position on this issue accept that the proposed Revenue Requirement has been accurately determined based on the elements in 2.1 of this Settlement Proposal.

The elements of Revenue Requirement are detailed in Tables 2.2A to 2.2I below.

**Table 2.2A**  
**Revenue Requirement**

	Application (a)	Interrogatories (b)	Variance (c) = (b)-(a)	Clarification Responses (d)	Variance (e) = (d)- (b)	Settlement (f)	Variance (g) = (f) - (d)

**Table 2.2F  
Amortization & Depreciation**

2021 Test Year							
Description	Application	Interrogatories	Variance	Clarification Responses	Variance	Settlement Proposal	Variance
	A	B	C = B-A	D	E = D-B	F	G=F-D
Amortization and Depreciation	8,442,650	8,484,003	41,353	8,484,003	-	8,463,011	(20,992)

**Table 2.2G Grossed Up PILs**

2021 Test Year							
Description	Application	Interrogatories	Variance	Clarification Responses	Variance	Settlement Proposal	Variance
	A	B	C = B-A	D	E = D-B	F	G=F-D
Taxes/PILS (Grossed UP)	334,085	346,771	12,686	346,771	-	394,518	47,746

The variance of \$47,746 in the calculation of PILS from the Clarification responses to the Settlement Proposal is a result of the following:

- calculating the difference in CCA using the legacy rules versus the accelerated depreciation approach AIPP using the 2015 Test Year additions versus using the actual additions between the period November 20, 2018 and December 31, 2020.
- Updated the cost of power for the new RPP prices effective January 1, 2021 which has updated the 2021 Test Year rate base and the corresponding return on rate base.

**Table 2.2H Other Revenue**

2021 Test Year							
Description	Application	Interrogatories	Variance	Clarification Responses	Variance	Settlement Proposal	Variance
	A	B	C = B-A	D	E = D-B	F	G=F-D

### 3.0 Load Forecast, Cost Allocation and Rate Design

**3.1** *Are the proposed load and customer forecast, loss factors, and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of Niagara Peninsula Energy’s customers?*

**Complete Settlement:** The Parties taking a position on this issue accept that the customer forecast, load forecast, loss factors, and the resulting billing determinants are an appropriate forecast of the energy and demand requirements of Niagara Peninsula Energy’s customers, consistent with OEB policies and practices.

The load forecast is reproduced below as Table 3.1A:

**Table 3.1A  
 Load Forecast**

2021 Test Year								
Rate Class	Application		Interrogatories		Clarification Questions		Settlement Proposal	
	kWh	kW	kWh	kW	kWh	kW	kWh	kW

Persistent CDM has been included as a variable within the regression model used in the load forecast as filed in Niagara\_Peninsula\_Energy\_Settlement\_Weather\_Normalization\_Regression\_Model\_2021\_20210105.

As a result, NPEI has not included CDM as a manual adjustment to the load forecast. Furthermore, NPEI agrees to not seek LRAMVA for CDM savings in the 2021 Test Year and agrees to not claim LRAMVA related to any new savings from the years of 2019 and 2020.

*Clarification Responses:*

VECC-55, VECC-56, VECC-57

**Supporting Parties:** SEC, VECC, DRC, Hydro One

**Parties Taking No Position:**

### 3.2 Are the proposed customer classes appropriate?

**Complete Settlement:** NPEI agreed to establish a new Embedded Distributor Rate Class and will reallocate all four of Hydro One's embedded accounts that were previously billed as General Service > 50 kW customers into this new Embedded Distributor Rate Class. All four of Hydro One's existing account's distribution system configurations meet the definition of an embedded distributor. The Parties taking a position on this issue accept the results that the proposed customer classes are appropriate.

**Supporting Parties:** SEC, VECC, DRC, Hydro One

**Parties Taking No Position:**

**3.3** *Are the proposed cost allocation methodology, allocations, and revenue-to-cost ratios appropriate?*

**Complete Settlement:** The Parties accept the cost allocation methodology, allocations, and revenue-to-cost ratios included with this Settlement Proposal are appropriate.

