#### Reference:

1. Exhibit A- Tab 1, page 7

#### Interrogatory:

Accumulated Actual Cost Overruns total \$255,500,000. UCT 2 and Valard commercially negotiated a materially lower overrun amount of \$205,000,000 (the Negotiated Outcome). UCT 2 is seeking rate recovery of a portion of the Negotiated Outcome of \$160.4 million.

- a) Please provide a description and explanation of the variance between the Accumulated Actual Cost Overruns and the Negotiated Outcome.
- b) Please provide a description and explanation of the variance between the Negotiated Outcome of \$205 million and the amount sought for rate recovery of \$160.4 million and explain why the variance was not included for recovery.
- c) Please provide a copy of the document that describes the Negotiated Outcome.

#### Response:

(a-c) Please see UCT 2's response to Staff IR-46 (Exhibit I-01-46).

#### Reference:

1. Exhibit C- Tab 1, page 7

#### Interrogatory:

Following the WHO's March 11, 2020, declaration of the COVID-19 pandemic, Valard, provided UCT 2 with an Event Notice on March 12, 2020. The Event Notice indicated that Valard found the pandemic to qualify as a Force Majeure Event under the EPC Contract and that COVID-19 would likely severely impact the ability of Valard to complete the Project within the prescribed budget and schedule.

a) Please provide a copy of the March 12, 2020 Event Notice and any further Notices.

b) Please provide all descriptions of Force Majeure Event under the EPC Contract.

#### Response:

a) Please see UTC 2's Response to Staff IR-8(b) (Exhibit I-01-08).

b) Please see UTC 2's Response to SEC IR-06(a) (Exhibit I-05-06), specifically the definition of "Force Majeure Event" in EPC Contract Section 1.1.

#### Reference:

1. Exhibit C- Tab 1

#### Interrogatory:

UCT 2 developed new financial cost codes for the Project team to account for COVID-19.

- a) Please provide a listing of the new financial cost codes with descriptions and provide the date they were implemented.
- b) Please provide copies of all documentation provided to the project team on when and how to implement the new financial cost codes.
- c) Please provide a breakdown of the \$255,500,000 in Accumulated Actual Cost Overruns by financial cost code amounts.
- d) Please provide a breakdown of the \$160,400,0002 in applied for costs by financial cost code amounts.

#### Response:

a) Below is the list of COVID-19 financial cost codes with descriptions and date implemented:

| Cost Code     | Description                | Creation Date |
|---------------|----------------------------|---------------|
| P-4837-001-01 | Eng and Const NEER COVID   | 4/21/2020     |
| P-4837-002-01 | Eng and Const Valard COVID | 4/21/2020     |
| P-4837-005-01 | FNM Consultation COVID     | 4/21/2020     |
| P-4837-006-01 | FNM Participation COVID    | 4/21/2020     |
| P-4837-009-01 | PMO COVID                  | 4/21/2020     |
| P-4837-011-01 | Carry Charge IDC COVID     | 4/21/2020     |

- b) When COVID-specific financial cost codes were deemed necessary, the request originated from the Business Management department and was routed through the Accounting department for setup and creation. Communication of the financial cost codes to be used was relayed to the project team members via email. Retention times for email communications have prevented production of this email.
- c) The accumulated actual cost overruns were incurred and recorded by Valard. Because UCT 2 did not accept all of these costs, the total accumulated actual cost overruns amount was not recorded to UCT 2's ledger or assigned financial cost codes. Please see the response to subpart (d) for the detail regarding the costs recorded to UCT 2's ledger.

d) Below please find the requested breakdown of the \$160,388,935 in Applied-For Costs by financial cost code amounts.

| Cost Code       | Description                              | Amount      |
|-----------------|--|-------------|
| P-4837-001-01   | Eng and Const NEER COVID                 | 70,812      |
| P-4837-002-01   | Eng and Const Valard COVID               | 110,600,206 |
| P-4837-005-01   | FNM Consultation COVID                   | 384,111     |
| P-4837-006-01   | FNM Participation COVID                  | 639,323     |
| P-4837-011-01   | Carry Charge IDC COVID (a)               | 7,347       |
| Sub-total COVID |  | 111,701,798 |
|                 |  |             |
| P-4921-001-09   | Carrying Charge IDC (a)                  | 425,078     |
| P-4921-002-09   | Const Var: Valard Construction - Contrac | 10,133,021  |
| P-4921-002-12   | Const var: Cama Cliffs                   | 12,069,735  |
| P-4921-002-13   | Const var: Forest Fire Construct shutdn  | 20,809,264  |
| P-4921-003-03   | White Lake Narrow E&C                    | 3,961,420   |
| P-4921-003-04   | White Lake Narrow Environmental          | 488,932     |
| P-4921-003-05   | White Lake Narrow First Nations          | 379,686     |
| P-4921-005-03   | Const Var: Other - BZA Settlement        | 420,000     |
| Sub-total CCVA  |  | 48,687,137  |
| Total           |  | 160,388,935 |

(a) Carrying charges calculated through project in-service date at OEB perscribed rates.

