Information Return for Corporations Filing Electronically

- Do not send this form to the Canada Revenue Agency (CRA) unless we ask for it. We will not keep or return this form.
- Complete this return for every initial and amended T2 Corporation Income Tax Return electronically filed with the CRA on your behalf.
- By completing Part 2 and signing Part 3, you acknowledge that, under the federal Income Tax Act, you have to keep all records used to prepare your T2 Corporation Income Tax Return, and provide this information to us on request.
- Part 4 must be completed by either you or the electronic transmitter of your T2 Corporation Income Tax Return.
- Give the signed original of this return to the transmitter and keep a copy in your own records for six years.
- We are responsible for ensuring the confidentiality of your electronically filed tax information only after we have accepted your return.

T2 Corporation Income Tax Return

200

This form serves as a federal, provincial, and territorial corporation income tax return, unless the corporation is located in Quebec or Alberta. If the corporation is located in one of these provinces, you have to file a separate provincial corporation return.

All legislative references on this return are to the federal Income Tax Act and Income Tax Regulations. This return may contain changes that had not yet become law at the time of publication.

Send one completed copy of this return, including schedules and the General Index of Financial Information (GIFI), to your tax centre. You have to file the return within six months after the end of the corporation's tax year.

For more information see canada.ca/taxes or Guide T4012, T2 Corporation – Income Tax Guide.

*** Large corporations

- If the corporation is not associated with any corporations in both the current and previous tax years, the amount to be entered on line 415 is: (total taxable capital employed in Canada for the **prior** year **minus** \$10,000,000) x 0.225%.
- If the corporation is not associated with any corporations in the current tax year, but was associated in the previous tax year, the amount to be entered on line 415 is: (total taxable capital employed in Canada for the **current** year **minus** \$10,000,000) x 0.225%.
- For corporations associated in the current tax year, see Schedule 23 for the special rules that apply.

**** Enter the total adjusted aggregate investment income of the corporation and all associated corporations for each tax year that ended in the preceding calendar year. Each corporation with such income has to file a Schedule 7. For a corporation's first tax year that starts after 2018, this amount is reported at line 744 of the corresponding Schedule 7. Otherwise, this amount is the total of all amounts reported at line 745 of the corresponding Schedule 7 of the corporation for each tax year that ended in the preceding calendar year.

General Index of Financial Information (GIFI) – Additional Information

Corporation's name	Business number	Tax year-end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

- Corporations need to complete all parts of this schedule that apply and include it with their T2 return along with their other GIFI schedules.
- For more information, see Guide RC4088, General Index of Financial Information (GIFI), and Guide T4012, T2 Corporation Income Tax Guide.

Part 1 – Information on the person primarily involved with the financial information
Can you identify the person* specified in the heading of Part 1? 111 Yes X No If you answered no , go to Part 2.
Does that person have a professional designation in accounting?
Is that person connected** with the corporation?
* A person primarily involved with the financial information is a person who has more than a 50% involvement in preparing the financial information that the T2 return is based on. For example, if three persons prepared the financial information by doing respectively 30%, 30%, and 40% of the work, answer no at line 111. If they did respectively 10%, 20%, and 70% of the work, answer yes at line 111 and complete Part 1 by referring only to the third person.
** A person connected with a corporation can be: (i) a shareholder of the corporation who owns more than 10% of the common shares; (ii) a director, an officer, or an employee of the corporation; or (iii) a person not dealing at arm's length with the corporation.
┌ Part 2 – Type of involvement ────────────────────────────────────
Choose one or more of the following options that represent your involvement and that of the person referred to in Part 1:
Completed an auditor's report
Completed a review engagement report
Conducted a compilation engagement
Provided accounting services 303
Provided bookkeeping services 304
Other (please specify) 305
┌ Part 3 – Reservations ────────────────────────────────────
If you selected option 1 (300) or 2 (301) in Part 2 above, answer the following question:
Has the person referred to in Part 1 expressed a reservation?
That the percent country art is expressed a recent anison.
Part 4 – Other information ————————————————————————————————————
Were notes to the financial statements prepared? No
Did the corporation have any subsequent events? No X
Did the corporation re-evaluate its assets during the tax year?
Did the corporation have any contingent liabilities during the tax year?
Did the corporation have any commitments during the tax year?
Does the corporation have investments in joint venture(s) or partnership(s)?

General Index of Financial Information Notes to the financial statements

1. DESCRIPTION OF THE BUSINESS

Tillsonburg Hydro Inc. (the Entity), was incorporated provincially under the Business Corporations Act of Ontario on October 26, 2000. The Entity's principal business activity is to distribute electrical power to the residents of the Town of Tillsonburg in accordance with Section 144 of the Electricity Act, 1998. The Corporation operates under a licence issued by the Ontario Energy Board (OEB). The Corporation is regulated by the OEB and adjustments to the Corporation's distribution and power rates require OEB approval. The address of the Corporation's registered office is 200 Broadway Street, 2nd Floor, Tillsonburg, Ontario, N4G 5A7.

2. BASIS OF PRESENTATION

The Entity's financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the International Accounting Standards Board (IASB).

- (a) Approval of the financial statements

 The financial statements were approved by the Board of Directors on April 30,
 2024.
- (b) Basis of measurement

The financial statements have been prepared on a historical cost basis, unless otherwise stated.

These financial statements have been prepared using the accrual basis of accounting. The accrual basis of accounting recognizes revenue as it becomes available and measurable. Expenses are recognized as they are incurred and measurable as a result of the receipt of goods and services and the creation of a legal obligation to pay.

- (c) Functional and presentation currency
 These financial statements are presented in Canadian dollars, which is also the Entity's functional currency.
- (d) Subsequent events

The Entity has evaluated the events and transactions occurring after December 31, 2023 through April 30, 2024, when the Board approved the financial statements, and identified the events and transactions which required recognition in the Entity's financial statements.

The Ontario Energy Board Act (1998) (the Act) gave the Ontario Energy Board (OEB) powers and responsibilities to approve or set rates for the transmission and distribution of electricity, providing continued rate protection for electricity consumers, and ensuring that distribution companies fulfill obligations to connect and service customers. In its capacity to approve or set rates, the OEB has the authority to specify

regulatory accounts treatment that may differ from IFRS for enterprises operating in a non-rate regulated environment.

The Act provides for a competitive market in the sale of electricity in

addition to the regulation of the monopoly electricity delivery system in Ontario.

2. BASIS OF PRESENTATION (Continued)

Rate setting and industry regulation

(e) Rate setting and industry regulation (continued)
The OEB has regulatory authority over the electricity delivery sector. The
Act set out the Board's powers to issue a distribution license, which must be
obtained by any person owning or operating a distribution system under the
Act. The Act allows the Board to prescribe license requirements and
conditions to electricity distributors, which includes such considerations as
specified accounting records, regulatory accounting principles, separation of

General Index of Financial Information Notes to the financial statements

accounts for separate businesses, and filing requirements for rate setting purposes.

With the commencement of the open market, the Corporation purchases electricity from the Independent Electricity System Operator (IESO), at spot market rates and charges its customers unbundled rates. The unbundled rates include the actual cost of generation and transmission of electricity and an approved rate for electricity distribution. The cost of generation, transmission, and other charges such as connection are collected by Tillsonburg Hydro Inc. and remitted to the IESO. The Corporation retains the distribution charge on the customer hydro invoices. The OEB has the general power to include or exclude costs, revenues, losses, or gains in the rates of a specific period, resulting in a change in the timing of accounting recognition from that which would have applied in an unregulated Corporation. Such change in timing gives rise to the recognition of regulatory assets and liabilities. The Corporation's regulatory assets represent certain amounts receivable from future customers and costs that have been deferred for accounting purposes because it is probable that they will be recovered on future rates. In addition, the Corporation has recorded regulatory liabilities, which will represent amounts for expenses incurred in different periods than would be the case had the Corporation been unregulated. Specific regulatory assets and liabilities are disclosed in note 12. The Corporation's approved distribution rates include components for the

The Corporation's approved distribution rates include components for the recovery of distribution expenses, regulatory assets and liabilities, and a rate of return on capital assets.

Rate setting - Distribution revenue

The Corporation is required to file a "Cost of Service" ("COS") rate application every five years, unless approved for a deferral, under which the OEB establishes the revenues required to recover the forecasted operating and capital expenditures to support the Corporation's business. The Corporation estimates usage and the costs to service each customer class in order to determine the appropriate rates to be charged by each customer class. The COS rate application is reviewed by the OEB and any registered interveners. Rates are approved based upon the review of evidence and information, including any revisions resulting from that review.

In the intervening years an Incentive Rate Mechanism application (IRM) is filed. An IRM application results in a formulaic adjustment to distribution rates that were set under the last COS rate application. The previous year's rates are adjusted for the annual change in the Gross Domestic Product Implicit Price Inflator for Final Domestic Demand ("GDP IPI FDD") net of a productivity factor and a "stretch factor" determined by the relative efficiency of an electricity distributor.

2. BASIS OF PRESENTATION (Continued)

(e) Rate setting and industry regulation (continued)
As a licensed distributor, the Corporation is responsible for billing
customers for electricity generated by third parties and the related costs of
providing electricity service, such as transmission services and other
services provided by third parties. The Corporation is required, pursuant to
regulation, to remit such amounts to these third parties, irrespective of
whether the Corporation ultimately collects these amounts from customers.
In 2022, the Corporation submitted an Incentive Rate-setting Mechanism (IRM)
application to the OEB for 2022 Electricity Distribution rates. On March 23,
2023, the Corporation received a decision from the OEB that approved changes
to rates that the Corporation charges for electricity distribution, to be
effective May 1, 2023.

Rate setting - Electricity rates

General Index of Financial Information Notes to the financial statements

The OEB sets electricity prices for certain low volume consumers twice per year (May and November) based upon an estimate of how much it will cost to supply the province with electricity in the coming year (Regulated Price Plan). Remaining customers will pay either the market price for electricity or the contracted price for electricity if they have enrolled with a retailer. The Company is billed for the cost of the electricity that its customers use and passes this cost on to its customers without a markup. In 2021, the OEB adjusted the Regulated Price Plan in response to the Government issued Emergency Orders under the Emergency Management and Civil Protection Act to assist Ontarians who were forced to stay home due to the COVID-19 pandemic.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all years presented in these financial statements.

- (a) Cash and cash equivalents
- Cash and cash equivalents consist of overnight deposits at a Canadian chartered bank
- (b) Revenue recognition
- Sale and distribution of electricity

Revenues from energy sales and electricity distribution are recorded on the basis of cyclical billings and include estimates of customer usage since the last meter reading to the end of the year (unbilled revenue). The Entity applies judgment to the measurement of the estimated consumption and to the valuation of the consumption.

Distribution revenue is recorded based on the approved OEB distribution rates to recover the costs of delivering electricity to customers. This revenue also includes revenue related to the collection of the rate riders approved by the OEB.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (b) Revenue recognition (continued)

Capital contributions

Developers are required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. The developer is not a customer and therefore the contributions are scoped out of IFRS 15 Revenue from Contracts with Customers. Cash contributions, received from developers are recorded as deferred revenue. When an asset other than cash is received as a capital contribution, the asset is initially recognized at its fair value, with a corresponding amount recognized as deferred revenue. The deferred revenue, which represents the Entity's obligation to continue to provide the customer access to the supply of electricity, is amortized to income on a straight-line basis over the useful life of the related asset.

Certain customers are also required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. These contributions fall within the scope of IFRS 15 Revenue from Contracts with Customers. The contributions are received to obtain a connection to the distribution system in order to receive ongoing access to electricity. The Entity has concluded that the performance obligation is the supply of the electricity over the life of the relationship with the customer which is satisfied over time as the customer receives and consumes the electricity. Revenue is recognized on a straight-line basis over the useful life of the related asset.

(c) Accounts receivable

Accounts receivable are recorded at the invoiced amount and overdue amounts

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

bear interest at rates approved by the OEB. The Corporation evaluated its allowance for doubtful accounts on its expected credit loss (ECL) model based on its historic credit loss experience. Accounts receivable are shown net of an allowance for doubtful accounts of \$176,833\$ (2022 - \$150,749).

(d) Unbilled revenue

Unbilled revenue is recorded based on an estimated amount for electricity delivered and not yet billed. The estimate is based on actual meter readings provided and analyzed by a meter demand management company. Actual unbilled revenue could vary based on actual meter reading dates and the fiscal year end.