The Parties who take a position agree that NPEI shall establish a new Embedded Distributor Rate Class and reallocate four Hydro One accounts that were previously included in the General Service > 50 kW rate class to the new Embedded Distributor Rate Class. Two accounts, Port Davidson and Wellandport Primary Metering Elements (PME) do not utilize NPEI’s assets and two accounts, Victoria and Rockway PME’s do utilize NPEI’s assets. NPEI used the Cost Allocation model to allocate the costs to all of its rate classes whereby no costs were directly allocated to the new Embedded Distributor Rate Class. For the Port Davidson and Wellandport accounts only the costs related to Customer Allocators were allocated to the new Embedded Distributor Rate Class. For the Victoria and Rockway accounts all costs related to both Demand Allocators and Customer Allocators were allocated to the new Embedded Distributor Rate Class. The Parties taking a position on this issue accept the results of the cost allocation.

The Parties have agreed that NPEI will use the Residential rate class which had the lowest revenue to cost ratio from the Cost Allocation model to balance the revenue to cost ratios that had to be reduced to meet the ceiling of the OEB’s policy range (noted in Table 3.3 as the ‘Board Target High’).

The revenue-to-cost ratios are reproduced below in Table 3.3.

**Table 3.3**  
**Revenue to Cost Ratios**

2021 Test Year				
Rate Class	Cost Ratio from Cost Allocation Model-Line 75 Tab O1 %	Proposed Revenue to Cost Ratios %	Board Target Low %	Board Target High %
Residential	94.49%	94.68%	85	115
General Service < 50 kW	116.34%	116.34%	80	120
General Service > 50 kW	109.17%	109.17%	80	120
Unmetered Scattered Load	127.01%	120.00%	80	120
Sentinel Lighting	97.84%	97.84%	80	120
Street Lighting	137.47%	120.00%	80	120
Embedded Distributor	143.14%	120.00%	80	120

**Parties Taking No Position:**

### **3.4** *Are Niagara Peninsula Energy's proposals for rate design appropriate?*

#### **Complete Settlement:**

Subject to the adjustments expressly noted in this Settlement Proposal, the Parties taking a position on this issue accept the NPEI proposal for rate design:

- NPEI agrees to adjust its rate design proposal for the Unmetered Scattered Load (“USL”) Rate Class such that the 2020 fixed rate will not be increased in 2021 if it is otherwise above the Minimum System plus PLCC level. The current fixed rate for the Unmetered Scattered Load Rate class is \$20.73 per month. The updated fixed rate for the Unmetered Scattered Load Rate Class is \$20.43 and the Minimum System plus PLCC level for the USL rate class is \$17.27. NPEI agrees to adjust the USL fixed rate to \$20.43. This is shown below in Table 3.4.
- NPEI agrees to set the fixed rate for the new Embedded Distributor rate class at the Minimum System plus PLCC level. This is shown below in Table 3.4.
- The General Service > 50 kW rate class current fixed/variable split was 15.32% fixed and 84.68% variable. The Cost Allocation model calculated 20.68% fixed and 79.32% variable ratio. NPEI agrees to set the fixed rate for the General Service > 50 kW rate class at 17.5% fixed and 82.5% variable. This is shown in Table 3.4 below.

**Supporting Parties:** SEC, VECC, DRC

**Parties Taking No Position:** Hydro One

**4.2** *Are Niagara Peninsula Energy’s proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for discontinuation of accounts, and the continuation of existing accounts, appropriate?*

**Complete Settlement:**

**Group 1 Accounts:** The Parties taking a position on this issue accept NPEI’s proposal for Group 1 deferral and variance accounts, as updated to reflect this Settlement proposal for Accounts 1588 and 1589, as appropriate.

