Notice of Rate Hearing

24 May 2024

Tillsonburg Hydro Inc. has applied to change its electricity distribution rates.

- [View Notice](#)

If [the application](#) is approved as filed, a typical residential customer and a typical general service customer of Tillsonburg Hydro Inc. would see the following increase:

- Residential (750 kWh) \$5.79 per month
- General Service <50kW (>2,000 kWh) \$0.00 per month

Other customers, including businesses, will also be affected. It's important to review the application carefully to determine whether you may be affected by the proposed changes.

There are three types of OEB hearings: oral, electronic and written. The applicant has applied for, and the OEB plans to proceed with, a written hearing. If you think a different hearing type is needed, you can write to us to explain why.

The OEB has initiated a pilot process aimed at reducing the regulatory burden associated with filing and reviewing major rate applications for very small utilities (i.e., electricity distributors with fewer than 5,000 customers).¹ The applicant has requested that its application be subject to the pilot process, which would allow for a one-day meeting prior to discovery where Tillsonburg Hydro Inc., OEB staff, and approved intervenors would discuss the application and the possibility of skipping discovery and moving directly to a settlement conference. The OEB plans to proceed with the pilot process. If you think the application should not be subject to the pilot process, then you can write to us to explain why.

During this hearing, we will hear questions and arguments from participants about this case. We will also hear questions and arguments from participants that have registered as Intervenors. After the hearing, we will decide whether to approve the application.