(e) Inventory

Inventory consists of repair parts, supplies, and material held for future capital expansion and maintenance activities and is valued at the lower of cost and net realizable value, with cost being determined on an average cost basis. Items considered major spare parts are recorded as capital assets.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (f) Property, plant and equipment

Property, plant, and equipment (PP&E) are measured at cost or deemed cost established on the transition date. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use.

Parts of an item of property, plant, and equipment that have different useful lives are accounted for as separate items (major components) of property, plant and equipment.

When items of PP&E are retired or otherwise disposed of, a gain or loss on disposal is determined by comparing the proceeds from disposal, if any, with the carrying amount of the item and is included in profit or loss. The cost of replacing a part of an item in PP&E is recognized in the net book value of the item if it probable that the future economic benefits embodied within the part will flow to the Corporation and its cost can be measured reliably. In this event, the replaced part of the property, plant and equipment is written off, and the related gain or loss is included in profit or loss. The costs of the day-to-day servicing of PP&E are recognized in profit or loss as incurred.

The need to estimate the decommissioning costs at the end of the useful lives of certain assets is reviewed periodically. The Corporation has concluded it does not have any legal or constructive obligation to remove PP&E.

Depreciation is recognized in comprehensive income on a straight-line basis over the estimate useful life of each part or component of property, plant, and equipment. Land is not depreciated. Work in progress assets are not depreciated until the project is complete and the asset is available for use.

The estimated useful lives are as follows:

Distribution station equipment 40 years

Poles, towers, and fixtures 50 years

Overhead conductors 60 years

Overhead devices 40 years

Underground conduit 50 years

Underground conductors and devices 30 years

Transformers 40 years

Services overhead 50 years Services underground 40 years

Distribution meters 25 years

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

Smart meters 15 years
Computer hardware 5 years
Computer software 5 years

Depreciation methods, useful lives, and residual values are reviewed at each reporting period.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(g) Impairment

Property, plant, and equipment assets with finite lives are tested for recoverability at each reporting date to determine whether there is any indication of impairment. Any impairment is recognized in comprehensive income when the asset's carrying value exceeds its estimated recoverable

An impairment charge may be reversed only if there is objective evidence that a change in the estimate used to determine the asset's recoverable amount since the last impairment was recognized is warranted. A reversal of an impairment charge is recognized immediately in comprehensive income. After such a reversal, the depreciation charge, where relevant, is adjusted in future periods on a systematic basis over the asset's remaining useful life. The carrying amounts of the Entity s other non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset s recoverable amount is estimated. An impairment loss is recognized if the carrying amount of an asset exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss.

(h) Customer deposits

Deposits from electricity customers are cash collections to guarantee the payment of electricity bills. Interest is paid on customer deposits. Deposits are refundable to customers who demonstrate an acceptable level of credit risk as determined by the Corporation in accordance with policies set out by the OEB or upon termination of their electricity distribution service.

(i) Provisions

A provision is recognized if, as a result of a past event, the Entity has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefit will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(j) Deferred income taxes

Income taxes are reported using the deferred income taxes method, as follows: current income tax expense is the estimated income taxes payable for the current year after any refunds or the use of losses incurred in previous years, and deferred income taxes reflect:

the temporary differences between the carrying amounts of assets and liabilities for accounting purposes and the amounts used for tax purposes; the benefit of unutilized tax losses that will more likely than not be realized and carried forward to future years to reduce income taxes. Deferred income taxes are estimated using the rates enacted by tax law and those substantively enacted for the years in which deferred income taxes assets are likely to be realized, or deferred income tax liabilities settled. The effect of a change in tax rates on deferred income tax assets and liabilities is included in earnings in the period when the change is substantively enacted.

General Index of Financial Information Notes to the financial statements

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- Payment in lieu of corporate income taxes (k) Under the Electricity Act, the Corporation provides for payments in lieu of corporate income taxes, also referred to as income tax expense, using the tax liability method. Under the tax liability method, current income taxes payable are recorded based on taxable income. The Entity recognizes deferred tax assets and liabilities for future tax consequences of events that have been included in the financial statements or income tax returns. Deferred tax assets and liabilities are determined based on the difference between the carrying value and their respective tax basis, using tax rates enacted or substantially enacted by the statement of financial position date that are in effect for the year in which the differences are expected to reverse. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefits will be realized. The calculation of current and deferred taxes requires management to make certain judgments with respect to changes in tax interpretations, regulations, and legislation, and to estimate probable outcomes on the timing and reversal of temporary differences and tax authority audits of income tax. Rate-regulated accounting requires the recognition of regulatory balances and related deferred tax assets and liabilities for the amount of deferred taxes expected to be refunded or recovered from customers through future electricity distribution rates. A gross up to reflect the income tax benefits or liabilities associated with the revenue impact resulting from the the realization of deferred taxes is recorded within regulatory balances.
- Regulatory deferral account debit balances represent costs incurred in excess of amounts billed to the customer at OEB approved rates. These amounts have been accumulated and deferred in anticipation of their future recovery in electricity distribution rates. Regulatory deferral account credit balances

Regulatory deferral accounts

been accumulated and deferred in anticipation of their future recovery in electricity distribution rates. Regulatory deferral account credit balances represent amounts billed to the customer at OEB approved rates in excess of costs incurred by the Entity.

Regulatory deferral account debit balances are recognized if it is probable that future billings in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes. The offsetting amount is recognized in profit and loss. The debit balance is reduced by the amount of customer billings as electricity is delivered to the customer and the customer is billed at rates approved by the OEB for the recovery of the capitalized costs.

Regulatory deferral account credit balances are recognized if it is probable that future billings in an amount at least equal to the credit balance will be reduced as a result of rate-making activities. The offsetting amount is recognized in profit and loss. The credit balance is reduced by the amounts returned to customers as electricity is delivered to the customer at rates approved by the OEB for the return of the regulatory account credit balance. The probability of recovery or repayment of the regulatory account balances is assessed annually based upon the likelihood that the OEB will approve the change in rates to recover or repay the balance. Any resulting impairment loss is recognized in profit and loss in the year incurred.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (1) Regulatory deferral accounts (continued) Regulatory deferral accounts attract interest at OEB prescribed rates. In 2023 the rates were 4.73% (2022 0.57%) in quarter one, 4.98% (2022 1.02%)

General Index of Financial Information Notes to the financial statements

in quarter two, 4.98% (2022 - 2.20%) in quarter three and 5.49% (2022 - 3.87%) in quarter four.

(m) Intangible Assets

Intangible assets consist of a company website. Intangible assets are initially recorded at cost and subsequently measured at cost less accumulated depreciation and accumulate impairment (losses). Amortization is provided using the straight-line basis over 5 years.

(n) Measurement Uncertainty

The preparation of financial statements in conformity with IFRS requires management to make certain estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Such estimates are periodically reviewed and any adjustments necessary are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

Estimates are underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in these financial statements is included in the following notes:

- a) Note 3 Revenue recognition estimates of unbilled revenue
- b) Note 3 Accounts receivable allowance for impairment
- c) Note 3 Property, plant, and equipment, useful lives and the identification of significant components of property, plant, and equipment
 - d) Note 3, 12 Recognition and measurement of regulatory balances
- e) Note 14 Recognition of deferred tax assets availability of future taxable income against which deductible temporary differences and tax loss carryforwards can be used.

4. FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics, and the Entity s designation of such instruments. Settlement date accounting is used. Classification

Cash and cash equivalents Fair value through profit and loss (FVTPL)

Accounts receivable Amortized cost

Accounts payable and accrued liabilities Other financial liabilities

Due from/to related parties Other financial assets/liabilities

Current portion of customer deposits Other financial liabilities

Long-term debt Other financial liabilities

Non-current portion of customer deposits Other financial liabilities

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss. Amortized cost

Subsequent to initial recognition, loans and receivables are accounted for at amortized cost using the effective interest method.

Other financial liabilities

Subsequent to initial recognition, other financial liabilities are recorded at amortized cost using the effective interest method and include all

General Index of Financial Information Notes to the financial statements

financial liabilities, other than derivative instruments.

Effective interest method

The Entity uses the effective interest method to recognize interest income or expense which includes transaction costs or fees, premiums, or discounts earned or incurred for financial instruments.

Financial assets and liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Entity has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

4. FINANCIAL INSTRUMENTS (Continued)

Fair value measurements are established based on the following hierarchy that categorizes the inputs to valuation techniques:

- Level 1 Fair value measurement based on quoted prices (unadjusted)
- observable in active markets for identical assets or liabilities
- Level 2 Fair value measurement using inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3 Fair value measurement using inputs that are not based on observable market date (unobservable inputs)
- The fair values of cash and cash equivalents approximate their carrying amounts due to their short-term nature.

The following table presents the financial instruments recorded at fair value in the Statement of Financial Position, classified using the fair value hierarchy described above:

December 31, 2023 | Level 1 | Level 2 | Level 3 | Total financial assets and liabilities at fair valueFinancial assets | | | |

Cash and cash equivalents | 521,647 | - | - | 521,647

Total Financial Assets | 521,647 | - | - | 521,647

December 31, 2022 | Level 1 | Level 2 | Level 3 | Total financial assets and liabilities at fair valueFinancial assets | | | |

Cash and cash equivalents | 793,075 | - | - | 793,075

Total Financial Assets | 793,075 | - | - | 793,075

Impairment of financial assets

A financial asset is assessed using the lifetime expected credit losses (ECL) model to determine whether there is any objective evidence that it is impaired, using the simplified approach. This includes both quantitative and qualitative information and analysis, based on the Entity s historical experience, adjusted for forward-looking factors specific to the current credit environment.

The Entity measures the loss allowance at an amount equal to the lifetime ECL for accounts receivables or contract assets that result from transactions that are within the scope of IFRS 15, and do not contain a significant financing component. The Entity uses a provision matrix to measure the lifetime ECL of accounts receivable from individual customers which accounts for exposures in different customer classes.

If the amount of impairment loss subsequently decreases due to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through net income.

- 4. FINANCIAL INSTRUMENTS (Continued)
- (a) Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. The company is exposed to credit risk from customers. In order to reduce its credit risk, the company reviews a new

General Index of Financial Information Notes to the financial statements

customer's credit history before extending credit and conducts regular reviews of its existing customers' credit performance. The Corporation has a significant number of customers which minimizes concentration of credit risk. The Corporation's distribution revenue is earned on a broad base of customers principally located in Tillsonburg, with no single customer that accounts for revenue or accounts receivable balance in excess of 10% of the respective balance.

An allowance for doubtful accounts is established based upon factors surrounding the credit risk of specific accounts, historical trends, and other information. The carrying amount of accounts receivable is reduced through the use of the allowance. Subsequent recoveries of receivables previously provisioned are credited to profit or loss. The balance of the allowance for impairment at December 31, 2023 is \$176,833 (2022 - \$150,749). An impairment loss of \$60,000 (2022 - \$60,000) was recognized during the year.

The Entity invests in short-term investments, depending on cash flow availability, which are not considered a credit risk.

- (b) Liquidity risk
- Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Entity is exposed to this risk mainly in respect of its receipt of funds from its customers and other related sources, long-term debt, and accounts payable. The Entity monitors its liquidity risk to ensure access to sufficient funds to meet operational requirements.
- (c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency rate risk, interest rate risk, and commodity price risk. The Entity does not currently have any material commodity or foreign exchange risk. The Entity is exposed to fluctuations in interest rates as the regulated rate of return for the Entity s distribution business is derived using a complex formulaic approach which is in part based on the forecast for long-term Government of Canada bond yields. This rate of return is approved by the OEB as part of the approval of distribution rates.

(d) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. In seeking to minimize the risks from interest rate fluctuations, the company manages exposure through its normal operating and financing activities.

5. ACCOUNTS RECEIVABLE

| 2023 | 2022

Trade receivables | 1,894,560 | 1,829,499

Other receivables | 109,047 | 101,124

Allowance for doubtful accounts | (176,833) | (150,749)

| 1,826,774 | 1,779,874

6. INVENTORY

The amount of inventory consumed by the Corporation and recognized as an expense during the year was \$22,312 (2022 - \$21,890). An amount of \$Nil (2022 - \$Nil) was written down due to obsolescence.

- 7. RELATED PARTY TRANSACTIONS
- (a) Parent and ultimate controlling party
 As the Corporation of the Town of Tillsonburg (Town) is the sole shareholder
 of the Entity, the Entity and the Town are considered related parties.