**Group 2 Accounts:** Subject to the adjustments expressly noted in this Settlement Proposal, the Parties accept NPEI’s proposal for Group 2 deferral and variance accounts as appropriate:

- **Account 1508 - Other Regulatory Assets-Sub Account – OEB Cost Assessment.** NPEI agrees to reduce in the amount of \$64,247 before carrying charges to reflect the growth in the base amounts included rates for OEB Cost Assessment Fees over-time as a result of the annual IRM rate adjustment and customer and load growth.
- **Account 1592-PILS and Tax Variances, Sub-Account CCA** NPEI agrees to record in Sub-Account CCA changes as a result of the (AIIP) related to capital cost allowance (CCA) between the period November 20, 2018 and December 31, 2020, the amount of \$651,987. Table 4.2.1 below illustrates the calculation of the \$651,987.
- Table 4.2.1 below illustrates the calculation of the Balance in Account 1592. NPEI agrees to refund 100% of the prorated 2018 (November 20, 2018 to December 31, 2018), 2019 and 2020 actual AIIP impacts up to that the amount that represents the PILs amount that underpins NPEI’s 2015 Test Year rates, in the amount of \$238,188 to customers. The \$238,188 consists of the following PILS amounts that relate to the period November 20, 2018 to December 31, 2020. NPEI had \$109,157 of PILS that underpinned it 2015 Test Year rates. The 2018 amount of \$19,874 is the prorated amount of PILS related to the period from November 20, 2018 to December 31, 2018.

Description	Amount
Proportion of 2018 PILS using actual% of claimed additions under AIIP (November 20, 2018 to December 31, 2018)	(19,874)
PILS underpinning NPEI's rates for 2019	(109,157)
PILS underpinning NPEI's rates for 2020	(109,157)
<b>Total Principal for disposition</b>	<b>(238,188)</b>

Table 4.2.1 Account 1592-PILS and Tax Variance – Sub-Account CCA

	2018 using 2018 actual % claimed under the All	2019 Balance	2020 Balance	Total

Proration %	10.68%	100%	100%	97.16%
Balance Calculated in Account 1592(g)	(1,852)	(374,137)	(279,565)	(651,987)
NPEI Balance included in Account 1592 to be disposed in 2021 Test Year (h)	(19,874)	(109,157)	(109,157)	(238,188)
Residual balance in Account 1592 to be disposed of over the number of years until next COS (h=f-g)	2,531	(264,980)	(170,408)	(432,857)
# of Years until next Cost of Service				5
<b>Reduction to 2021 Test Year PILS Grossed Up</b>				<b>(86,571)</b>

The residual balance in the Sub-Account after disposition is \$432,857. This residual balance will be disposed of by way of a reduction to the 2021 Test Year PILS in the amount of \$86,571, which represents the residual balance divided by 5 representing the number of years until NPEI would be scheduled to have its rates set on a Cost of Service basis. This methodology mirrors what would occur if NPEI had a \$432,857 loss carryforward at the end of 2020. The reduction of \$86,571 in the 2021 Test Year PILS is also similar to a rate rider of \$432,857 disposed of over five years.

The carrying charges to be disposed in the 2021 Test Year, in the amount of \$6,389 was calculated on the principal balance of \$671,045 from December 1, 2018 to December 31, 2020. See Appendix F – PILS Settlement Proposal. NPEI will calculate and record carrying charges in Account 1592- PILS and Tax Variance – sub-account CCA changes, on the residual balance of \$432,857 over the period of the next five years or until NPEI's next Cost of Service rate application.

NPEI agrees to use the unsmoothed accelerated depreciation approach (AIIP) in its 2021 Test Year PILS calculations and to use sub-account Account 1592 – PILS and Tax Variances – CCA Changes Sub-account – Incentive Phase Out to account for the lost revenue during the eventual phase out of the Accelerated Investment Incentive anticipated to begin after 2023 and to track eventual increase in tax expenses as part of the phase out. The balance in this variance account is to be disposed of at NPEI's next Cost of Service

filing in accordance with the OEB's rules and accounting guidance. The Parties taking a position on this issue accept that the PILs calculations, as updated to reflect this Settlement Proposal, have been appropriately determined in accordance with OEB policies and practices.

The Parties taking a position on this issue accept NPEI's proposal for Group 2 deferral and variance accounts as updated to reflect this Settlement Agreement. Table 4.2.2 below sets out the Deferral and Variance Account balances.