#### AMPCO INTERROGATORY-04

#### **Reference:**

1. Exhibit C-Tab 1, page 9

#### Interrogatory:

Please provide the financial cost codes and amounts under each cost item listed in Table Ex. C. 3.

#### Response:

The amounts of each line-item listed in Table Ex. C.3 are recorded to Cost Code P-4837-002-01.

#### Reference:

1. Exhibit C-Tab 2

#### Interrogatory:

- a) Please provide the relevant sections of the EPC Contract that explain the 15% Valard markup and 3% Supercomm Fees.
- b) Please explain the basis for applying these fees to incremental COVID-19 costs.

#### Response:

(a-b) Please see UCT 2's response to Staff IR 27 (Exhibit I-01-27).

#### Reference:

1. Exhibit C- Tab 2, page 6

#### Interrogatory:

- a) For each of the publications in the table, please provide the references in each publication for the low and high percentages.
- b) For the Cleaner Energy and Technology publication, please summarize the basis for 70% as the high percentage.

#### Response:

- a) The requested references are provided below:
  - Publication: "UK construction counts the productivity cost of COVID-19" 15% low, 15% high as described in Exhibit 19 of the Socotec report included in the Application (Ex-C, Tab 2, Exhibit 19, at page 2 para 5 of PDF page 2):
    - "Analysis of 45 projects delivered during the pandemic reveals that labour shortages together with the impact of social distancing is accounting for around seven percent of productivity losses. A further one percent is being lost through the poor transfer of design information while remote working. In addition, late material deliveries or unavailability is leading to another seven percent loss."
  - Publication: "Pandemics and Productivity: Quantifying the Impact" low of 17.9%, high of 17.9% as described in Exhibit 22 of the Socotec report included in the Application (Ex-C, Tab 2, Exhibit 22, page 60 of PDF):
    - "our study indicates an overall 9.2% average productivity.... these productivity losses are additive to the mitigation impact of 8.7%...to produce a total productivity impact of 17.9%"
  - Publication: "COVID-19 Construction Productivity Changes" 5.0% low, 35% high, as described in Exhibit 20 of the Socotec report included in the Application (Ex-C, Tab 2, Exhibit 20, page 6 of PDF):
    - The range of hours in the 'Impacted by COVID-19' table for a typical 100 hours of activity range from 105 hours to 125 hours, which is equal to 5% low to 35% high
  - Publication: "Pandemics and Construction Productivity: Quantifying the Impact" 21.8% low, 21.8% high, as shown in Exhibit 21 of the Socotec report included in the Application (Ex-C, Tab 2, Exhibit 21, page 18 of PDF):
    - "The average baseline productivity impact of: 12.9% (Productivity) + 8.9% (Mitigation) = 21.8% (Total Productivity Impact)"
  - Publication: "Evaluation of measures to prevent the spread of COVID-19 on the construction sites" 20.0% low, 70% high, as shown in Exhibit 23 of the Socotec report included in the Application, (Ex-C, Tab 2, Exhibit 23, page 79 of PDF, section 8, para 1):
    - "the cost implications of Covid on the project are approximately 20%. However, this depends on the nature of the project. Big projects, projects that are at the critical phase and experiencing resource shortages, will experience up to 70% increased costs"

Filed: 2024-02-05 EB-2023-0298 Exhibit I Tab 2 Schedule 6 Page 2 of 2

- Publication: "Impact of COVID-19 Pandemic on Demand, Output, and Outcomes of Construction Projects in Singapore" – 28.6% low, 28.6% high, as shown in Exhibit 24 of the Socotec report included in the Application (Ex-C, Tab 2, Exhibit 24, page 83 of PDF):
  - "A three-pronged research approach was adopted: a survey, analyzing published statistical data, and conducting in-depth interviews with subject matter experts. The survey revealed that projects suffered significant delays and cost overruns and lower quality. It was found that construction demand and output decreased by 27.9% and 28.6%, respectively"
- b) The 70% basis is taken directly from the Cleaner Engineering and Technology publication, as described in Exhibit 23 of SOCTEC report included in the Application (Ex-C, Tab 2, Exhibit 23). Socotec used the statistics as reported in the publication as a reference point on page 6 of the Socotec report included in the Application (Ex-C, Tab 2, page 12 of PDF).

#### Reference:

1. Exhibit C- Tab 2, page 58

#### Interrogatory:

In total, the Contractor incurred 2,244,906 of actual labour hours from March 2020 through Substantial Completion of the work. The contractor incurred actual labour costs associated with these hours totaling \$165,731,014.