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

```
Banking and accounting activities are administered by the Town on behalf of
Tillsonburg Hydro Inc. Amounts due from (to) related parties represent the
net working capital position between the Town and the Corporation. A Master
Service Agreement (MSA), which was updated in 2013, governs the financial
relationship between the Entity and the Town. These financial statements
reflect this MSA. This MSA was updated for the year beginning January 1, 2019
and was approved by both parties as of January 28, 2019. The costing
provisions set out in the agreement includes a fixed indirect fee of $140,000
(2022 - $140,000).
A summary of transactions between these related parties are as follows:
 | 2023 | 2022
Service based expenditures | |
Labour | 2,050,703 | 2,057,759
Fleet | 172,677 | 177,000
Rent | 150,000 | 150,000
Master service agreement | 140,000 | 140,000
| 2,513,380 | 2,524,759
 | 2023 | 2022
Service based sales | |
Hydro billings | 485,118 | 492,898
Capital projects | 132,488 | 111,386
| 617,606 | 604,284
7. RELATED PARTY TRANSACTIONS (Continued)
As disclosed the entity received $190,680 (2022 - $111,386) in funds related
to deposits on capital projects from the Town. These balances are included in
the Deposits in Aid of Construction balance on the statement of financial
position.
At year end outstanding balances due from (to) related parties was $817,749
(2022 - $2,496,386). Interest paid during the year on outstanding balances
amounted to 153,954.
The Entity also paid dividends to the Town of $275,000 (2022 - $200,000). The
amounts due to and from related parties are non-interest bearing and
unsecured if repaid in the following year. Amounts not paid within one year
(b) Key management personnel
They key management personnel of the Corporation have been defined as members
of the Board of Directors and the executive managerial team members:
The compensation paid or payable is as follows:
| 2023 | 2022
Salaries and benefits and directors' fees | 399,016 | 453,911
8. INTANGIBLE ASSETS
                                     2023

general security agreement as described in Note 11.
10.
      NET NON-UTILITY ACTIVITIES
The non-utility capital assets are comprised of solar powered equipment which
is not regulated by the OEB, these assets are fully amortized. The net
revenue generated from these assets is recorded in the non-utility activities.
11.
      LONG-TERM DEBT
```

During 2023, the Entity was approved to borrow \$8,500,000 for capital project

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

Notes to the financial statements at prime rate of interest less 0.65%. As of December 31, 2023, the Corporation had been advanced \$8,000,000 (2022 - \$5,000,000). The loan has interest only payments, TD Prime less 0.65% per annum, for two years after the final draw, which can be extended for one more year upon approved request. Full repayment is due upon contractual term maturity. As a result, the \$8,000,000 has been reflected in the financial statements as long-term debt. A general security agreement provides collateral for the loan. 12. REGULATORY ASSETS AND LIABILITIES The following expenses (recoveries) may be considered by the OEB in future rate applications and accordingly have been deferred until such time as direction is provided by the OEB. Regulatory assets | 2022 Balance (restated - Note 21) | Additions/ transfers | Recovery/ reversals | 2023 Balance Retail settlement variances | 1,422,269 | 175,674 | 163,991 | 1,761,934 Recovery of regulatory assets | 58,303 | 49,080 | - | 107,383 Deferred tax asset | 845,228 | 206,782 | - | 1,052,010 | 2,325,800 | 431,536 | 163,991 | 2,921,327 Regulatory assets | 2021 Balance | Additions/ transfers | Recovery/ reversals | 2022 Balance (restated - Note 21) Retail settlement variances | 1,348,219 | 74,050 | - | 1,422,269 Recovery of regulatory assets | 56,247 | 2,056 | - | 58,303 Deferred tax asset | 606,830 | 238,398 | - | 845,228 | 2,011,296 | 314,504 | - | 2,325,800 Regulatory liabilities | 2022 Balance (restated - Note 21) | Additions/ transfers | Recovery/ reversals | 2023 Balance Retail settlement variances | 76,872 | 166,749 | (1,335) | 242,286 Deferred costs | 92,294 | 20,464 | - | 112,758 Deferred tax asset | - | - | - | -| 169,166 | 187,213 | (1,335) | 355,044 Regulatory liabilities | 2021 Balance | Additions/ transfers | Recovery/ reversals | 2022 Balance (restated - Note 21) Retail settlement variances | 438,325 | (361,453) | - | 76,872 Deferred costs | 76,857 | 15,437 | - | 92,294 Deferred tax asset | - | - | - | -| 515,182 | (346,016) | - | 169,166 The retail settlement variance accounts represent the difference between the amount charged by the IESO based on the settlement invoice and the amount billed to customers using the OEB approved rates. The disposition of these amounts is expected to be reflected in future rate adjustments. The balance in the recovery of regulatory assets represents the amount that the OEB has considered final in prior applications and set a rate for recovery. The Entity continually assesses the likelihood of recovery of each of its regulatory assets and liabilities into the setting of future rates. If, at some future date, the Entity judges that it is no longer probable that the OEB will include a regulatory asset or liability in future rates, the appropriate carrying amount will be reflected in results of operations in the period that the assessment is made. 13. DEFERRED CONTRIBUTIONS Deferred customer contributions in aid of construction or acquisition of

property, plant, and equipment is as follows:

     CAPITAL MANAGEMENT
```

The Entity defines capital as shareholders' equity and long term debt. As at December 31, 2023, shareholders equity amounts to \$12,626,195 (2022 -\$12,370,738) and long term debt amounts to \$8,000,000 (2022 - \$5,000,000) The Corporation's objectives when managing capital are to ensure sufficient liquidity to supports its financial obligations and execute its operating and strategic plans; maintain financial capacity and access to capital to support future development of the business while taking into consideration current and future industry, market and economic risks and conditions; and utilize short-term funding sources to manage its capital requirements.

17. EXPENSES BY NATURE

General Index of Financial Information Notes to the financial statements

```
| 2023 | 2022

Contracted services - salaries and benefits | 1,309,675 | 1,289,587

Materials | 22,312 | 21,890

Contracted services | 524,422 | 476,238

Amortization | 853,797 | 789,938

Corporate charges | 518,860 | 622,400

Other | 1,018,643 | 675,617

| 4,247,709 | 3,875,670

18. PRUDENTIAL SUPPORT
```

Tillsonburg Hydro Inc. has posted a letter of credit with the Independent Electricity System Operator (IESO) in the amount of \$956,406 (2022 - \$956,406). The IESO is responsible for ensuring that prudential support is posted by all market participants to satisfy their prudential support and obligation and, therefore, mitigate the impact of an event of default by a market participant on the rest of the market.

19. REVENUE FROM CONTRACTS WITH CUSTOMERS

The Entity generates revenue primarily from the sale and distribution of electricity to its customers. Other sources of revenue include services ancillary to the electricity distribution, pole rentals, other regulatory services charges and capital contributions.