The settlement of this issue includes approving the DVA allocation across rate classes using the billing determinants and customer counts noted in Tables 3.1A and 3.1B above.

**Table 4.2.2**

**Parties Taking No Position:**

## 5.0 Other

### 5.1 *Are the Specific Service Charges, Retail Service Charges and Pole Attachment Charge appropriate?*

**Complete Settlement:** The Parties taking a position on this issue accept the Applicant's proposed Specific Service Charges, Retail Service Charges and Pole Attachment Charge, as updated to reflect this Settlement Proposal, have been appropriately determined in accordance with OEB policies and practices as shown in the tariff sheet in Appendix A.

#### **Evidence:**

**5.2** *Is it appropriate to align Niagara Peninsula Energy's rate year to its fiscal year with rates changing from May 1 to January 1 with a proposed effective date of January 1, 2021 for 2021 rates appropriate?*

**Complete Settlement:** The Parties taking a position on this issue agree the alignment of NPEI's rate year and fiscal year changing from May 1 to January 1 is appropriate.

The Parties taking a position on the issue of proposed effective date of January 1, 2021, agree to an effective date that is no later than February 1, 2021. Provided NPEI receives from the Board a Decision and Order on or before February 5, 2021, NPEI is able to implement the billing changes for rates effective January 1, 2021. Should the Decision and Order not be received by February 5, 2021, NPEI would be permitted to recover of such lost revenue between February 1, 2021 and the implementation date, if required.

**5.3** *What is the appropriate time frame for Niagara Peninsula Energy to adjust its current capital structure to be more aligned with the OEB's deemed structure for regulated electricity utilities?*

**Complete Settlement:** NPEI's current capital structure will be more aligned with the OEB's deemed structure for regulated electricity utilities within the next six to ten years, as NPEI will likely be incurring large capital expenditures beyond January 1, 2026 as a result of the forecasted growth in its service territory, that will require long term financing. As part of moving towards the OEB's deemed structure, NPEI's view is that it must also ensure it will comply with the debt covenants it currently has with its third party lenders, even during periods of uncertainty like the pandemic 1-Staff-6.

The Parties taking a position on this issue accept that NPEI's time frame to adjust its current capital structure to be more aligned with the OEB's deemed capital structure is appropriate. The Parties also agree that the current low interest rate environment should be a factor to be considered in the timing of moving toward the OEB's deemed structure.

**Parties Taking No Position:** Hydro One

**5.4** *Is the incentive-based compensation for executives appropriately aligned to improve Niagara Peninsula Energy's ranking relative to its peers in Ontario (on a cost per customer basis or a comparable metric)?*

**Complete Settlement:** NPEI currently has an internal NPEI Balanced Scorecard which is used for the purpose of executive incentive-based compensation, see Appendix G of this Settlement Proposal. The Parties taking a position on this issue accept that NPEI's incentive based compensation metrics, as adjusted in this Settlement Proposal, are appropriately aligned to improve Niagara Peninsula Energy's ranking relative to its peers in Ontario and are reasonable.

NPEI's internal Balance Scorecard include an OM&A cost per customer metric that in 2019 and 2020 was worth a 10% of the annual total score. NPEI agrees to strengthen its internal Balance Scorecard which is used for the purposes of executive incentive-based compensation commencing in 2021 through the following commitments:

- The OM&A cost per customer metric included on the Balanced Scorecard will be its total OM&A costs per Customer as compared to only OM&A costs used in the PEG benchmarking report. This ensures all OM&A costs are included in the metrics. NPEI also agrees to set the 2021 target to reflect the OM&A and customer forecast agreed to in this application. After 2021, NPEI agrees to set its annual target for the metric on a basis that encourages improvement relative to its peers in Ontario
- NPEI agrees to set the 2021 targets at the average of the 2015 to 2019 period for both SAIDI and SAIFI due to defective equipment cause codes and that the weighting for each of these metrics will not be less than 7% for each. NPEI agrees to set the 2021 target for SAIDI due to defective equipment cause code at 0.52 and the target for SAIFI due to defective equipment cause code at 0.47. After 2021, NPEI agrees to set its annual target for these metrics on a basis that encourages improvement.