- a) Please provide the total actual Contractor hours from the start of the project until substantial completion of the work and the total actual labour costs associated with these hours.
- b) Please provide the original budgeted Contractor labour hours and labour costs for the project.
- c) Please provide the total budgeted and actual cost of materials for the project.
- d) Please provide the budgeted and actual cost of materials for the project from March 2020 through substantial completion of the work.

#### Response:

This Response contains redactions due to the confidential and commercially sensitive nature of the information. UCT 2 will be seeking to maintain these redactions in accordance with the Board's Practice Direction on Confidential Filings.

a) A spreadsheet containing all labour hours and costs from the commencement of the Project until substantial completion of the work is provided as Attachment 6.8 to Staff IR-14 (Exhibit I-01-14 Attachment 6.8). Detailed and monthly summary tables that break down the actual hours and costs by month and work type are included on the worksheet tabs labeled "All Labour Hours Monthly" and "All Labour Costs Monthly." Detailed transactional labour data in support of the monthly labour hours and costs totals are included in the worksheet tab labeled "All Labour Detail". As indicated in Staff IR-14, Attachment 6.8 (Exhibit I-01-14 Attachment 6.8), the Contractor expended a total of 2,509,717 labour hours during the entire project period, with corresponding labour costs totaling \$184,317,032.

Notably, the COVID-19 productivity loss analysis, and the figures above, exclude labour hours and cost amounts from the Contractor's extra work cost codes established by the Contractor to separately track costs associated with items such as the COVID-19 direct costs, the forest fire event, and Kama cliffs. Because these items were assessed separately, the cost codes were excluded to avoid the potential for duplication. Additional labour charges totaling \$8,744,069 (119,001 hours) were charged within these extra work accounts. The Contractor also used the extra work cost codes to apply an internal credit totaling \$9,510,538 to offset a portion of the losses on its books.

b) Please see Attachment 1 (Exhibit I-02-07 Attachment 1). This attachment and parts of this Response that pertain to Contractor's budget information is confidential and commercially

Filed: 2024-02-05 EB-2023-0298 Exhibit I Tab 2 Schedule 7 Page 2 of 3

sensitive. The attachment and specific references in this Response to Contractor budget information has been redacted. Unredacted versions have been filed confidentially with the OEB in accordance with its *Practice Direction on Confidential Filings*. The Contractor's originally budgeted labour hours and costs total labour hours and labour hour

- c) The originally budgeted material costs total **Please refer to Exhibit I-02-07** Attachment 1 (cell I436).
- d) The Contractor's original budget, which is derived from the Contractor's original bid estimate, does not budget costs by time period. As is typical for construction projects, the original budget provides only the total forecast labour hours and costs for the performance of all the work within the defined scope of the Project. The original budget is summarized as follows:

| Cost Type | Budget Amount |
|-----------|---------------|
|           |               |
|           |               |
|           |               |
|           |               |
|           |               |
|           |               |
|           |               |
|           |               |

Details of this summary are included in Exhibit I-02-07 Attachment 1. Actual costs were tracked daily, weekly, and monthly, and can be segregated as requested. The Contractor's detailed job cost accounting transactional data indicates the following:

| Cost Type       | Through<br>February 2020 | March 2020<br>Through<br>March 2022 | Post<br>Substantial<br>Completion | Project Totals |
|-----------------|--------------------------|-------------------------------------|-----------------------------------|----------------|
| Labour Hours    | 285,083                  | 2,376,058                           | 25,986                            | 2,687,127      |
|                 |                          |                                     |                                   |                |
| Labour \$       | \$20,097,900             | \$165,513,56                        | \$2,084,489                       | \$187,695,95   |
| Equipment \$    | \$8,865,801              | \$77,297,293                        | (\$343,347)                       | \$85,819,747   |
| Materials \$    | \$15,395,513             | \$41,274,028                        | \$907,092                         | \$57,576,633   |
| Other \$        | \$7,755,035              | \$46,951,179                        | \$1,633,382                       | \$56,339,596   |
| Subcontracts \$ | \$50,351,054             | \$255,115,133                       | \$9,874,608                       | \$315,340,794  |
| Totals          | \$102,465,302            | \$586,151,199                       | \$14,156,224                      | \$702,772,725  |

Filed: 2024-02-05 EB-2023-0298 Exhibit I Tab 2 Schedule 7 Page 3 of 3

The figures above indicate that the overall costs increased from the original budget in the total amount of **Sector** Budget adjustments related to Change Orders 1 through 5, reduced the amount to **Sector** This figure represents the Contractor's overall cost overrun on the project. With the inclusion of the Contractor's contemplated markups on all actual costs incurred, the overall loss totals \$255,539,248. This overall loss compares to the settlement amounts included in Contractor Change Orders 6 and 7, which totaled \$158,211,230.