```
| | 2023
```

(i) General

The Company has entered into a lease agreement for the period of January 1, 2024 to May 31, 2027 for the location of 43 John Pound Road in Tillsonburg. Monthly lease costs for the first five months are \$3,400 with subsequent monthly lease costs increasing to \$11,153.

(ii) General Liability Insurance

The Corporation has obtained general liability and enhanced directors and officers insurance overage from the Municipal Electric Association Reciprocal Insurance Exchange (the MEARIE Group). The MEARIE is an insurance reciprocal whereby all members through the unincorporated group share risks with each other. Members of the MEARIE Group are assessed a premium deposit at policy execution. Should the group experience losses that are in excess of the accumulated premium deposits of its members combined with reserves and supplementary insurance, members would be assessed a supplementary or retro assessment on a pro-rata basis for the periods which the Corporation was a member.

21. COMPARATIVE FIGURES

The prior year's figures, provided for purposes of comparison, have been restated due to a comprehensive review completed of all Regulated Price Plan (RPP) related preliminary settlement claims with the IESO for the period of 2016-2022. A review of the past allocations of Class B RPP Global Adjustment

General Index of Financial Information Notes to the financial statements

to Cost of Power and the related calculations was also completed. A more precise method of determining RPP consumption was developed, improvements in preliminary settlements and changes to the allocation calculation were applied. These adjustments had no income statement impact but rather were a reallocation within the components of the regulatory asset and liability lines in the current year. In addition, during the current year the Company has changed the presentation of the regulatory assets and liabilities accounts to confirm to their ending account values rather than net settlement amounts. There is no change in the overall regulatory balance but rather the groupings of regulatory assets and liabilities have been updated over the prior year. The following outlines the impact of these adjustments: | 2022 Opening balance restatement | 2022 Opening balance grouping reallocation | 2022 Addition / transfer adjustment | Net impact to 2022 ending balancesRegulatory assets | | | | Retail settlement variances | (2,822,876) | 3,232,524 | (388,308) | 21,340 Recovery of regulatory assets | - | 40,722 | 695 | 41,417 Regulatory liabilities | | | Retail settlement variances | (2,822,876) | 3,261,201 | (361,453) | 76,872 Recovery of regulatory assets | - | 12,045 | (26,160) | (14,115)| - | - | - | -In addition, the prior year figures, provided for comparison, have been restated to correct the allocation of the net movement in regulatory balances. As a result, energy sales decreased by \$399,920, other income decreased by \$22,202, cost of power decreased by \$660,520 and net movement in regulatory balances decreased by \$238,398.1. DESCRIPTION OF THE BUSINESS

Tillsonburg Hydro Inc. (the Entity), was incorporated provincially under the Business Corporations Act of Ontario on October 26, 2000. The Entity's principal business activity is to distribute electrical power to the residents of the Town of Tillsonburg in accordance with Section 144 of the Electricity Act, 1998. The Corporation operates under a licence issued by the Ontario Energy Board (OEB). The Corporation is regulated by the OEB and adjustments to the Corporation's distribution and power rates require OEB approval. The address of the Corporation's registered office is 200 Broadway Street, 2nd Floor, Tillsonburg, Ontario, N4G 5A7.

2. BASIS OF PRESENTATION

The Entity's financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the International Accounting Standards Board (IASB).

- (a) Approval of the financial statements
- The financial statements were approved by the Board of Directors on April 26, 2024.
- (b) Basis of measurement

The financial statements have been prepared on a historical cost basis, unless otherwise stated.

These financial statements have been prepared using the accrual basis of accounting. The accrual basis of accounting recognizes revenue as it becomes available and measurable. Expenses are recognized as they are incurred and measurable as a result of the receipt of goods and services and the creation of a legal obligation to pay.

- (c) Functional and presentation currency
- These financial statements are presented in Canadian dollars, which is also the Entity's functional currency.
- (d) Subsequent events

Corporation's name	Business number	Tax year end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

The Entity has evaluated the events and transactions occurring after December 31, 2023 through April 26, 2024, when the Board approved the financial statements, and identified the events and transactions which required recognition in the Entity's financial statements.

(e) Rate setting and industry regulation
The Ontario Energy Board Act (1998) (the Act) gave the Ontario Energy Board
(OEB) powers and responsibilities to approve or set rates for the
transmission and distribution of electricity, providing continued rate
protection for electricity consumers, and ensuring that distribution
companies fulfill obligations to connect and service customers. In its
capacity to approve or set rates, the OEB has the authority to specify
regulatory accounts treatment that may differ from IFRS for enterprises
operating in a non-rate regulated environment.

The Act provides for a competitive market in the sale of electricity in addition to the regulation of the monopoly electricity delivery system in Ontario.

- 2. BASIS OF PRESENTATION (Continued)
- (e) Rate setting and industry regulation (continued)
 The OEB has regulatory authority over the electricity delivery sector. The
 Act set out the Board's powers to issue a distribution license, which must be
 obtained by any person owning or operating a distribution system under the
 Act. The Act allows the Board to prescribe license requirements and
 conditions to electricity distributors, which includes such considerations as
 specified accounting records, regulatory accounting principles, separation of
 accounts for separate businesses, and filing requirements for rate setting
 purposes.

With the commencement of the open market, the Corporation purchases electricity from the Independent Electricity System Operator (IESO), at spot market rates and charges its customers unbundled rates. The unbundled rates include the actual cost of generation and transmission of electricity and an approved rate for electricity distribution. The cost of generation, transmission, and other charges such as connection are collected by Tillsonburg Hydro Inc. and remitted to the IESO. The Corporation retains the distribution charge on the customer hydro invoices. The OEB has the general power to include or exclude costs, revenues, losses, or gains in the rates of a specific period, resulting in a change in the timing of accounting recognition from that which would have applied in an unregulated Corporation. Such change in timing gives rise to the recognition of regulatory assets and liabilities. The Corporation's regulatory assets represent certain amounts receivable from future customers and costs that have been deferred for accounting purposes because it is probable that they will be recovered on future rates. In addition, the Corporation has recorded regulatory liabilities, which will represent amounts for expenses incurred in different periods than would be the case had the Corporation been unregulated. Specific regulatory assets and liabilities are disclosed in note 12. The Corporation's approved distribution rates include components for the recovery of distribution expenses, regulatory assets and liabilities, and a

rate of return on capital assets.
Rate setting - Distribution revenue

The Corporation is required to file a "Cost of Service" ("COS") rate application every five years, unless approved for a deferral, under which the OEB establishes the revenues required to recover the forecasted operating and capital expenditures to support the Corporation's business. The Corporation estimates usage and the costs to service each customer class in order to determine the appropriate rates to be charged by each customer class. The COS

General Index of Financial Information Notes to the financial statements

rate application is reviewed by the OEB and any registered interveners. Rates are approved based upon the review of evidence and information, including any revisions resulting from that review.

In the intervening years an Incentive Rate Mechanism application (IRM) is filed. An IRM application results in a formulaic adjustment to distribution rates that were set under the last COS rate application. The previous year's rates are adjusted for the annual change in the Gross Domestic Product Implicit Price Inflator for Final Domestic Demand ("GDP IPI FDD") net of a productivity factor and a "stretch factor" determined by the relative efficiency of an electricity distributor.

- 2. BASIS OF PRESENTATION (Continued)
- (e) Rate setting and industry regulation (continued)
 As a licensed distributor, the Corporation is responsible for billing
 customers for electricity generated by third parties and the related costs of
 providing electricity service, such as transmission services and other
 services provided by third parties. The Corporation is required, pursuant to
 regulation, to remit such amounts to these third parties, irrespective of
 whether the Corporation ultimately collects these amounts from customers.
 In 2022, the Corporation submitted an Incentive Rate-setting Mechanism (IRM)
 application to the OEB for 2022 Electricity Distribution rates. On March 23,
 2023, the Corporation received a decision from the OEB that approved changes
 to rates that the Corporation charges for electricity distribution, to be
 effective May 1, 2023.

Rate setting - Electricity rates

The OEB sets electricity prices for certain low volume consumers twice per year (May and November) based upon an estimate of how much it will cost to supply the province with electricity in the coming year (Regulated Price Plan). Remaining customers will pay either the market price for electricity or the contracted price for electricity if they have enrolled with a retailer. The Company is billed for the cost of the electricity that its customers use and passes this cost on to its customers without a markup. In 2021, the OEB adjusted the Regulated Price Plan in response to the Government issued Emergency Orders under the Emergency Management and Civil Protection Act to assist Ontarians who were forced to stay home due to the COVID-19 pandemic.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all years presented in these financial statements.

- (a) Cash and cash equivalents
- Cash and cash equivalents consist of overnight deposits at a Canadian chartered bank
- (b) Revenue recognition

Sale and distribution of electricity

Revenues from energy sales and electricity distribution are recorded on the basis of cyclical billings and include estimates of customer usage since the last meter reading to the end of the year (unbilled revenue). The Entity applies judgment to the measurement of the estimated consumption and to the valuation of the consumption.

Distribution revenue is recorded based on the approved OEB distribution rates to recover the costs of delivering electricity to customers. This revenue also includes revenue related to the collection of the rate riders approved by the OEB.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

General Index of Financial Information Notes to the financial statements

(b) Revenue recognition (continued)

Capital contributions

Developers are required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. The developer is not a customer and therefore the contributions are scoped out of IFRS 15 Revenue from Contracts with Customers. Cash contributions, received from developers are recorded as deferred revenue. When an asset other than cash is received as a capital contribution, the asset is initially recognized at its fair value, with a corresponding amount recognized as deferred revenue. The deferred revenue, which represents the Entity's obligation to continue to provide the customer access to the supply of electricity, is amortized to income on a straight-line basis over the useful life of the related asset.

Certain customers are also required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. These contributions fall within the scope of IFRS 15 Revenue from Contracts with Customers. The contributions are received to obtain a connection to the distribution system in order to receive ongoing access to electricity. The Entity has concluded that the performance obligation is the supply of the electricity over the life of the relationship with the customer which is satisfied over time as the customer receives and consumes the electricity. Revenue is recognized on a straight-line basis over the useful life of the related asset.

(c) Accounts receivable

Accounts receivable are recorded at the invoiced amount and overdue amounts bear interest at rates approved by the OEB. The Corporation evaluated its allowance for doubtful accounts on its expected credit loss (ECL) model based on its historic credit loss experience. Accounts receivable are shown net of an allowance for doubtful accounts of \$176,833 (2022 - \$150,749).

(d) Unbilled revenue

Unbilled revenue is recorded based on an estimated amount for electricity delivered and not yet billed. The estimate is based on actual meter readings provided and analyzed by a meter demand management company. Actual unbilled revenue could vary based on actual meter reading dates and the fiscal year end.

(e) Inventory

Inventory consists of repair parts, supplies, and material held for future capital expansion and maintenance activities and is valued at the lower of cost and net realizable value, with cost being determined on an average cost basis. Items considered major spare parts are recorded as capital assets.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(f) Property, plant and equipment

Property, plant, and equipment (PP&E) are measured at cost or deemed cost established on the transition date. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use.

Parts of an item of property, plant, and equipment that have different useful lives are accounted for as separate items (major components) of property, plant and equipment.

When items of PP&E are retired or otherwise disposed of, a gain or loss on disposal is determined by comparing the proceeds from disposal, if any, with the carrying amount of the item and is included in profit or loss.

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

The cost of replacing a part of an item in PP&E is recognized in the net book value of the item if it probable that the future economic benefits embodied within the part will flow to the Corporation and its cost can be measured reliably. In this event, the replaced part of the property, plant and equipment is written off, and the related gain or loss is included in profit or loss. The costs of the day-to-day servicing of PP&E are recognized in profit or loss as incurred.

The need to estimate the decommissioning costs at the end of the useful lives of certain assets is reviewed periodically. The Corporation has concluded it does not have any legal or constructive obligation to remove PP&E. Depreciation is recognized in comprehensive income on a straight-line basis over the estimate useful life of each part or component of property, plant, and equipment. Land is not depreciated. Work in progress assets are not depreciated until the project is complete and the asset is available for use.

The estimated useful lives are as follows:

Distribution station equipment 40 years Poles, towers, and fixtures 50 years

Overhead conductors 60 years
Overhead devices 40 years
Underground conduit 50 years

Underground conductors and devices 30 years

Transformers 40 years

Services overhead 50 years
Services underground 40 years
Distribution meters 25 years
Smart meters 15 years

Smart meters 15 years
Computer hardware 5 years
Computer software 5 years

Depreciation methods, useful lives, and residual values are reviewed at each reporting period.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(q) Impairment

Property, plant, and equipment assets with finite lives are tested for recoverability at each reporting date to determine whether there is any indication of impairment. Any impairment is recognized in comprehensive income when the asset's carrying value exceeds its estimated recoverable amount.

An impairment charge may be reversed only if there is objective evidence that a change in the estimate used to determine the asset's recoverable amount since the last impairment was recognized is warranted. A reversal of an impairment charge is recognized immediately in comprehensive income. After such a reversal, the depreciation charge, where relevant, is adjusted in future periods on a systematic basis over the asset's remaining useful life. The carrying amounts of the Entity s other non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset s recoverable amount is estimated. An impairment loss is recognized if the carrying amount of an asset exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss.

(h) Customer deposits

Deposits from electricity customers are cash collections to guarantee the payment of electricity bills. Interest is paid on customer deposits.

Deposits are refundable to customers who demonstrate an acceptable level of

General Index of Financial Information Notes to the financial statements

credit risk as determined by the Corporation in accordance with policies set out by the OEB or upon termination of their electricity distribution service.

(i) Provisions

A provision is recognized if, as a result of a past event, the Entity has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefit will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(j) Deferred income taxes

Income taxes are reported using the deferred income taxes method, as follows: current income tax expense is the estimated income taxes payable for the current year after any refunds or the use of losses incurred in previous years, and deferred income taxes reflect:

the temporary differences between the carrying amounts of assets and liabilities for accounting purposes and the amounts used for tax purposes; the benefit of unutilized tax losses that will more likely than not be realized and carried forward to future years to reduce income taxes. Deferred income taxes are estimated using the rates enacted by tax law and those substantively enacted for the years in which deferred income taxes assets are likely to be realized, or deferred income tax liabilities settled. The effect of a change in tax rates on deferred income tax assets and liabilities is included in earnings in the period when the change is substantively enacted.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (k) Payment in lieu of corporate income taxes Under the Electricity Act, the Corporation provides for payments in lieu of corporate income taxes, also referred to as income tax expense, using the tax liability method. Under the tax liability method, current income taxes payable are recorded based on taxable income. The Entity recognizes deferred tax assets and liabilities for future tax consequences of events that have been included in the financial statements or income tax returns. Deferred tax assets and liabilities are determined based on the difference between the carrying value and their respective tax basis, using tax rates enacted or substantially enacted by the statement of financial position date that are in effect for the year in which the differences are expected to reverse. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefits will be realized. The calculation of current and deferred taxes requires management to make certain judgments with respect to changes in tax interpretations, regulations, and legislation, and to estimate probable outcomes on the timing and reversal of temporary differences and tax authority audits of income tax. Rate-regulated accounting requires the recognition of regulatory balances and related deferred tax assets and liabilities for the amount of deferred taxes expected to be refunded or recovered from customers through future electricity distribution rates. A gross up to reflect the income tax benefits or liabilities associated with the revenue impact resulting from the the realization of deferred taxes is recorded within regulatory balances.
- (1) Regulatory deferral accounts
 Regulatory deferral account debit balances represent costs incurred in excess
 of amounts billed to the customer at OEB approved rates. These amounts have
 been accumulated and deferred in anticipation of their future recovery in
 electricity distribution rates. Regulatory deferral account credit balances

General Index of Financial Information Notes to the financial statements

represent amounts billed to the customer at OEB approved rates in excess of costs incurred by the Entity.

Regulatory deferral account debit balances are recognized if it is probable that future billings in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes. The offsetting amount is recognized in profit and loss. The debit balance is reduced by the amount of customer billings as electricity is delivered to the customer and the customer is billed at rates approved by the OEB for the recovery of the capitalized costs.

Regulatory deferral account credit balances are recognized if it is probable that future billings in an amount at least equal to the credit balance will be reduced as a result of rate-making activities. The offsetting amount is recognized in profit and loss. The credit balance is reduced by the amounts returned to customers as electricity is delivered to the customer at rates approved by the OEB for the return of the regulatory account credit balance. The probability of recovery or repayment of the regulatory account balances is assessed annually based upon the likelihood that the OEB will approve the change in rates to recover or repay the balance. Any resulting impairment loss is recognized in profit and loss in the year incurred.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (1) Regulatory deferral accounts (continued)
 Regulatory deferral accounts attract interest at OEB prescribed rates. In
 2023 the rates were 4.73% (2022 0.57%) in quarter one, 4.98% (2022 1.02%)
 in quarter two, 4.98% (2022 2.20%) in quarter three and 5.49% (2022 3.87%) in quarter four.
- (m) Intangible Assets

Intangible assets consist of a company website. Intangible assets are initially recorded at cost and subsequently measured at cost less accumulated depreciation and accumulate impairment (losses). Amortization is provided using the straight-line basis over 5 years.

(n) Measurement Uncertainty

The preparation of financial statements in conformity with IFRS requires management to make certain estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Such estimates are periodically reviewed and any adjustments necessary are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

Estimates are underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in these financial statements is included in the following notes:

- a) Note 3 Revenue recognition estimates of unbilled revenue
- b) Note 3 Accounts receivable allowance for impairment
- c) Note 3 Property, plant, and equipment, useful lives and the identification of significant components of property, plant, and equipment
 - d) Note 3, 12 Recognition and measurement of regulatory balances
- e) Note 14 Recognition of deferred tax assets availability of future taxable income against which deductible temporary differences and tax loss carryforwards can be used.

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hvdro Inc.	86374 2599 RC0001	2023-12-31

4. FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics, and the Entity s designation of such instruments. Settlement date accounting is used. Classification

Cash and cash equivalents Fair value through profit and loss (FVTPL)
Accounts receivable Amortized cost
Accounts payable and accrued liabilities Other financial liabilities
Due from/to related parties Other financial assets/liabilities
Current portion of customer deposits Other financial liabilities
Long-term debt Other financial liabilities

Non-current portion of customer deposits Other financial liabilities

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.

Subsequent to initial recognition, loans and receivables are accounted for at amortized cost using the effective interest method.

Other financial liabilities

Subsequent to initial recognition, other financial liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

Effective interest method

The Entity uses the effective interest method to recognize interest income or expense which includes transaction costs or fees, premiums, or discounts earned or incurred for financial instruments.

Financial assets and liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Entity has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

4. FINANCIAL INSTRUMENTS (Continued)

Fair value measurements are established based on the following hierarchy that categorizes the inputs to valuation techniques:

- Level 1 Fair value measurement based on quoted prices (unadjusted)
- observable in active markets for identical assets or liabilities
- Level 2 Fair value measurement using inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3 Fair value measurement using inputs that are not based on observable market date (unobservable inputs)

The fair values of cash and cash equivalents approximate their carrying amounts due to their short-term nature.

The following table presents the financial instruments recorded at fair value in the Statement of Financial Position, classified using the fair value hierarchy described above:

December 31, 2023 | Level 1 | Level 2 | Level 3 | Total financial assets and liabilities at fair valueFinancial assets | | | |

Cash and cash equivalents | 521,647 | - | - | 521,647

Total Financial Assets | 521,647 | - | - | 521,647

December 31, 2022 | Level 1 | Level 2 | Level 3 | Total financial assets

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hvdro Inc.	86374 2599 RC0001	2023-12-31

and liabilities at fair valueFinancial assets | | | | Cash and cash equivalents | 793,075 | - | - | 793,075 Total Financial Assets | 793,075 | - | - | 793,075 Impairment of financial assets

A financial asset is assessed using the lifetime expected credit losses (ECL) model to determine whether there is any objective evidence that it is impaired, using the simplified approach. This includes both quantitative and qualitative information and analysis, based on the Entity s historical experience, adjusted for forward-looking factors specific to the current credit environment.

The Entity measures the loss allowance at an amount equal to the lifetime ECL for accounts receivables or contract assets that result from transactions that are within the scope of IFRS 15, and do not contain a significant financing component. The Entity uses a provision matrix to measure the lifetime ECL of accounts receivable from individual customers which accounts for exposures in different customer classes.

If the amount of impairment loss subsequently decreases due to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through net income.

4. FINANCIAL INSTRUMENTS (Continued)

(a) Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. The company is exposed to credit risk from customers. In order to reduce its credit risk, the company reviews a new customer's credit history before extending credit and conducts regular reviews of its existing customers' credit performance. The Corporation has a significant number of customers which minimizes concentration of credit risk. The Corporation's distribution revenue is earned on a broad base of customers principally located in Tillsonburg, with no single customer that accounts for revenue or accounts receivable balance in excess of 10% of the respective balance.

An allowance for doubtful accounts is established based upon factors surrounding the credit risk of specific accounts, historical trends, and other information. The carrying amount of accounts receivable is reduced through the use of the allowance. Subsequent recoveries of receivables previously provisioned are credited to profit or loss. The balance of the allowance for impairment at December 31, 2023 is \$176,833 (2022 - \$150,749). An impairment loss of \$60,000 (2022 - \$60,000) was recognized during the year.

The Entity invests in short-term investments, depending on cash flow availability, which are not considered a credit risk.

(b) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Entity is exposed to this risk mainly in respect of its receipt of funds from its customers and other related sources, long-term debt, and accounts payable. The Entity monitors its liquidity risk to ensure access to sufficient funds to meet operational requirements.

(c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency rate risk, interest rate risk, and commodity price risk. The Entity does not currently have any material commodity or foreign exchange risk. The Entity is exposed to fluctuations in interest rates as the regulated rate of return for the Entity

General Index of Financial Information Notes to the financial statements

s distribution business is derived using a complex formulaic approach which is in part based on the forecast for long-term Government of Canada bond yields. This rate of return is approved by the OEB as part of the approval of distribution rates.

(d) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. In seeking to minimize the risks from interest rate fluctuations, the company manages exposure through its normal operating and financing activities.

5. ACCOUNTS RECEIVABLE

| 2023 | 2022

Trade receivables | 1,894,560 | 1,829,499 Other receivables | 109,047 | 101,124

Allowance for doubtful accounts | (176,833) | (150,749)

| 1,826,774 | 1,779,874

6. INVENTORY

The amount of inventory consumed by the Corporation and recognized as an expense during the year was \$22,312 (2022 - \$21,890). An amount of \$Nil (2022 - \$Nil) was written down due to obsolescence.

- 7. RELATED PARTY TRANSACTIONS
- (a) Parent and ultimate controlling party

As the Corporation of the Town of Tillsonburg (Town) is the sole shareholder of the Entity, the Entity and the Town are considered related parties. Banking and accounting activities are administered by the Town on behalf of Tillsonburg Hydro Inc. Amounts due from (to) related parties represent the net working capital position between the Town and the Corporation. A Master Service Agreement (MSA), which was updated in 2013, governs the financial relationship between the Entity and the Town. These financial statements reflect this MSA. This MSA was updated for the year beginning January 1, 2019 and was approved by both parties as of January 28, 2019. The costing provisions set out in the agreement includes a fixed indirect fee of \$140,000 (2022 - \$140,000).

A summary of transactions between these related parties are as follows:

| 2023 | 2022

Service based expenditures | |

Labour | 2,050,703 | 2,057,759

Fleet | 172,677 | 177,000

Rent | 150,000 | 150,000

Master service agreement | 140,000 | 140,000

| 2,513,380 | 2,524,759

| 2023 | 2022

Service based sales | |

As at December 31, 2023, the property, plant and equipment are subject to a
general security agreement as described in Note 11.
      NET NON-UTILITY ACTIVITIES
The non-utility capital assets are comprised of solar powered equipment which
is not regulated by the OEB, these assets are fully amortized. The net
revenue generated from these assets is recorded in the non-utility activities.
11. LONG-TERM DEBT
During 2023, the Entity was approved to borrow $8,500,000 for capital project
at prime rate of interest less 0.65%. As of December 31, 2023, the
Corporation had been advanced $8,000,000 (2022 - $5,000,000). The loan has
interest only payments, TD Prime less 0.65% per annum, for two years after
the final draw, which can be extended for one more year upon approved
request. Full repayment is due upon contractual term maturity. As a result,
the $8,000,000 has been reflected in the financial statements as long-term
debt. A general security agreement provides collateral for the loan.
      REGULATORY ASSETS AND LIABILITIES
The following expenses (recoveries) may be considered by the OEB in future
rate applications and accordingly have been deferred until such time as
direction is provided by the OEB.
Regulatory assets | 2022 Balance (restated - Note 21) | Additions/
transfers | Recovery/ reversals | 2023 Balance