With these adjustments the Parties who take a position agree that the incentive-based compensation for executives will be better aligned to improve NPEI's performance on a cost per customer basis.

**Parties Taking No Position:** Hydro One

**5.5** *Is Niagara Peninsula Energy's methodology for deriving the capitalized percentage of labour and overhead on capital projects appropriate and justified relative to its peers in Ontario?*

**Complete Settlement:** The Parties taking a position on this issue accept that NPEI's methodology for deriving the capitalized percentage of labour and overhead on capital projects is justified and appropriate.

NPEI's methodology for deriving the capitalized percentage of labour and overhead on capital projects is in accordance with its Capitalization Policy which is in accordance with IFRS (International Financial Reporting Standards) IAS 16. NPEI capitalization rates are reviewed annually with its outside auditors to ensure compliance. The Parties are not aware of a central source of information that would allow review of NPEI's methodology as compared to its peers in Ontario. The Parties acknowledge there is some value in examining the trend of an organization over time in respect of this metric.

## Appendix A

### 2021 Draft Tariff of Rates and Charges

**Niagara Peninsula Energy Inc.**  
**TARIFF OF RATES AND CHARGES**  
**Effective and Implementation Date January 1, 2021**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

EB-2020-0040

**RESIDENTIAL SERVICE CLASSIFICATION**

This class pertains to customers residing in detached, semi-detached or duplex dwelling units, where energy is supplied single-phase, 3 wire, 60 hertz, having a nominal voltage of 120/240 volts. Large residential services will include all services from 201 amp. Up to and including 400 amp., 120/240 volt, single phase, three wire. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**MONTHLY RATES AND CHARGES - Delivery Component**

Service Charge	\$	35.31
Rate Rider for Disposition of LRAMVA - effective until December 31, 2021	\$	0.62
Rate Rider for Recovery of COVID-19 Foregone Revenue from Postponing Rate Implementation - effective until October 31, 2021	\$	0.28

**Effective and Implementation Date January 1, 2021**  
**This schedule supersedes and replaces all previously**  
**approved schedules of Rates, Charges and Loss Factors**

EB-2020-0040

**GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or forecast to be equal to or greater than 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**MONTHLY RATES AND CHARGES - Delivery Component**

EB-2020-0040

**UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION**

This classification refers to an account taking electricity at 750 volts or less whose average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electricity demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**MONTHLY RATES AND CHARGES - Delivery Component**

**SENTINEL LIGHTING SERVICE CLASSIFICATION**

This classification refers to accounts that are an unmetered lighting load supplied to a sentinel light. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2020-0040

**STREET LIGHTING SERVICE CLASSIFICATION**

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. Street lighting profile is derived through the use of a "virtual street lighting meter" that uses a street light control eye, consistent with the model type and product manufacturer of devices currently in service in the Applicant's distribution area, to simulate the exact daily conditions that the typical street light is exposed to. This simulated street light load is captured using an interval metering device, and is processed as part of the distributor's daily interval meter interrogation, validation and processing procedures. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION**

This classification applies to an electricity distributor licensed by the Ontario Energy Board that is provided electricity by means of this distributor's facilities. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**microFIT SERVICE CLASSIFICATION**

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

**RETAIL SERVICE CHARGES (if applicable)**

**APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	104.24
Monthly fixed charge, per retailer	\$	41.70
Monthly variable charge, per customer, per retailer	\$	1.04
Distributor-consolidated billing monthly charge, per customer, per retailer	\$	0.62
Retailer-consolidated billing monthly credit, per customer, per retailer	\$	(0.62)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.52
Processing fee, per request, applied to the requesting party	\$	1.04
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.17
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)		
	\$	2.08

**LOSS FACTORS**

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0423
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0318

Notes to the Table:

- Historical "previous plan" data is not required unless a plan has previously been filed. However, use the last OEB-approved, at least on a Total (Capital) Expenditure basis for the last cost of service rebasing year, and the applicant should include their planned budget in each subsequent historical year up to and including the Bridge Year.
- Indicate the number of months of 'actual' data included in the last year of the Historical Period (normally a 'bridge' year):