#### Reference:

1. Exhibit D- Tab 1, page 25

#### Interrogatory:

Table Ex. D.9 provides a summary of incremental costs attributable to Permitting Delays & ROW concerns.

Please explain the \$420,000 in BZA Litigation Costs.

#### Response:

The BZA Litigation Costs are amounts that UCT 2 incurred related to the resolution of judicial review and appeal proceedings commenced by BZA related to the issuance of the Project's Leave to Construct Approval and the Government of Ontario's Order in Council decisions. BZA's claims related to the adequacy of Crown Consultation that had been delegated to UCT 2. Progress of the resolution process was reported in UCT 2's Quarterly Reports. See the following Reports: April 22, 2020 (at pages 15 and 43); July 22, 2020 (pages 14 and 39); October 22, 2020 (pages 13 and 37); January 22, 2021 (pages 15 and 38); April 22, 2021 (pages 15 and 39). These Reports are found in Exhibits I-01-52 Attachment 2 and 3.

At page 16 of its July 2021 Quarterly Report, UCT 2 reported that "NextBridge, the Crown, and BZA resolved BZA's appeal and judicial review of the issuance to the LTC and OIC to NextBridge" and that the appeal and judicial review were subsequently dismissed on June 18, 2021. In its October 22, 2021 Report, UCT 2 stated "The Project start date was delayed from the original schedule due to Biinjitiwabik Zaaging Anishnabek ("BZA") claiming that they were improperly consulted on the Project. The government held back issuing permits until the issue was settled. A settlement payment to BZA was made in total of \$0.4M." The applied-for amounts relate to costs UCT 2 incurred to negotiate and resolve its share of the achieved outcome.

#### Reference:

1. Exhibit E-Tab 1, Page 4

#### Interrogatory:

To manage expenditure cost control and variances, the E&C team also maintains dashboard metrics that are reviewed during monthly management meetings.

Please provide the full list of dashboard metrics reviewed during monthly management meetings.

#### Response:

The dashboard metrics that were reviewed during monthly management meetings are categorized and outlined in Valard's monthly reporting to UCT 2. Sample reports are provided in the Application at Exhibit E, Tab 3. The metrics included:

- overall Project status
- critical issues
- short-term lookahead activities
- environmental status and areas of concern relating to environmental
- cost management reporting
- engineering
- procurement status
- Project schedule
- schedule milestones
- commodity curves
- contractor supervision organization
- safety status reporting (including COVID-19 details, cases, and mitigation measures)

#### Reference:

1. Exhibit E-Tab 2, page 1.

#### Interrogatory:

Table Ex. E.T2.1 provides the amounts on the change order #6 and #7. Any differences between amounts shown in Table Ex. E.T2.1 and amounts identified in Exhibits C and D, are due to the inclusion in the latter of costs not incurred or claimed by Valard.

Please add columns to Table Ex. E.T2.1 for Amounts Requested, Variance, and provide further details on the variance.

#### Response:

The requested table with added columns and variance details is provided below. Please also refer to the response provided to Staff IR-44 (c) (Exhibit I-01-44).

| Description                     | Amounts<br>Requested<br>Table Ex.E.1<br>(Applied-For<br>Costs from<br>Negotiated<br>Outcome) | Amounts Shown<br>in Table Ex.<br>E.T2.1<br>(Amount on<br>Change Order) | Variance<br>Amount | Variance Notes    |
|---------------------------------|--|--|--------------------|-------------------|
| COVID-19 Direct Costs           | \$22,687,695   | \$21,586,103   | \$1,101,592        | See note 1 below. |
| COVID-19 Productivity Losses    | \$89,014,073   | \$89,014,103   | (\$30)             | See note 2 below. |
| Wildfires                       | \$20,809,264   | \$20,809,264   | \$0                | No variance.      |
| Kama Cliffs                     | \$12,069,736   | \$12,069,736   | \$0                | No variance.      |
| White Lake Narrows              | \$4,830,039  | \$3,961,420  | \$868,619          | See note 3 below. |
| ROW Delays                      | \$10,553,021   | \$10,133,021   | \$420,000          | See note 4 below. |
| Changes in Water Body Crossings | \$0  | \$0  | \$0                | No variance (N/A) |
| Changes to Foundations          | \$0  | \$0  | \$0                | No variance (N/A) |
| Structure Work Inefficiency     | \$0  | \$0  | \$0                | No variance (N/A) |
| General Delay                   | \$0  | \$0  | \$0                | No variance (N/A) |
| Carrying Costs from Quanta      | \$0  | \$0  | \$0                | No variance (N/A) |
| TOTAL                           | \$159,963,828  | \$157,573,647  | \$2,390,181        |                   |

**Variance Note 1**: As explained in footnote 1 of Exhibit E to the Application (page 12), the difference in the amounts shown is due to costs that UCT 2 directly incurred (not the EPC

Contractor) for additional First Nation consultation and participation costs concerning COVID-19 safety measures.