```
Regulatory liabilities | 2021 Balance | Additions/ transfers | Recovery/
reversals | 2022 Balance (restated - Note 21)
Retail settlement variances | 438,325 | (361,453) | - | 76,872
Deferred costs | 76,857 | 15,437 | - | 92,294
Deferred tax asset | - | - | - | -
| 515,182 | (346,016) | - | 169,166
The retail settlement variance accounts represent the difference between the
amount charged by the IESO based on the settlement invoice and the amount
billed to customers using the OEB approved rates. The disposition of these
amounts is expected to be reflected in future rate adjustments.
The balance in the recovery of regulatory assets represents the amount that
the OEB has considered final in prior applications and set a rate for
The Entity continually assesses the likelihood of recovery of each of its
regulatory assets and liabilities into the setting of future rates. If, at
some future date, the Entity judges that it is no longer probable that the
OEB will include a regulatory asset or liability in future rates, the
appropriate carrying amount will be reflected in results of operations in the
period that the assessment is made.
13.
      DEFERRED CONTRIBUTIONS
Deferred customer contributions in aid of construction or acquisition of
property, plant, and equipment is as follows:
 | 2023 | 2022
Deferred contributions, beginning of year | 4,228,555 | 3,831,067
Add: deferred contributions received | 425,653 | 528,839

20. COMMITMENTS

(i) General

The Company has entered into a lease agreement for the period of January 1, 2024 to May 31, 2027 for the location of 43 John Pound Road in Tillsonburg. Monthly lease costs for the first five months are \$3,400 with subsequent monthly lease costs increasing to \$11,153.

(ii) General Liability Insurance

The Corporation has obtained general liability and enhanced directors and officers insurance overage from the Municipal Electric Association Reciprocal Insurance Exchange (the MEARIE Group). The MEARIE is an insurance reciprocal whereby all members through the unincorporated group share risks with each other. Members of the MEARIE Group are assessed a premium deposit at policy execution. Should the group experience losses that are in excess of the accumulated premium deposits of its members combined with reserves and supplementary insurance, members would be assessed a supplementary or retro assessment on a pro-rata basis for the periods which the Corporation was a member.

21. COMPARATIVE FIGURES

The prior year's figures, provided for purposes of comparison, have been restated due to a comprehensive review completed of all Regulated Price Plan (RPP) related preliminary settlement claims with the IESO for the period of 2016-2022. A review of the past allocations of Class B RPP Global Adjustment to Cost of Power and the related calculations was also completed. A more precise method of determining RPP consumption was developed, improvements in preliminary settlements and changes to the allocation calculation were applied. These adjustments had no income statement impact but rather were a reallocation within the components of the regulatory asset and liability lines in the current year. In addition, during the current year the Company has changed the presentation of the regulatory assets and liabilities accounts to confirm to their ending account values rather than net settlement amounts. There is no change in the overall regulatory balance but rather the groupings of regulatory assets and liabilities have been updated over the prior year. The following outlines the impact of these adjustments: | 2022 Opening balance restatement | 2022 Opening balance grouping reallocation | 2022 Addition / transfer adjustment | Net impact to 2022 ending balancesRegulatory assets | | | | Retail settlement variances | (2,822,876) | 3,232,524 | (388,308) | 21,340 Recovery of regulatory assets | - | 40,722 | 695 | 41,417 Regulatory liabilities | | | Retail settlement variances | (2,822,876) | 3,261,201 | (361,453) | 76,872 Recovery of regulatory assets | - | 12,045 | (26,160) | (14,115) | - | - | - | -In addition, the prior year figures, provided for comparison, have been restated to correct the allocation of the net movement in regulatory balances. As a result, energy sales decreased by \$399,920, other income regulatory balances decreased by \$238,398.1.

decreased by \$22,202, cost of power decreased by \$660,520 and net movement in DESCRIPTION OF THE BUSINESS

Tillsonburg Hydro Inc. (the Entity), was incorporated provincially under the Business Corporations Act of Ontario on October 26, 2000. The Entity's principal business activity is to distribute electrical power to the residents of the Town of Tillsonburg in accordance with Section 144 of the

General Index of Financial Information Notes to the financial statements

Electricity Act, 1998. The Corporation operates under a licence issued by the Ontario Energy Board (OEB). The Corporation is regulated by the OEB and adjustments to the Corporation's distribution and power rates require OEB approval. The address of the Corporation's registered office is 200 Broadway Street, 2nd Floor, Tillsonburg, Ontario, N4G 5A7.

2. BASIS OF PRESENTATION

The Entity's financial statements were prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the International Accounting Standards Board (IASB).

- (a) Approval of the financial statements

 The financial statements were approved by the Board of Directors on April 26,
- (b) Basis of measurement The financial statements have been prepared on a historical cost basis, unless otherwise stated.

These financial statements have been prepared using the accrual basis of accounting. The accrual basis of accounting recognizes revenue as it becomes available and measurable. Expenses are recognized as they are incurred and measurable as a result of the receipt of goods and services and the creation of a legal obligation to pay.

- (c) Functional and presentation currency
 These financial statements are presented in Canadian dollars, which is also
 the Entity's functional currency.
- (d) Subsequent events

The Entity has evaluated the events and transactions occurring after December 31, 2023 through April 26, 2024, when the Board approved the financial statements, and identified the events and transactions which required recognition in the Entity's financial statements.

(e) Rate setting and industry regulation

The Ontario Energy Board Act (1998) (the Act) gave the Ontario Energy Board (OEB) powers and responsibilities to approve or set rates for the transmission and distribution of electricity, providing continued rate protection for electricity consumers, and ensuring that distribution companies fulfill obligations to connect and service customers. In its capacity to approve or set rates, the OEB has the authority to specify regulatory accounts treatment that may differ from IFRS for enterprises operating in a non-rate regulated environment.

The Act provides for a competitive market in the sale of electricity in addition to the regulation of the monopoly electricity delivery system in Ontario.

- 2. BASIS OF PRESENTATION (Continued)
- (e) Rate setting and industry regulation (continued)
 The OEB has regulatory authority over the electricity delivery sector. The
 Act set out the Board's powers to issue a distribution license, which must be
 obtained by any person owning or operating a distribution system under the
 Act. The Act allows the Board to prescribe license requirements and
 conditions to electricity distributors, which includes such considerations as
 specified accounting records, regulatory accounting principles, separation of
 accounts for separate businesses, and filing requirements for rate setting
 purposes.