<b>Explanatory Notes on Variances (complete only if applicable)</b>
Notes on shifts in forecast vs. historical budgets by category Column AC was updated during the IRR process see 2-Staff-8
Notes on year over year Plan vs. Actual variances for Total Expenditures
Notes on Plan vs. Actual variance trends for individual expenditure categories

Notes:

- Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts.
- The "CCA Class" for fixed assets should generally agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3).
- The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the OEB.
- The additions in column (E) must not include construction work in progress (CWIP).
- Effective on the date of IFRS adoption, customer contributions will no longer be recorded in Account 1995 Contributions & Grants, but will be recorded in Account 2440, Deferred Revenues.
- The applicant must ensure that all asset disposals have been clearly identified in the Chapter 2 Appendices for all historic, bridge and test years. Where a distributor for general financial reporting purposes under IFRS has accounted for the amount of gain or loss on the retirement of assets in a pool of like assets as a charge or credit to income, for reporting and rate application filings, the distributor shall reclassify such gains and losses as depreciation expense, and disclose the amount separately.

## Appendix D

### Revenue Requirement Workform

Ontario Energy Board

# Revenue Requirement Workform (RRWF) for 2020 Filers

Version 9.00

Utility Name	Niagara Peninsula Energy Inc.
Service Territory	
Assigned EB Number	EB-2020-0040
Name and Title	Suzanne Wilson, Senior VP Finance
Phone Number	905-353-6004
Email Address	<a href="mailto:suzanne.wilson@npei.ca">suzanne.wilson@npei.ca</a>
Test Year	<a href="#">2021</a>
Bridge Year	<a href="#">2020</a>
Last Rebasing Year	<a href="#">2015</a>

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

***This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.***

***While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the***

### Notes:

- General** Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.
- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- (2) Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- (3) Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- (5) Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- (6) Select option from drop-down list by clicking on cell M12. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- (8) 4.0% unless an Applicant has proposed or been approved for another amount.
- (9) The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

## Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-IB** and in Exhibit 3 of the application.

**Appendix 2-IB** is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth and trends from historical actuals to the Bridge and Test Year forecasts.

Stage in Process:		Application Update			Application Update			Per Board Decision		
Customer Class		Initial Application			Application Update			Per Board Decision		
Input the name of each customer class.		Customer / Connections	kWh	kW/kVA <sup>(1)</sup>	Customer / Connections	kWh	kW/kVA <sup>(1)</sup>	Customer / Connections	kWh	kW/kVA <sup>(1)</sup>
		Test Year average or mid-year	Annual	Annual	Test Year average or mid-year	Annual	Annual	Test Year average or mid-year	Annual	Annual
1	Residential	51,935	454,614,210		51,935	453,679,525				
2	General Service < 50 kW	4,541	131,961,769		4,541	131,690,457				
3	General Service > 50 kW	810	694,096,099	1,775,257	806	686,107,622	1,765,045			
4	Unmetered Scattered Load	325	1,481,614		325	1,481,614

# Revenue Requirement Workform (RRWF) for 2020 Filers

## Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: *Application Update*

A) *Allocated Costs*

Name of Customer Class <sup>(3)</sup>	Costs Allocated from Previous Study <sup>(1)</sup>	%	Allocated Class Revenue Requirement <sup>(1)</sup>	%
<i>From Sheet 10. Load Forecast</i>				
(7A)				
1 Residential	\$ 20,940,354	69.18%	\$ 25,519,220	69.09%
2 General Service < 50 kW	\$ 3,203,396	10.58%	\$ 3,979,399	10.77%
3 General Service > 50 kW	\$ 5,604,282	18.52%	\$ 7,020,166	19.01%
4 Unmetered Scattered Load	\$ 109,566	0.36%	\$ 88,471	0.24%
5 Sentinel	\$ 89,264	0.29%	\$ 88,401	0.24%
6 Streetlight	\$ 320,851	1.06%	\$ 216,150	0.59%
7 Embedded Distributor	\$ -		\$ 22,542	0.06%