**Variance Note 2**: The \$30.00 reduction is the result of a typographical error in Table Ex.E.1 (and Table Ex.C.1). The stated amount of \$13,864,978 for 15% Valard markup and 3% Supercom Fees should be corrected to read \$13,865,008, which is the amount reflected in the executed Change Order with the EPC Contractor. See Application, Ex. E, Tab 2. The calculations are shown below:

#### **COVID-19 Mitigation & Productivity Loss Costs:**

| Added Labour Costs                      |          | \$40,935,560        |
|---|----------|---------------------|
| Added Equipment Costs                   |          | \$26,249,568        |
| Added Travel, LOA, and Camp Costs       |          | <u>\$7,963,967</u>  |
|   | Subtotal | \$75,149,095        |
|   |          |                     |
| 15% Valard markup and 3% Supercomm Fees |          | <u>\$13,865,008</u> |
|   | Total    | \$89,014,103        |

**Variance Note 3**: As explained in footnote 2 of Exhibit E to the Application (page 12), the difference in the amounts shown (\$868,619) is due to costs that UCT 2 directly incurred to mitigate and accommodate potential impacts to Pic Mobert First Nation. These costs were not part of the Contractor negotiations and were excluded from the Contractor Change Orders. These additional amounts are included in the White Lake Narrows applied-for CCVA cost category as described in Exhibit D, Tab 1.

**Variance Note 4**: As explained in footnote 3 of Exhibit E to the Application (page 12), the difference in the amounts shown (\$420,000) is due to costs that UCT 2 directly incurred for First Nation incremental monitoring and consultation costs, as explained further in Exhibit D, Tab 1. These costs were not part of the Contractor negotiations and were excluded from the Contractor Change Orders.

#### Reference:

1. Exhibit E-Tab 2

#### Interrogatory:

Scope Change Order #6 refers to SDN#00037: Current out-of-scope costs associated with the Kama Cliffs access restrictions and helicopter program scope changes and SDN #00038: Current out-of-scope costs as a result of MNRF Forest Fire Emergency Area Order Force Majeure Event.

Please provide copies of SDN #00037 and SDN #00038.

#### Response:

Copies of Scope Deviation Notice ("SDN") #00037 and SDN #00038 are included as Attachment 1 and 2 to this Response (Exhibit I-02-11 Attachments 1 & 2).

As outlined in the Contract Change Order Process flowchart attached to the EPC Contract as Ex. V-2 (filed as part of SEC IR-6, Exhibit I-05-06 Attachment 1), the Contractor's submittal of an SDN is the first step in the process of proposing and reviewing work that falls outside of the parameters of the EPC Contract. The Contractor must create an SDN to notify UCT 2 of any work to be performed outside of the EPC Contract. Each SDN is then uploaded to UCT 2's project management software, where it proceeds through the review process outlined in Ex. V-2. If an SDN is approved by UCT 2's project management team, a Scope Change Order is created.

#### Reference:

1. Exhibit E-Tab 2

#### Interrogatory:

Scope Change Order #7 refers to several Deviation Notices (SDNs) related to additional Scope of Work.

Please provide copies of SDN #00033, SDN #00039, SDN #00042, SDN #00043, SDN #00040, SDN #00047, SDN #00048, SDN #0-0049, SDN #00050, and SDN #00051.

#### Response:

The requested SDN copies are attached hereto as Exhibit I-02-12 Attachments 1-10 as follows:

- SDN #00033: Attachment 1
- SDN #00039: Attachment 2
- SDN #00042: Attachment 3
- SDN #00043: Attachment 4
- SDN #00040: Attachment 5
- SDN #00047: Attachment 6
- SDN #00048: Attachment 7
- SDN #00049: Attachment 8
- SDN #00050: Attachment 9
- SDN #00051: Attachment 10

Please note that SDN #00033, SDN #00039, SDN #00042 and SDN #00043 are unrelated to and excluded from the capital expenditure approvals requested this Application. Expenditures in these SDNs were included in the rate base approved by the Board in EB-2020-0150.

Please also see UCT 2's Response to Staff IR-53 (Exhibit I-01-53). Please see UCT 2's Response to AMPCO IR-11 (Exhibit I-02-11) for an explanation of the SDN creation and resulting change order process.