With the commencement of the open market, the Corporation purchases electricity from the Independent Electricity System Operator (IESO), at spot market rates and charges its customers unbundled rates. The unbundled rates include the actual cost of generation and transmission of electricity and an

General Index of Financial Information Notes to the financial statements

approved rate for electricity distribution. The cost of generation, transmission, and other charges such as connection are collected by Tillsonburg Hydro Inc. and remitted to the IESO. The Corporation retains the distribution charge on the customer hydro invoices. The OEB has the general power to include or exclude costs, revenues, losses, or gains in the rates of a specific period, resulting in a change in the timing of accounting recognition from that which would have applied in an unregulated Corporation. Such change in timing gives rise to the recognition of regulatory assets and liabilities. The Corporation's regulatory assets represent certain amounts receivable from future customers and costs that have been deferred for accounting purposes because it is probable that they will be recovered on future rates. In addition, the Corporation has recorded regulatory liabilities, which will represent amounts for expenses incurred in different periods than would be the case had the Corporation been unregulated. Specific regulatory assets and liabilities are disclosed in note 12. The Corporation's approved distribution rates include components for the recovery of distribution expenses, regulatory assets and liabilities, and a rate of return on capital assets.

Rate setting - Distribution revenue

The Corporation is required to file a "Cost of Service" ("COS") rate application every five years, unless approved for a deferral, under which the OEB establishes the revenues required to recover the forecasted operating and capital expenditures to support the Corporation's business. The Corporation estimates usage and the costs to service each customer class in order to determine the appropriate rates to be charged by each customer class. The COS rate application is reviewed by the OEB and any registered interveners. Rates are approved based upon the review of evidence and information, including any revisions resulting from that review.

In the intervening years an Incentive Rate Mechanism application (IRM) is filed. An IRM application results in a formulaic adjustment to distribution rates that were set under the last COS rate application. The previous year's rates are adjusted for the annual change in the Gross Domestic Product Implicit Price Inflator for Final Domestic Demand ("GDP IPI FDD") net of a productivity factor and a "stretch factor" determined by the relative efficiency of an electricity distributor.

- 2. BASIS OF PRESENTATION (Continued)
- (e) Rate setting and industry regulation (continued)
 As a licensed distributor, the Corporation is responsible for billing
 customers for electricity generated by third parties and the related costs of
 providing electricity service, such as transmission services and other
 services provided by third parties. The Corporation is required, pursuant to
 regulation, to remit such amounts to these third parties, irrespective of
 whether the Corporation ultimately collects these amounts from customers.
 In 2022, the Corporation submitted an Incentive Rate-setting Mechanism (IRM)
 application to the OEB for 2022 Electricity Distribution rates. On March 23,
 2023, the Corporation received a decision from the OEB that approved changes
 to rates that the Corporation charges for electricity distribution, to be
 effective May 1, 2023.

Rate setting - Electricity rates

The OEB sets electricity prices for certain low volume consumers twice per year (May and November) based upon an estimate of how much it will cost to supply the province with electricity in the coming year (Regulated Price Plan). Remaining customers will pay either the market price for electricity or the contracted price for electricity if they have enrolled with a retailer. The Company is billed for the cost of the electricity that its

General Index of Financial Information Notes to the financial statements

customers use and passes this cost on to its customers without a markup. In 2021, the OEB adjusted the Regulated Price Plan in response to the Government issued Emergency Orders under the Emergency Management and Civil Protection Act to assist Ontarians who were forced to stay home due to the COVID-19 pandemic.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all years presented in these financial statements.

- (a) Cash and cash equivalents
 Cash and cash equivalents consist of overnight deposits at a Canadian chartered bank
- (b) Revenue recognition
 Sale and distribution of electricity

Revenues from energy sales and electricity distribution are recorded on the basis of cyclical billings and include estimates of customer usage since the last meter reading to the end of the year (unbilled revenue). The Entity applies judgment to the measurement of the estimated consumption and to the valuation of the consumption.

Distribution revenue is recorded based on the approved OEB distribution rates to recover the costs of delivering electricity to customers. This revenue also includes revenue related to the collection of the rate riders approved by the OEB.

- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (b) Revenue recognition (continued)

Capital contributions

Developers are required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. The developer is not a customer and therefore the contributions are scoped out of IFRS 15 Revenue from Contracts with Customers. Cash contributions, received from developers are recorded as deferred revenue. When an asset other than cash is received as a capital contribution, the asset is initially recognized at its fair value, with a corresponding amount recognized as deferred revenue. The deferred revenue, which represents the Entity's obligation to continue to provide the customer access to the supply of electricity, is amortized to income on a straight-line basis over the useful life of the related asset.

Certain customers are also required to contribute towards the capital cost of construction of distribution assets in order to provide ongoing service. These contributions fall within the scope of IFRS 15 Revenue from Contracts with Customers. The contributions are received to obtain a connection to the distribution system in order to receive ongoing access to electricity. The Entity has concluded that the performance obligation is the supply of the electricity over the life of the relationship with the customer which is satisfied over time as the customer receives and consumes the electricity. Revenue is recognized on a straight-line basis over the useful life of the related asset.

(c) Accounts receivable

Accounts receivable are recorded at the invoiced amount and overdue amounts bear interest at rates approved by the OEB. The Corporation evaluated its allowance for doubtful accounts on its expected credit loss (ECL) model based on its historic credit loss experience. Accounts receivable are shown net of an allowance for doubtful accounts of \$176,833 (2022 - \$150,749).

(d) Unbilled revenue
Unbilled revenue is recorded based on an estimated amount for electricity

General Index of Financial Information Notes to the financial statements

delivered and not yet billed. The estimate is based on actual meter readings provided and analyzed by a meter demand management company. Actual unbilled revenue could vary based on actual meter reading dates and the fiscal year end

(e) Inventory

Inventory consists of repair parts, supplies, and material held for future capital expansion and maintenance activities and is valued at the lower of cost and net realizable value, with cost being determined on an average cost basis. Items considered major spare parts are recorded as capital assets.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (f) Property, plant and equipment

Property, plant, and equipment (PP&E) are measured at cost or deemed cost established on the transition date. Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour and any other costs directly attributable to bringing the asset to a working condition for its intended use.

Parts of an item of property, plant, and equipment that have different useful lives are accounted for as separate items (major components) of property, plant and equipment.

When items of PP&E are retired or otherwise disposed of, a gain or loss on disposal is determined by comparing the proceeds from disposal, if any, with the carrying amount of the item and is included in profit or loss. The cost of replacing a part of an item in PP&E is recognized in the net book value of the item if it probable that the future economic benefits embodied within the part will flow to the Corporation and its cost can be measured reliably. In this event, the replaced part of the property, plant and equipment is written off, and the related gain or loss is included in profit or loss. The costs of the day-to-day servicing of PP&E are recognized in

The need to estimate the decommissioning costs at the end of the useful lives of certain assets is reviewed periodically. The Corporation has concluded it does not have any legal or constructive obligation to remove PP&E. Depreciation is recognized in comprehensive income on a straight-line basis over the estimate useful life of each part or component of property, plant, and equipment. Land is not depreciated. Work in progress assets are not

depreciated until the project is complete and the asset is available for use.

The estimated useful lives are as follows:

Distribution station equipment 40 years

Poles, towers, and fixtures 50 years

Overhead conductors 60 years Overhead devices 40 years

Underground conduit 50 years

Underground conductors and devices 30 years

Transformers 40 years

profit or loss as incurred.

Services overhead 50 years
Services underground 40 years
Distribution meters 25 years

Smart meters 15 years
Computer hardware 5 years
Computer software 5 years

Depreciation methods, useful lives, and residual values are reviewed at each reporting period.

General Index of Financial Information Notes to the financial statements

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(g) Impairment

Property, plant, and equipment assets with finite lives are tested for recoverability at each reporting date to determine whether there is any indication of impairment. Any impairment is recognized in comprehensive income when the asset's carrying value exceeds its estimated recoverable amount.

An impairment charge may be reversed only if there is objective evidence that a change in the estimate used to determine the asset's recoverable amount since the last impairment was recognized is warranted. A reversal of an impairment charge is recognized immediately in comprehensive income. After such a reversal, the depreciation charge, where relevant, is adjusted in future periods on a systematic basis over the asset's remaining useful life. The carrying amounts of the Entity s other non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset s recoverable amount is estimated. An impairment loss is recognized if the carrying amount of an asset exceeds its estimated recoverable amount. Impairment losses are recognized in profit or loss.

(h) Customer deposits

Deposits from electricity customers are cash collections to guarantee the payment of electricity bills. Interest is paid on customer deposits. Deposits are refundable to customers who demonstrate an acceptable level of credit risk as determined by the Corporation in accordance with policies set out by the OEB or upon termination of their electricity distribution service.

(i) Provisions

A provision is recognized if, as a result of a past event, the Entity has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefit will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(j) Deferred income taxes

Income taxes are reported using the deferred income taxes method, as follows: current income tax expense is the estimated income taxes payable for the current year after any refunds or the use of losses incurred in previous years, and deferred income taxes reflect:

the temporary differences between the carrying amounts of assets and liabilities for accounting purposes and the amounts used for tax purposes; the benefit of unutilized tax losses that will more likely than not be realized and carried forward to future years to reduce income taxes. Deferred income taxes are estimated using the rates enacted by tax law and those substantively enacted for the years in which deferred income taxes assets are likely to be realized, or deferred income tax liabilities settled. The effect of a change in tax rates on deferred income tax assets and liabilities is included in earnings in the period when the change is substantively enacted.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (k) Payment in lieu of corporate income taxes
 Under the Electricity Act, the Corporation provides for payments in lieu of
 corporate income taxes, also referred to as income tax expense, using the tax

General Index of Financial Information Notes to the financial statements

liability method. Under the tax liability method, current income taxes payable are recorded based on taxable income. The Entity recognizes deferred tax assets and liabilities for future tax consequences of events that have been included in the financial statements or income tax returns. Deferred tax assets and liabilities are determined based on the difference between the carrying value and their respective tax basis, using tax rates enacted or substantially enacted by the statement of financial position date that are in effect for the year in which the differences are expected to reverse. Deferred tax assets are reviewed at each reporting date and reduced to the extent that it is no longer probable that the related tax benefits will be realized. The calculation of current and deferred taxes requires management to make certain judgments with respect to changes in tax interpretations, regulations, and legislation, and to estimate probable outcomes on the timing and reversal of temporary differences and tax authority audits of income tax. Rate-regulated accounting requires the recognition of regulatory balances and related deferred tax assets and liabilities for the amount of deferred taxes expected to be refunded or recovered from customers through future electricity distribution rates. A gross up to reflect the income tax benefits or liabilities associated with the revenue impact resulting from the the realization of deferred taxes is recorded within regulatory balances.

(1) Regulatory deferral accounts

Regulatory deferral account debit balances represent costs incurred in excess of amounts billed to the customer at OEB approved rates. These amounts have been accumulated and deferred in anticipation of their future recovery in electricity distribution rates. Regulatory deferral account credit balances represent amounts billed to the customer at OEB approved rates in excess of costs incurred by the Entity.

Regulatory deferral account debit balances are recognized if it is probable that future billings in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes. The offsetting amount is recognized in profit and loss. The debit balance is reduced by the amount of customer billings as electricity is delivered to the customer and the customer is billed at rates approved by the OEB for the recovery of the capitalized costs.

Regulatory deferral account credit balances are recognized if it is probable that future billings in an amount at least equal to the credit balance will be reduced as a result of rate-making activities. The offsetting amount is recognized in profit and loss. The credit balance is reduced by the amounts returned to customers as electricity is delivered to the customer at rates approved by the OEB for the return of the regulatory account credit balance. The probability of recovery or repayment of the regulatory account balances is assessed annually based upon the likelihood that the OEB will approve the change in rates to recover or repay the balance. Any resulting impairment loss is recognized in profit and loss in the year incurred.

- 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)
- (1) Regulatory deferral accounts (continued) Regulatory deferral accounts attract interest at OEB prescribed rates. In 2023 the rates were 4.73% (2022 0.57%) in quarter one, 4.98% (2022 1.02%) in quarter two, 4.98% (2022 2.20%) in quarter three and 5.49% (2022 3.87%) in quarter four.
- (m) Intangible Assets
 Intangible assets consist of a company website. Intangible assets are
 initially recorded at cost and subsequently measured at cost less accumulated
 depreciation and accumulate impairment (losses). Amortization is provided

General Index of Financial Information Notes to the financial statements

using the straight-line basis over 5 years.