<b>Total</b>	<b>\$ 30,267,713</b>	<b>100.00%</b>	<b>\$ 36,934,349</b>	<b>100.00%</b>
<b>Service Revenue Requirement (from Sheet 9)</b>			<b>\$ 36,934,346.95</b>	

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 - Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors - Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes - If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

Name of Customer Class	Load Forecast (LF) X current approved rates (7B)	LF X current approved rates X (1+d) (7C)	LF X Proposed Rates (7D)	Miscellaneous Revenues (7E)
1 Residential	\$ 20,983,817	\$ 21,954,978	\$ 22,004,144	\$ 2,157,742
2 General Service < 50 kW	\$ 4,110,534	\$ 4,300,776	\$ 4,300,776	\$ 328,660
3 General Service > 50 kW	\$ 6,888,109	\$ 7,206,900	\$ 7,206,900	\$ 457,044
4 Unmetered Scattered Load	\$ 102,299	\$ 107,034	\$ 100,836	\$ 5,329
5 Sentinel	\$ 76,021	\$ 79,539	\$ 79,539	\$ 6,948
6 Streetlight	\$ 270,231	\$ 282,737	\$ 244,985	\$ 14,394
7 Embedded Distributor	\$ 29,515	\$ 30,881	\$ 25,665	\$ 1,385

<b>Total</b>	<b>\$ 32,460,527</b>	<b>\$ 33,962,846</b>	<b>\$ 33,962,845</b>	<b>\$ 2,971,502</b>

- (4) In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.
- (5) Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.
- (6) Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.
- (7) Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year: 2015 %	(7C + 7E) / (7A) %	(7D + 7E) / (7A) %	
1 Residential	91.65%	94.49%	94.68%	85 - 115
2 General Service < 50 kW	120.00%	116.34%	116.34%	80 - 120
3 General Service > 50 kW	120.00%	109.17%	109.17%	80 - 120
4 Unmetered Scattered Load	119.83%	127.01%	120.00%	80 - 120
5 Sentinel	91.65%	97.84%	97.84%	80 - 120
6 Streetlight	91.65%	137.47%	120.00%	80 - 120
7 Embedded Distributor	0.00%	143.14%	120.00%	80 - 120

13				
14				
15				
16				
17				
18				
19				
20				

- (8) Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.
- (9) Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".
- (10) Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios <sup>(11)</sup>

	Name of Customer Class	Proposed Revenue-to-Cost Ratio			Policy Range
		Test Year 2021	2022	Price Cap IR Period 2023	
1	Residential	94.68%	94.68%	94.68%	85 - 115
2	General Service < 50 kW	116.34%	116.34%	116.34%	80 - 120
3	General Service > 50 kW	109.17%	109.17%	109.17%	80 - 120
4	Unmetered Scattered Load	120.00%	120.00%	120.00%	80 - 120
5	Sentinel	97.84%	97.84%	97.84%	80 - 120
6	Streetlight	120.00%	120.00%	120.00%	80 - 120

20					

(11) The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2020 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2021 and 2022 Price Cap IR models, as necessary. For 2021 and 2022, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2019 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Ontario Energy Board

# Revenue Requirement Workform (RRWF) for 2020 Filers

## New Rate Design Policy For Residential Customers

Please complete the following tables.

### A Data Inputs (from Sheet 10. Load Forecast)

Test Year Billing Determinants for Residential Class	
Customers	51,935
kWh	453,679,525

Proposed Residential Class Specific Revenue Requirement <sup>1</sup>	\$ 22,004,144.00
--	------------------

Residential Base Rates on Current Tariff	
Monthly Fixed Charge (\$)	\$ 33.67
Distribution Volumetric Rate (\$/kWh)	\$ -

### B Current Fixed/Variable Split

	Base Rates	Billing Determinants	Revenue	% of Total Revenue
Fixed	33.67	51,935	\$ 20,983,817.40	100.00%
Variable	0	453,679,525	\$ -	0.00%
<b>TOTAL</b>	-	-	\$ 20,983,817.40	-