|---|--|--|--|--|--|--|
| CONTRACT CHANGE: (Detail)   |  | Amount<br>(Circle Credits)   |  |  |  |  |
| This Scope Change Order No. [], effective September 20, 2021, is issued to amend the Engineering, Procurement and Construction Agreement for 230 kV transmission facilities to be located in the Province of Ontario (the "Project") between NextBridge Infrastructure LP ("Owner") and Valard Construction LP ("Contractor") dated December 5, 2021 (the "Agreement") as specified below. The initial capitalized terms used herein, unless otherwise defined in this Scope Change Order, shall have the meanings ascribed to them in the Agreement.   |  |  |  |  |  |  |
| The Agreement identified that the Contractor was to have conventional access to the tower sites (B149 to B158) located in the area known as the Kama Cliffs. The Owner and Contractor jointly sought permission from the Ministry of the Environment, Conservation and Parks ("MECP") to allow conventional access in accordance with the initial Project design documents. The MECP issued a letter dated July 27, 2020 refusing to provide approval for conventional access to the Kama Cliffs, necessitating changes to the Project, procurement and construction work, inclusive of a newly required helicopter program (the "Kama Cliffs Changed Work"). |  |  |  |  |  |  |
| The totality of the Kama Cliffs Changed Work has not y<br>Changed Work is currently estimated at \$9,091,760, as of<br>provide a payment to the Contractor in the amount of \$9,0   | letailed in Appendix A. This Change Order is t   |  |  |  |  |  |
| It is expressly agreed that the Contractor and the Owner will use best efforts to confirm the total value of the Kama Cliffs Changed Work prior to Final Acceptance and perform a contract reconciliation to reflect the difference between that value and Change Order Payment.  |  |  |  |  |  |  |

### Overview

As part of the approval of the Overall Benefit Permit (OBP), the creation of habitat for northern myotis, little brown myotis, and eastern smallfooted myotis, specific to maternity roost habitat were created as per the Pennsylvania Game Commission Eastern Small-Footed Myotis Roost Structure guide.

numerous interior cavities and crevices. The core was covered with exterior composed of multiple layers of large, flat rock of varying sizes. The piles were rock core measuring of a minimum of 10 feet wide and 5 feet tall, consisting of 1-foot by 1-foot angular rock to create The clean rock was used for both the interior and exterior of the piles, and the shingling of the exterior rock was completed to keep They were carefully placed to maximize the creation of 1 to 2-inch crevices between shingled rocks.

## Rock Pile Placement

precipitation and organic material out of the piles.

(135° to 270°). The piles were placed close to forested and or early successional habitat to provide cover and travel corridors for emerging The rock piles were placed where they will receive sunlight for the majority of the day, the exposures are ranging from southeast to west bats. Rock piles were placed in open areas where bats can travel considerable distances before reaching cover to avoid high risk for predation. The roost structures have a basal diameter of 6-9 m, height of 2-3 m, and side slopes of 2:1.

Roosts were placed at the edge of the right-of-way on the eastern side for proper solar exposure. The habitats are also within  $\lambda$ -mile proximity to perennial sources of larger wetlands/bodies of water.

**OEWTL - BAT HABITAT** 

## Bat Habitat Location

All OEWTL bat habitats locations were approved by Northern Bioscience, below are the following locations;

Filed: 2024-02-05 EB-2023-0298 EAhibit 1 Tab 2 Schedule 12 Attachment 1 Page 7 of 28

**OEWTL - BAT HABITAT** 

### Bat Roost 1

- Near F165 -100 m southeast of Magpie River. Mapped wetlands are present 325 m southwest and 360 m northwest of the roost structure.
  - UTM: 16 N 162191 5312737

uth/Bearing: 329° N31W 5849mils True (±20°) ¢tion Angle: -08.4° tion: 16 N 662191 5312737 (±16.4ft) ude: 814ft (±13.1ft) zon Angle: +00.6' 65 final product Im: WGS-84 m: 1.0X

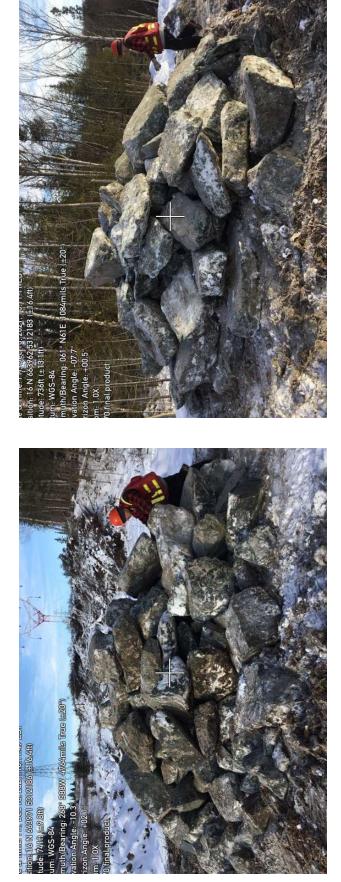

Core Formation

# **OEWTL - BAT HABITAT**

### Bat Roost 2

- Near F170 -75 m south of wetland (identified via aerial imagery) and Wawa Creek. Wawa Creek is also 135 m west of roost structure.
  - UTM: 16 N 663962 5312183