(n) Measurement Uncertainty

The preparation of financial statements in conformity with IFRS requires management to make certain estimates and assumptions that affect reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the period. Such estimates are periodically reviewed and any adjustments necessary are reported in earnings in the period in which they become known. Actual results could differ from these estimates.

Estimates are underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in these financial statements is included in the following notes:

- a) Note 3 Revenue recognition estimates of unbilled revenue
- b) Note 3 Accounts receivable allowance for impairment
- c) Note 3 Property, plant, and equipment, useful lives and the identification of significant components of property, plant, and equipment
 - d) Note 3, 12 Recognition and measurement of regulatory balances
- e) Note 14 Recognition of deferred tax assets availability of future taxable income against which deductible temporary differences and tax loss carryforwards can be used.

4. FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are initially recognized at fair value and their subsequent measurement is dependent on their classification as described below. Their classification depends on the purpose for which the financial instruments were acquired or issued, their characteristics, and the Entity s designation of such instruments. Settlement date accounting is used. Classification

ACCOUNTS receivable Amortized Cost

Accounts payable and accrued liabilities Other financial liabilities

Due from/to related parties Other financial assets/liabilities

Current portion of customer deposits Other financial liabilities

Long-term debt Other financial liabilities

Non-current portion of customer deposits Other financial liabilities

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss. Amortized cost

Subsequent to initial recognition, loans and receivables are accounted for at amortized cost using the effective interest method.

Other financial liabilities

Subsequent to initial recognition, other financial liabilities are recorded at amortized cost using the effective interest method and include all financial liabilities, other than derivative instruments.

Effective interest method

The Entity uses the effective interest method to recognize interest income or expense which includes transaction costs or fees, premiums, or discounts earned or incurred for financial instruments.

Financial assets and liabilities are offset and the net amount is presented

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

in the balance sheet when, and only when, the Entity has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

4. FINANCIAL INSTRUMENTS (Continued)

Fair value measurements are established based on the following hierarchy that categorizes the inputs to valuation techniques:

Level 1 Fair value measurement based on quoted prices (unadjusted)

observable in active markets for identical assets or liabilities

Level 2 Fair value measurement using inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 3 Fair value measurement using inputs that are not based on observable market date (unobservable inputs)

The fair values of cash and cash equivalents approximate their carrying amounts due to their short-term nature.

The following table presents the financial instruments recorded at fair value in the Statement of Financial Position, classified using the fair value hierarchy described above:

December 31, 2023 | Level 1 | Level 2 | Level 3 | Total financial assets

and liabilities at fair valueFinancial assets | | | | Cash and cash equivalents | 521,647 | - | - | 521,647

Total Financial Assets | 521,647 | - | - | 521,647

December 31, 2022 | Level 1 | Level 2 | Level 3 | Total financial assets and liabilities at fair valueFinancial assets $|\ |\ |$

Cash and cash equivalents | 793,075 | - | - | 793,075

Total Financial Assets | 793,075 | - | - | 793,075

Impairment of financial assets

A financial asset is assessed using the lifetime expected credit losses (ECL) model to determine whether there is any objective evidence that it is impaired, using the simplified approach. This includes both quantitative and qualitative information and analysis, based on the Entity s historical experience, adjusted for forward-looking factors specific to the current credit environment.

The Entity measures the loss allowance at an amount equal to the lifetime ECL for accounts receivables or contract assets that result from transactions that are within the scope of IFRS 15, and do not contain a significant financing component. The Entity uses a provision matrix to measure the lifetime ECL of accounts receivable from individual customers which accounts for exposures in different customer classes.

If the amount of impairment loss subsequently decreases due to an event occurring after the impairment was recognized, then the previously recognized impairment loss is reversed through net income.

4. FINANCIAL INSTRUMENTS (Continued)

(a) Credit risk

Credit risk arises from the potential that a counterparty will fail to perform its obligations. The company is exposed to credit risk from customers. In order to reduce its credit risk, the company reviews a new customer's credit history before extending credit and conducts regular reviews of its existing customers' credit performance. The Corporation has a significant number of customers which minimizes concentration of credit risk. The Corporation's distribution revenue is earned on a broad base of customers principally located in Tillsonburg, with no single customer that accounts for revenue or accounts receivable balance in excess of 10% of the respective

General Index of Financial Information Notes to the financial statements

balance.

An allowance for doubtful accounts is established based upon factors surrounding the credit risk of specific accounts, historical trends, and other information. The carrying amount of accounts receivable is reduced through the use of the allowance. Subsequent recoveries of receivables previously provisioned are credited to profit or loss. The balance of the allowance for impairment at December 31, 2023 is \$176,833 (2022 - \$150,749). An impairment loss of \$60,000 (2022 - \$60,000) was recognized during the year.

The Entity invests in short-term investments, depending on cash flow availability, which are not considered a credit risk.

- (b) Liquidity risk
- Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Entity is exposed to this risk mainly in respect of its receipt of funds from its customers and other related sources, long-term debt, and accounts payable. The Entity monitors its liquidity risk to ensure access to sufficient funds to meet operational requirements.
- (c) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency rate risk, interest rate risk, and commodity price risk. The Entity does not currently have any material commodity or foreign exchange risk. The Entity is exposed to fluctuations in interest rates as the regulated rate of return for the Entity s distribution business is derived using a complex formulaic approach which is in part based on the forecast for long-term Government of Canada bond yields. This rate of return is approved by the OEB as part of the approval of distribution rates.

(d) Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. In seeking to minimize the risks from interest rate fluctuations, the company manages exposure through its normal operating and financing activities.

5. ACCOUNTS RECEIVABLE

| 2023 | 2022

Trade receivables | 1,894,560 | 1,829,499 Other receivables | 109,047 | 101,124

Allowance for doubtful accounts | (176,833) | (150,749)

| 1,826,774 | 1,779,874

6. INVENTORY

The amount of inventory consumed by the Corporation and recognized as an expense during the year was \$22,312 (2022 - \$21,890). An amount of \$Nil (2022 - \$Nil) was written down due to obsolescence.

- 7. RELATED PARTY TRANSACTIONS
- (a) Parent and ultimate controlling party

As the Corporation of the Town of Tillsonburg (Town) is the sole shareholder of the Entity, the Entity and the Town are considered related parties. Banking and accounting activities are administered by the Town on behalf of Tillsonburg Hydro Inc. Amounts due from (to) related parties represent the net working capital position between the Town and the Corporation. A Master Service Agreement (MSA), which was updated in 2013, governs the financial relationship between the Entity and the Town. These financial statements reflect this MSA. This MSA was updated for the year beginning January 1, 2019

Corporation's name	Business number	Tax year end

As at December 31, 2023, the property, plant and equipment are subject to a
general security agreement as described in Note 11.
      NET NON-UTILITY ACTIVITIES
The non-utility capital assets are comprised of solar powered equipment which
is not regulated by the OEB, these assets are fully amortized. The net
revenue generated from these assets is recorded in the non-utility activities.
11
      LONG-TERM DEBT
```

During 2023, the Entity was approved to borrow \$8,500,000 for capital project at prime rate of interest less 0.65%. As of December 31, 2023, the Corporation had been advanced \$8,000,000 (2022 - \$5,000,000). The loan has interest only payments, TD Prime less 0.65% per annum, for two years after the final draw, which can be extended for one more year upon approved request. Full repayment is due upon contractual term maturity. As a result, the \$8,000,000 has been reflected in the financial statements as long-term

General Index of Financial Information Notes to the financial statements

```
debt. A general security agreement provides collateral for the loan.
       REGULATORY ASSETS AND LIABILITIES
The following expenses (recoveries) may be considered by the OEB in future
rate applications and accordingly have been deferred until such time as
direction is provided by the OEB.
Regulatory assets | 2022 Balance (restated - Note 21) | Additions/
transfers | Recovery/ reversals | 2023 Balance
Retail settlement variances | 1,422,269 | 175,674 | 163,991 | 1,761,934
Recovery of regulatory assets | 58,303 | 49,080 | - | 107,383
Deferred tax asset | 845,228 | 206,782 | - | 1,052,010
 | 2,325,800 | 431,536 | 163,991 | 2,921,327
Regulatory assets | 2021 Balance | Additions/ transfers | Recovery/
reversals | 2022 Balance (restated - Note 21)
Retail settlement variances | 1,348,219 | 74,050 | - | 1,422,269
Recovery of regulatory assets | 56,247 | 2,056 | - | 58,303
Deferred tax asset | 606,830 | 238,398 | - | 845,228
 | 2,011,296 | 314,504 | - | 2,325,800
Regulatory liabilities | 2022 Balance (restated - Note 21) | Additions/
transfers | Recovery/ reversals | 2023 Balance
Retail settlement variances | 76,872 | 166,749 | (1,335) | 242,286
Deferred costs | 92,294 | 20,464 | - | 112,758
Deferred tax asset | - | - | - | -
 | 169,166 | 187,213 | (1,335) | 355,044
Regulatory liabilities | 2021 Balance | Additions/ transfers | Recovery/
reversals | 2022 Balance (restated - Note 21)
Retail settlement variances | 438,325 | (361,453) | - | 76,872
Deferred costs | 76,857 | 15,437 | - | 92,294
Deferred tax asset | - | - | - | -
| 515,182 | (346,016) | - | 169,166
The retail settlement variance accounts represent the difference between the
amount charged by the IESO based on the settlement invoice and the amount
billed to customers using the OEB approved rates. The disposition of these
amounts is expected to be reflected in future rate adjustments.
The balance in the recovery of regulatory assets represents the amount that
the OEB has considered final in prior applications and set a rate for
recovery.
The Entity continually assesses the likelihood of recovery of each of its
regulatory assets and liabilities into the setting of future rates. If, at
some future date, the Entity judges that it is no longer probable that the
OEB will include a regulatory asset or liability in future rates, the
appropriate carrying amount will be reflected in results of operations in the
period that the assessment is made.
13.
      DEFERRED CONTRIBUTIONS
Deferred customer contributions in aid of construction or acquisition of
property, plant, and equipment is as follows:
| 2023 | 2022
Deferred contributions, beginning of year | 4,228,555 | 3,831,067
Add: deferred contributions received | 425,653 | 528,839
Less: amounts recognized as other revenue | (143,283) | (131,351)
Deferred contributions, end of year | 4,510,925 | 4,228,555
      PAYMENTS IN LIEU OF CORPORATE TAXES

      CAPITAL MANAGEMENT
The Entity defines capital as shareholders' equity and long term debt. As at
December 31, 2023, shareholders equity amounts to $12,626,195 (2022 -
$12,370,738) and long term debt amounts to $8,000,000 (2022 - $5,000,000) The
Corporation's objectives when managing capital are to ensure sufficient
liquidity to supports its financial obligations and execute its operating and
strategic plans; maintain financial capacity and access to capital to support
future development of the business while taking into consideration current
and future industry, market and economic risks and conditions; and utilize
short-term funding sources to manage its capital requirements.

Corporation's name	Business number	Tax year end
		Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

Other | 1,018,643 | 675,617 | 4,247,709 | 3,875,670 18. PRUDENTIAL SUPPORT

Tillsonburg Hydro Inc. has posted a letter of credit with the Independent Electricity System Operator (IESO) in the amount of \$956,406 (2022 - \$956,406). The IESO is responsible for ensuring that prudential support is posted by all market participants to satisfy their prudential support and obligation and, therefore, mitigate the impact of an event of default by a market participant on the rest of the market.

19. REVENUE FROM CONTRACTS WITH CUSTOMERS

The Entity generates revenue primarily from the sale and distribution of electricity to its customers. Other sources of revenue include services ancillary to the electricity distribution, pole rentals, other regulatory services charges and capital contributions.

1 | 2023

(i) General

The Company has entered into a lease agreement for the period of January 1, 2024 to May 31, 2027 for the location of 43 John Pound Road in Tillsonburg. Monthly lease costs for the first five months are \$3,400 with subsequent monthly lease costs increasing to \$11,153.

(ii) General Liability Insurance

The Corporation has obtained general liability and enhanced directors and officers insurance overage from the Municipal Electric Association Reciprocal Insurance Exchange (the MEARIE Group). The MEARIE is an insurance reciprocal whereby all members through the unincorporated group share risks with each other. Members of the MEARIE Group are assessed a premium deposit at policy execution. Should the group experience losses that are in excess of the accumulated premium deposits of its members combined with reserves and supplementary insurance, members would be assessed a supplementary or retro assessment on a pro-rata basis for the periods which the Corporation was a member.