### C Calculating Test Year Base Rates

Number of Remaining Rate Design Policy Transition Years <sup>2</sup>	0
--	---

	Test Year Revenue @ Current F/V Split	Test Year Base Rates @ Current F/V Split	Reconciliation - Test Year Base Rates @ Current F/V Split
Fixed	\$ 22,004,144.00	35.31	\$ 22,005,898.20
Variable	\$ -	0	\$ -
<b>TOTAL</b>	\$ 22,004,144.00	-	\$ 22,005,898.20

	New F/V Split	Revenue @ new F/V Split	Final Adjusted Base Rates	Revenue Reconciliation @ Adjusted Rates
Fixed				
Variable				
<b>TOTAL</b>	-	\$ -	-	

Checks <sup>3</sup>	
Change in Fixed Rate	
Difference Between Revenues @ Proposed Rates and Class Specific Revenue Requirement	

### Notes:

- The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. The change in residential rate design is almost complete and distributors should have either 0 or 1 year remaining. If the distributor has fully transitioned to fixed rates put "0" in cell D40. If the distributor has proposed an additional transition year because the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, put "1" in cell D40.
- Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

## Revenue Requirement Workform (RRWF) for 2020 Filers

### Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

<sup>(1)</sup> Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

<sup>(2)</sup> Short description of change, issue, etc.

### Summary of Proposed Changes

PILS

Settlement

Proposal

**Proposed PILS Settlement**

	2018 using 2018 actual % claimed under the All	2019 Balance	2020 Balance	Total
CCA under the legacy rules using the actual capital additions (a)	10,397,485	10,410,893	10,378,418	31,186,796
CCA under the accelerated rules using the actual capital additions (b)	10,445,587	11,448,593	11,153,815	33,047,996
Difference in CCA (c= a-b)	(48,103)	(1,037,700)	(775,397)	(1,861,200)
Tax rate (%) in effect of 2015 CoS (d)	26.5%	26.5%	26.5%	26.5%
\$ Impact on the revenue requirement (e=cXd)	(12,747)	(274,991)	(205,480)	(493,218)
Grossed-up Revenue Requirement Impact \$ (f=e/1-d)	(17,343)	(374,137)	(279,565)	(671,045)
Proration %	10.68%	100%	100%	
Balance Calculated in Account 1592(g)	(17,343)	(374,137)	(279,565)	(671,045)
NPEI Balance included in Account 1592 to be disposed in 2021 Test Year (h)	(19,874)	(109,157)	(109,157)	(238,188)
Residual balance in Account 1592 to be disposed of over the number of years until next COS (h=f-g)	2,531	(264,980)	(170,408)	(432,857)
# of Years until next Cost of Service				5
<b>Reduction to 2021 Test Year PILS Grossed Up</b>				<b>(86,571)</b>

**Note the \$86,571 is equivalent to a rate rider over the Cost of Service Period of 5 Years**

The \$238,188 will be the balance in Account 1592 before carrying charges to be disposed of on the DVA model for 2021  
 The 2021 DVA model includes \$244,577 in Account 1592 after carrying charges

*The Taxable Loss \$168,689 for the 2020 Bridge Year previously filed in earlier PILS model versions, was removed on Sheet B1 Sch 1 Taxable Income Bridge in cell F8 on the OEB's PILS model so as not to Double count the impact from All in the Bridge Year. The \$168,869 taxable loss in the Bridge Year is due to CCA of \$11,153,815 in 2020 exceeding Depreciation Expense of \$8,163,410 in 2020. This taxable loss has been already been accounted for in the reduction to 2021 PILS*

*The Reduction to the 2021 Test Year PILS is equivalent to the following:*

Reduction to 2021 Test Year PILS Grossed Up	(86,571)
Reduction to 2021 Test Year PILS Before Gross Up	63,630
Tax Rate	0.265
Loss Carry forward Amount to be used in 2021 Test Year on T4 Sch 4 Loss Cfwd Test	240,113
# of Years until next Cost of Service	5
<b>Loss Carryforward to be used entered on B4 Sch 4 Loss Cfwd Bridge-OEB PILS model</b>	<b>1,200,564</b>