Core Formation

## Bat Roost 3

- Near F175: 50 m south of Trout Creek and 305 m north of a mapped wetland. Roost structure 3 is also 1.9 km west of BH0171
- UTM: 16 N 663962 5312183

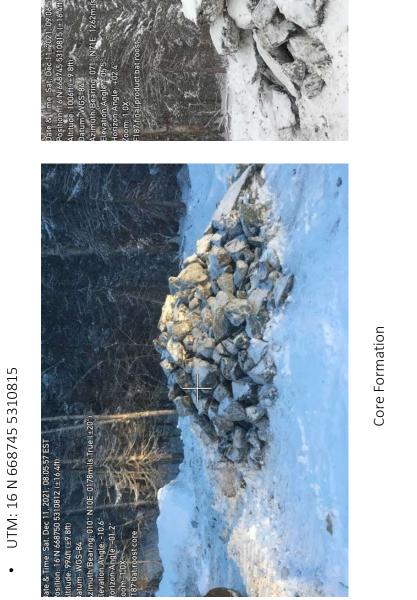

**Final Formation** 

**Core Formation** 

## Bat Roost 4

Near F187: 75 m west of an unnamed mapped watercourse, 95m south of a wetland (identified via aerial imagery), and 110 m west of a mapped wetland. Roost structure 4 is 1.7 km southeast of BH0171 and 9.7 km south of BH-Ref032.

# **OEWTL - BAT HABITAT**

## Bat Roost 5

- Near F216: 50 m north of an unnamed mapped waterbody
  - UTM: 16 N 678624 5308386

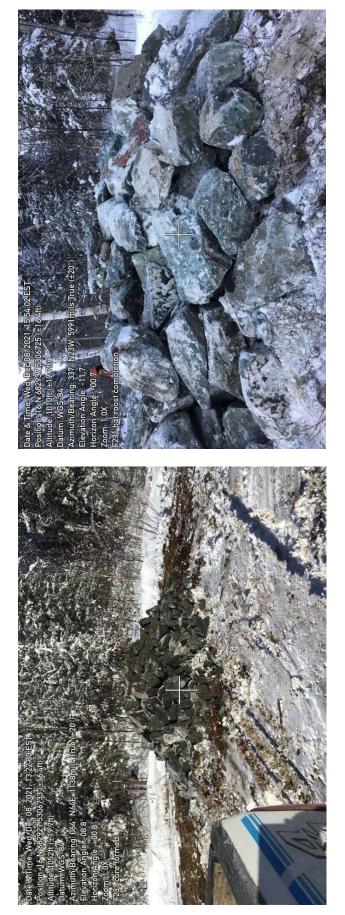

Core Formation

# **OEWTL - BAT HABITAT**

## Bat Roost 6

- Near F231: within 100m south of Anjigami River.
  - UTM: 16 N 682937 5306725

# Record Editor Record Information

Record Number: SDN-00043

Title: Chapman Timber Work

Project Name: Ontario East-West Tie

Project Number: PR-00441

PO Summary

Purchase Order No.: 2000256370

Vendor Name: Valard

ISC Lead: Robert Conklin

Status: Archived Creator: Talha Ayyaz

Creation Date: 03/09/2022 03:26 PM (UTC-5)

Project Phase: Diligencing

EPC Project Manager: Jeff Damen

Current PO Amount: \$521,588,553.69

Deviation Amount: \$105,560.00

Proposed PO Amount: \$521,694,113.69

**Deviation Summary** 

Deviation No.: 41

Deviation Type: Quantity - Firm Fixed Lump Sum

Cause: Other

Other (Specify): Additional Scope

Responsible Group: Construction

Hi Talha

See below. Can you please help to get these 2 invoices paid and submitted through unifier?

thanks

Betty Moghrabi, PMP | Project Manager | Valard Construction Mobile: 204.296.8530 | Fax: 780.577.9193 | Email: <u>bmoghrabi@valard.com</u> | <u>www.valard.com</u> | <u>wwwwwwww</u> | <u>www.valard.com</u> | <u>wwww.valard.com</u> | <u>www.valard.com</u> | www.valard.com | www.valard.com | w

[EXTERNAL]

Good afternoon Betty,

As discussed on last week's construction call, can you please move forward and pay the two attached invoices from Chapman. This is for the timber work they completed as requested by MFN.

You can proceed and add this as a deviation into Unifier as well.

Regards,

Jeff Damen Sr. Project Manager Engineering & Construction NextEra Energy Canadian Cell – (548)-388-2891 U.S Cell – (561) 685 6554 Office – (705) 230 6091

in detail in Appendix A.

As NextBridge is aware, it was determined to be beneficial to the Project to purchase testing and training equipment. The benefit of having this equipment and potentially preventing an outbreak is unmeasurable. The cost of this as outlined on Appendix A.

