EPCOR NATURAL GAS LIMITED PARTNERSHIP- AYLMER

**Application for quarterly rate adjustment mechanism commencing
July 1, 2024**

By Delegation, Before: Theodore Antonopoulos
Vice President
Major Applications

June 25, 2024

INTRODUCTION AND PROCESS

EPCOR Natural Gas Limited Partnership (EPCOR) filed an application with the Ontario Energy Board (OEB) on June 12, 2024, for an order approving just and reasonable rates and other charges for the sale of natural gas commencing July 1, 2024 for its Aylmer service area (the Application). The purpose of the Application is to set rates to pass-through to customers the market price of the natural gas commodity. EPCOR does not make a profit on the sale of the natural gas commodity to its customers.

The Application was made pursuant to section 36(1) of the *Ontario Energy Board Act, 1998* and in accordance with the Quarterly Rate Adjustment Mechanism (QRAM) established by the OEB for dealing with changes in natural gas costs.¹

EPCOR provided written evidence in support of the proposed changes. EPCOR provided the Application to all parties of record in EPCOR Aylmer's last major rates proceeding.²

Parties and OEB staff wishing to file comments on the Application were required to file these comments with the OEB by June 17, 2024. On June 13, 2024, OEB staff requested that EPCOR explain the change in price (\$/m³) in the Enbridge Gas line of schedule 6 of the Application between 2024 and 2025.

In its response filed on June 14, 2024³, EPCOR stated that the price (\$/m³) in the Enbridge Gas line of schedule 6 of the Application includes rate rider revenue adjustments effective in 2025 as included in Enbridge Gas's July 2024 QRAM application.⁴

FINDINGS

The OEB approves the Application as filed.

The QRAM is intended to strike a balance between ensuring that consumers are receiving appropriate price signals which reflect natural gas market prices, and protecting the interest of consumers that purchase their gas from the distributor by reducing, to some extent, the volatility in the price of natural gas. Natural gas commodity prices charged by EPCOR are based on:

¹ EB-2008-0106

² EB-2018-0336

³ EPCOR Response to OEB Staff Question, June 14, 2024

⁴ EB-2024-0166

- a market price forecast for the commodity over the next 12 months
- a true-up between actual and forecast commodity prices for prior periods as actual costs are passed on to customers without a mark-up.

EPCOR's Aylmer commodity rates will be adjusted effective July 1, 2024 to reflect an overall increase in forecast natural gas prices and the prospective recovery of the projected 12-month balances in the gas supply deferral accounts for the period ending June 2025.

EPCOR procures natural gas for its system gas customers in the Aylmer service territory from Enbridge Gas and local producers. EPCOR is itself a system gas customer of Enbridge Gas. As such, EPCOR pays Enbridge Gas in accordance with the rates that are approved in Enbridge Gas's own QRAM proceedings. In addition, the formula for the price paid to local producers takes into account Enbridge Gas's approved rates.

The OEB finds that the proposed gas commodity charge is set appropriately to reflect the change in the Purchased Gas Commodity Variance Account (PGCVA) reference price and the change in the recovery amount for inventory revaluation recorded in the Gas Purchase Rebalancing Account (GPRA). The PGCVA reference price is adjusted, effective July 1, 2024, based on: (a) the estimated accumulated balance in the account as of the end of March 2024; and (b) the forecasted cost of natural gas over the next 12-month period. The PGCVA reference price is set to bring the PGCVA balance to nearly zero over a 12-month period. The GPRA recovery amount is similarly set to bring the GPRA balance to nearly zero over a 12-month period.

The OEB notes that EPCOR has used the same heat value as has Enbridge Gas in its July 2024 QRAM application, in keeping with the June 4, 2024 Decision and Order of the OEB addressing errors made by EPCOR in previous QRAMs relating principally to its South Bruce service area.⁵

The total annual bill impact for a typical Aylmer residential customer who purchases their gas supply from EPCOR is an increase of approximately \$34 or 3.2%.

⁵ EB-2024-0124, Decision and Order, June 4, 2024. This was a proceeding on the OEB's own motion. The OEB confirmed that EPCOR should be using, in its QRAM applications for both the South Bruce and Aylmer service areas, the most up to date heat value from Enbridge Gas Inc.'s contemporaneous QRAM applications.

