Issues:

Pollution Probe has been an active participant in ENGLP Gas Supply plan consultations and is in receipt of the 2024-2029 EPCOR Natural Gas Limited Partnership's (EPCOR) Annual Update to its natural gas supply plan (GSP) filed in this proceeding. The issues of focus are those outlined in the Report of the

Ontario Energy Board: Framework for the Assessment of Distributor Gas Supply Plans, specifically, Cost-effectiveness, Reliability and Security of Supply and Public Policy (e.g. RNG, DSM and related GSP issues). This consultation will have a direct impact on consumers and policy implications including economic, environmental and other policy factors.

Policy Interests:

The issues under the Report of the Ontario Energy Board: Framework for the Assessment of Distributor Gas Supply Plans are noted in section 3. Pollution Probe is interested to ensure that the Gas Supply Plan adequately balances economic (e.g. Ratepayer) and policy implications while ensuring it does not hinder the effective and efficient transition to a lower carbon energy economy.

Hearings:

Pollution Probe has previously recommended that the OEB consider future amendments to the annual process related to Gas Supply Plan reviews which could impact the format in the future. However, this specific proceeding is a consultation and a written process is advised.

Evidence:

N/A

Coordination with Other Intervenors:

Pollution Probe has been an active and valuable participant in OEB proceedings and consultations and will continue to coordinate its activities, where appropriate, with other parties which represent consumer, industry, municipal and environmental interests in Ontario.

Cost Awards:

Pollution Probe respectfully requests your acceptance of this request to participate and confirmation that it will be eligible for its costs.

Pollution Probe is a not-for-profit charitable organization. We receive individual donations as well as funding for consumer and research projects, such as on community energy planning, and regulated utility innovation from a variety of public and private sources. Without the prospect of an award of costs, Pollution Probe's ability to participate in the consultation process would not be possible.