Additional testing costs were incurred to complete on site COVID-19 Testing and Vaccinations in accordance with the agreed Project Coronavirus Management Plan / Pandemic Protocol. The full quantification of these costs is included in Appendix A.

Specific governmental guidelines were put into place in regard to social distancing. This included restrictions when travelling in vehicles, and as such, Valard required additional vehicles which were provided for the Project. This cost is quantified and outlined on Appendix A.

## Subcontractor Costs

Subcontractors were willing to proceed with work in accordance with the new site COVID-19 procedures and new governmental regulation, however, had their own costs. Subcontractor costs are outlined in Appendix A.

## Security and Camp Operations

Key to proceeding with work during the pandemic was restriction of site access. To do this properly, the Project site needed to be secure, sanitary and self-sufficient. There are additional costs with security, cleaning costs and catering outlined below and further detained in Appendix A.

## Quarantine / Self-Isolation

Canadian, provincial and municipal governments all created regulation surrounding the pandemic. The same included mandatory self-isolation periods. In order to ensure compliance with government instruction, and consistent with our organizations' emphasis on safety, Valard strictly enforced quarantine of its workers. During quarantine, workers were paid LOA. Furthermore, while an employee was in isolation, his or her equipment (primarily work vehicle) was unable to be utilized. These costs are quantified in Appendix A.

Travel Costs

The pandemic has had a drastic impact on the commercial flight market. Valard leadership directed to our travel team to take all efforts available to secure favorable prices, however, there nonetheless was a drastic increase in flight costs incurred for the Project during the pandemic. Valard has calculated the loss due to the increased costing of travel during the pandemic.

## EXHIBIT V-1 FORM OF SCOPE CHANGE ORDER

| Contractor: Title: Date:<br>Valard Construction, LP Ontario East-West Transmission Project   | 6/30/2022                  |
|--|----------------------------|
| CONTRACT CHANGE: (Detail) See below  | Amount<br>(Circle Credits) |
| This Scope Change Order No. 13, effective June 30, 2022, is issued to amend the Engineering,<br>Procurement and Construction Agreement for 230 kV transmission facilities to be located in the Province<br>of Ontario (the "Project") between NextBridge Infrastructure LP ("Owner") and Valard Construction LP<br>("Contractor") dated December 5, 2017 (the "Agreement") as specified below. The initial capitalized<br>terms used herein, unless otherwise defined in this Scope Change Order, shall have the meanings ascribed<br>to them in the Agreement.  |                            |
| At the beginning of 2020 the world, including Ontario, began to experience unprecedented disruptions associated with the COVID-19 virus. As concerns grew over the rapid spread of this contagious and dangerous disease, the World Health Organization declared the COVID-19 virus a pandemic on March 11, 2020. On March 12, 2020, Valard provided notice to NextBridge that the pandemic was going to severely impact the ability to complete the Project, with the understanding that the impact to schedule and cost could not be predicted or known at that time.  |                            |
| As the COVID-19 pandemic persisted through the entire construction period, the remainder of the Project has been completed in an unpredictable environment with periodic work stoppages, re-mobilizations and the implementation of new and unparalleled safety protocols. Municipalities and First Nation communities have been declaring a state of emergency. Government agencies were providing ongoing instructions and directions designed to protect the workforce by curbing the spread of COVID-19. Specific to Ontario, a state of emergency was declared under the Emergency Management and Civil Protection Act, which resulted in working inefficiencies for the Contractor.  |                            |
| Assessing Valard's loss of productivity on this Project relied on both reviewing the actual impacts observed on the Project, as well as academic and industry studies. Determining a loss of productivity requires looking at two factors:   |                            |
| <ul> <li>a) Mitigation Tracking: lost time due to employees being diverted from normal construction related activities to pandemic related activities. In other words, lost time as a result of having to perform additional unplanned COVID-19 related tasks.</li> <li>b) Work Inefficiency: the loss of productivity for the workers while actually performing work tasks (the quantification of the reduction in direct work productivity resulting from factors such as social distancing, staggered shifts, reduced crew sizes, use of increased personal protective equipment, related job site regulations, extra mobilizations/demobilizations, work fatigue from anxiety and excess absenteeism, and altered delivery of materials).</li> </ul> |                            |
| Both of these factors were clearly present on this Project. Academic and industry studies suggest that having these factors presents should lead to an overall productivity loss falling within the range of 18.1% and 31.4%. Compensation will be quantified by applying a negotiated percentage of 24.7% loss of efficiency factor (the "Loss of Productivity Percentage"). It does not address any loss of inefficiency resulting from non-linear sequencing of work, or necessary modifications to the Project schedule. This amounts to a total increase in the Contract Price of <u>\$89,014,103</u> .   | \$89,014,103               |
| Contract Start Date:December 5, 2017Total Authorized Amount<br>This Scope Change OrderContract Completion Date:March 12, 2022(CAD)   | \$89,014,103               |