THE ONTARIO ENERGY BOARD ORDERS THAT:

1. The rates approved for EPCOR Natural Gas Limited Partnership's Aylmer service area as part of the Decision and Rate Order in EB-2024-0099, dated March 21, 2024, shall be superseded by the rates as provided in Appendix A to this Decision and Rate Order.
2. The rates approved shall be effective July 1, 2024 and shall be implemented in EPCOR Natural Gas Limited Partnership's first billing cycle commencing in July 2024.
3. The reference price for use in determining the amounts to be recorded in the Purchase Gas Commodity Variance Account (Account No.179-27) shall increase by \$0.019306 from the previous OEB-approved level of \$0.111208 to **\$0.130514** per m³ as shown in Schedule A of Appendix A of this Decision and Rate Order.
4. The balance in the Gas Purchase Rebalancing Account shall be prospectively cleared. The Gas Purchase Rebalancing Account recovery amount shall decrease by \$0.012275 from the previous OEB-approved level of \$0.036918 per m³ to **\$0.024643** per m³. The resulting gas commodity charge, inclusive of the system gas supply cost of \$0.000435, will increase from the previous OEB-approved level of 0.148561 per m³ to **\$0.155592** per m³ as indicated in Schedule A of Appendix A of this Decision and Rate Order.
5. EPCOR Natural Gas Limited Partnership shall notify its customers of the rate changes no later than the delivery of the first bill reflecting the new rates.

- e) Gas Supply Charge and System Gas Refund Rate Rider (if applicable) Schedule A
- f) Overrun Gas Charges:

Overrun gas is available without penalty provided that it is authorized by the company in advance. The company will not unreasonably withhold authorization.

If, on any day, the customer should take, without the company's approval in advance, a volume of gas in excess of the maximum quantity of gas which the company is obligated to deliver to the customer on such day, or if, on any day, the customer fails to comply with any curtailment notice reducing the customer's take of gas, then,

- (i) the volume of gas taken in excess of the company's maximum delivery obligation for such day, or
- (ii) the volume of gas taken in the period on such day covered by such curtailment notice (as determined by the company in accordance with its usual practice) in excess of the volume of gas authorized to be taken in such period by such curtailment notice,

as the case may be, shall constitute unauthorized overrun volume.

Any unauthorized firm overrun gas taken in any month shall be paid for at the Rate 3 Firm Delivery Charge in effect at the time the overrun occurs. In addition, the Contract Demand level shall be adjusted to the actual maximum daily volume taken and the Demand Charges stated above shall apply for the whole contract year, including retroactively, if necessary, thereby requiring recomputation of bills rendered previously in the contract year.

Any unauthorized interruptible overrun gas taken in any month shall be paid for at the Rate 1 Delivery Charge in effect at the time the overrun occurs plus any Gas Supply Charge applicable.

For any unauthorized overrun gas taken, the customer shall, in addition, indemnify the company in respect of any penalties or additional costs imposed on the company by the company's suppliers, any additional gas cost incurred or any sales margins lost as a consequence of the customer taking the unauthorized overrun volume.

2. In negotiating the Monthly Interruptible Commodity Charge referred to in 1(c)(ii) above, the matters to be considered include:

- a) The volume of gas for which the customer is willing to contract;
- b) The load factor of the customer's anticipated gas consumption, the pattern of annual use, and the minimum annual quantity of gas which the customer is willing to contract to take or in any event pay for;
- c) Interruptible or curtailment provisions; and
- d) Competition.

3. In each contract year, the customer shall take delivery from the company, or in any event pay for

it if available and not accepted by the customer, a minimum volume of gas as specified in the contract between the parties. Overrun volumes will not contribute to the minimum volume. The rate applicable to the shortfall from this minimum shall be 3.4003 cents per m³ for firm gas and 5.8681 cents per m³ for interruptible gas.

4. The contract may provide that the Monthly Demand Charge specified in Rate Section 1 above shall not apply on all or part of the daily contracted firm demand used by the customer during the testing, commissioning, phasing in, decommissioning and phasing out of gas-using equipment for a period not to exceed one year (the transition period). In such event, the contract will provide for a Monthly Firm Delivery Commodity Charge to be applied on such volume during the transition of 5.9678 cents per m³ and a gas supply commodity charge as set out in Schedule A, if applicable. Gas purchased under this clause will not contribute to the minimum volume.

⁽¹⁾ Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

⁽²⁾ The Federal Carbon Charge is only “applicable” to 20% of the natural gas volumes used by eligible greenhouses, reducing their effective Federal Carbon Charge rate.

Bundled Direct Purchase Delivery

Where a customer elects under this rate schedule to directly purchase its gas from a supplier other than EPCOR, the customer or their agent must enter into a Bundled T-Service Receipt Contract with EPCOR for delivery of gas to EPCOR.