21. COMPARATIVE FIGURES

The prior year's figures, provided for purposes of comparison, have been restated due to a comprehensive review completed of all Regulated Price Plan (RPP) related preliminary settlement claims with the IESO for the period of 2016-2022. A review of the past allocations of Class B RPP Global Adjustment to Cost of Power and the related calculations was also completed. A more precise method of determining RPP consumption was developed, improvements in preliminary settlements and changes to the allocation calculation were applied. These adjustments had no income statement impact but rather were a reallocation within the components of the regulatory asset and liability lines in the current year. In addition, during the current year the Company

Corporation's name	Business number	Tax year end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

```
has changed the presentation of the regulatory assets and liabilities
accounts to confirm to their ending account values rather than net settlement
amounts. There is no change in the overall regulatory balance but rather the
groupings of regulatory assets and liabilities have been updated over the
prior year. The following outlines the impact of these adjustments:
| 2022 Opening balance restatement | 2022 Opening balance grouping
reallocation | 2022 Addition / transfer adjustment | Net impact to 2022
ending balancesRegulatory assets | | | |
Retail settlement variances | (2,822,876) | 3,232,524 | (388,308) | 21,340
Recovery of regulatory assets \mid - \mid 40,722 \mid 695 \mid 41,417
 Regulatory liabilities | | | |
Retail settlement variances | (2,822,876) | 3,261,201 | (361,453) | 76,872
Recovery of regulatory assets | - | 12,045 | (26,160) | (14,115)
| - | - | - | -
In addition, the prior year figures, provided for comparison, have been
restated to correct the allocation of the net movement in regulatory
balances. As a result, energy sales decreased by $399,920, other income
decreased by $22,202, cost of power decreased by $660,520 and net movement in
regulatory balances decreased by $238,398.

Schedule 3

Dividends Received, Taxable Dividends Paid, and Part IV Tax Calculation

Corporation's name	Business number	Tax year-end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

- Corporations must use this schedule to report:
 - non-taxable dividends under section 83
 - deductible dividends under subsection 138(6)
 - taxable dividends deductible from income under section 112, subsection 113(2) and paragraphs 113(1)(a), (a.1), (b) or (d)
 - taxable dividends paid in the tax year that qualify for a dividend refund (see page 3)
- All legislative references are to the federal Income Tax Act.
- The calculations in this schedule apply only to private or subject corporations (as defined in subsection 186(3)).
- A payer corporation is **connected** with a recipient corporation at any time in a tax year, if at that time the recipient corporation meets either of the following conditions:
 - it controls the payer corporation, other than because of a right referred to in paragraph 251(5)(b)
 - it owns more than 10% of the issued share capital (with full voting rights), and shares that have a fair market value of more than 10% of the fair market value of all shares of the payer corporation
- If you need more space, continue on a separate schedule.
- File this schedule with your T2 Corporation Income Tax Return.
- Column A1 Enter "X" if dividends were received from a foreign source.
- Column F1 Enter the code that applies to the deductible taxable dividend.

Part 1 – Dividends received in the tax year -

- Do not include dividends received from foreign non-affiliates.
- Complete columns B, C, D, H, H.1, I, I.1, I.2 and L only if the payer corporation is connected.

Important instructions to follow if the payer corporation is connected

- If your corporation's tax year-end is different than that of the **connected** payer corporation, dividends could have been received from more than one tax year of the payer corporation. If so, **use a separate line** to provide the information according to each tax year of the payer corporation.
- When completing columns J, K and L use the special calculations provided in the notes.

	A Name of payer corporation (from which the corporation received the dividend)	A1	B Enter 1 if payer corporation is connected	C Business number of connected corporation	D Tax year-end of the payer corporation in which the sections 112/113 and subsection 138(6) dividends in column F were paid YYYYMMDD	E Non-taxable dividends under section 83

				total (amount 11 plus amount 1	1J	1K
Part I	V tax before deductions on taxable	divide	nds (other than eligible o	dividends) (amount 1H minus	amount 1K)	

- 1 If taxable dividends are received, enter the amount in column F, but if the corporation is not subject to Part IV tax (such as a public corporation other than a subject corporation as defined in subsection 186(3)), enter "0" in column K (and column J, if applicable). Life insurers are not subject to Part IV tax on subsection 138(6) dividends.
- If the connected payer corporation's tax year ends after the corporation's balance-due day for the tax year (two or three months, as applicable), you have to estimate the payer's dividend refund when you calculate the corporation's Part IV tax payable.
- 3 For eligible dividends received from connected corporations, Part IV tax on dividends is equal to column I divided by column H multiplied by column G.
- 4 For taxable dividends received from connected corporations, Part IV tax on dividends is equal to column I divided by column H multiplied by column F.
- 5 For the purpose of calculating your eligible refundable dividend tax on hand (ERDTOH), Part IV tax on taxable dividends received from connected corporations (with a tax year starting after 2018) is equal to the sum of Part IV tax on eligible dividends and non-eligible dividends received from connected corporations to the extent that such dividends caused a dividend refund to those corporations from their ERDTOH.

Part IV tax before deductions on taxable dividends received from connected corporations for purposes of column L is the sum of (i) and (ii), where

- (i) Part IV tax on eligible dividends received from connected corporations is equal to amount CC of the connected payer corporation (on page 7 of the T2 return) divided by line 465 of the connected payer corporation, multiplied by column G; and
- (ii) Part IV tax on non-eligible dividends received from **connected** corporations is equal to amount II of the **connected** payer corporation (on page 7 of the T2 return) **divided** by line 470 of the **connected** payer corporation, **multiplied** by the difference between columns F and G.

Schedule 5

Corporation's name	Business Number	Tax year-end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

- Use this schedule if any of the following apply to your corporation during the tax year:
 - it had a permanent establishment in more than one jurisdiction (corporations that have no taxable income should only complete columns A, B, and D in Part 1)
 - it is claiming provincial or territorial tax credits or rebates (see Part 2)
 - it has to pay taxes, other than income tax, for Newfoundland and Labrador or Ontario (see Part 2)
- All legislative references are to the federal Income Tax Regulations (the Regulations).
- For more information, see the T2 Corporation Income Tax Guide.

100				_ Enter the regulation that ap	plies (402 to 413).

Note 1: Permanent establishment is defined in subsection 400(2).

Note 2: For corporations other than those described under section 402, use the appropriate calculation described in the Regulations to allocate taxable income.

Notes:

- After determining the allocation of taxable income, you have to calculate the corporation's provincial or territorial tax payable. For more information on how to calculate the tax for each province or territory, see the instructions for Schedule 5 in the T2 Corporation – Income Tax Guide.
- 2. If your corporation has provincial or territorial tax payable, complete Part 2.
- 3. If your corporation is a member of a partnership and the partnership had a permanent establishment in a jurisdiction, select the jurisdiction in Column A and include your proportionate share of the partnership's salaries and wages and gross revenue in columns B and D, respectively.

Enter the total of column 22 on line 404 of Schedule 1.

Enter the total of column 23 on line 403 of Schedule 1.

- Note 3: If a class number has not been provided in Schedule II of the Income Tax Regulations for a particular class of property, use the subsection provided in Regulation 1101.
- Note 4: Include any property acquired in previous years that has now become available for use, net of any government assistance received or entitled to be received in the year from a government, municipality or other public authority, or a reduction of capital cost after the application of section 80. This property would have been previously excluded from column 3. List separately any acquisitions of property in the class that are not subject to the 50% rule.

 See Income Tax Folio S3-F4-C1, General Discussion of Capital Cost Allowance, for exceptions to the 50% rule.
- Note 5: A DIEP reported in column 4 is a property acquired after April 18, 2021, by a corporation that was a Canadian-controlled private corporation (CCPC) throughout the year, which became available for use in the tax year (before 2024) and was designated as such on or before the day that is 12 months after the filing-due date for the tax year to which the designation relates. It includes all capital property subject to the CCA rules, if certain conditions are met, other than property included in Classes 1 to 6, 14.1, 17, 47, 49, and 51. A property can only qualify as DIEP in the year in which it becomes available for use. See subsection 1104(3.1) of the Regulations for more information.
- Note 6: Enter in column 5, "Adjustments and transfers", amounts that increase or reduce the UCC (column 10). Items that increase the UCC include amounts transferred under section 85, or transferred on amalgamation or winding-up of a subsidiary. Items that reduce the UCC (show amounts that reduce the UCC in brackets) include assistance received or receivable during the year for a property, subsequent to its disposition, if such assistance would have decreased the capital cost of the property by virtue of paragraph 13(7.1)(f). See the T2 Corporation Income Tax Guide for other examples of adjustments and transfers to include in column 5.

 Also include property acquired in a non-arm's length transaction (other than by virtue of a right referred to in paragraph 251(5)(b) of the Act) if the property was a depreciable property acquired by the transferor until it was acquired by you.
- Note 7: Include all amounts of assistance you received (or were entitled to receive) after the disposition of a depreciable property that would have decreased the capital cost of the property by virtue of paragraph 13(7.1)(f) if received before the disposition.

Tillsonburg Hydro 2023 - PIL.223 2023-12-31 Tillsonburg Hydro Inc. 2024-04-29 13:13 2023-12-31 Tillsonburg Hydro Inc. 86374 2599 RC0001

Part 2 – CCA calculation (continued)

Note 8: Include all amounts you have repaid during the year for any legally required repayment, made after the disposition of a corresponding property, of:

- assistance that would have otherwise increased the capital cost of the property under paragraph 13(7.1)(d) and
- an inducement, assistance, or any other amount contemplated in paragraph 12(1)(x) received, that otherwise would have increased the capital cost of the property under paragraph 13(7.4)(b)

Include the UCC of each property of a prescribed class acquired in the course of a corporate reorganization described under paragraph 55(3)(b) of the Act (also known as "butterfly reorganization") or include property acquired in a non-arm's length transaction (other than by virtue of a right referred to in paragraph 251(5)(b) of the Act) if the property was a depreciable property acquired by the transferor less than 364 days before the end of your tax year and continuously owned by the transferor until it was acquired by you.

Note 9: For each property disposed of during the year, deduct from the proceeds of disposition any outlays and expenses to the extent that they were made or incurred for the purpose of making the disposition(s). The amount reported in respect of the property cannot exceed the property's capital cost, unless that property is a timber resource property as defined in subsection 13(21).

If the cost of a zero-emission passenger vehicle (or a passenger vehicle that was, at any time, a DIEP) exceeds the prescribed amount, the proceeds of disposition will be adjusted based on a factor equal to the prescribed amount as a proportion of the actual cost of the vehicle.

- Note 10: If the amount in column 5 (as shown in brackets) reduces the undepreciated capital cost, you must subtract it for the purposes of the calculation. Otherwise, add the amount in column 5 for the purposes of the calculation.
- Note 11: The only amounts incurred before April 19, 2021, to be included in this column are certain inventory purchases from arm's length persons or partnerships where the conditions in paragraphs 1100(0.3)(a) to (c) are met.
- Note 12: Immediate expensing applies to a DIEP included in column 11. The total immediate expensing for the tax year (total of column 12) should not exceed the lesser of:
 - 1. Immediate expensing limit: it is equal to one of the following five amounts, whichever is applicable:
 - \$1.5 million, if you are not associated with any other EPOP in the tax year
 - amount from line 125, if you are associated in the tax year with one or more EPOPs
 - nil, if the total of the percentages assigned in Part 1 is more than 100% or you are associated in the tax year with one or more EPOPs and have not filed an agreement in prescribed form as required under subsection 1104(3.3) of the Regulations
 - the amount determined under subsection 1104(3.5) of the Regulations for any second or subsequent tax years ending in a calendar year, if you have two or more tax years ending in the calendar year in which you are associated with another EPOP that has a tax year ending in that calendar year
 - any amount allocated by the minister under subsection 1104(3.4) of the Regulations

The immediate expensing limit has to be prorated if your tax year is less than 365 days. You cannot carry forward any unused amount of the immediate expensing limit.

- 2. UCC of the DIEP: total of column 11
- You have to maintain the CCPC status throughout the relevant tax year in order to claim the immediate expensing.
- Note 13: An AllP is a property (other than property included in Classes 54 to 56) that you acquired after November 20, 2018, and that became available for use before 2028.

Classes 54 and 55 include zero-emission vehicles that you acquired after March 18, 2019, and that became available for use before 2028.

Class 56 applies to eligible zero-emission automotive equipment and vehicles (other than motor vehicles) that are acquired after March 1, 2020, and that became available for use before 2028.

See the T2 Corporation Income Tax Guide for more information.

- Note 14: Include only elements from columns 6 and 7 that are not related to the DIEP.
- Note 15: The relevant factors for property of a class in Schedule II, that is an AIIP or included in Classes 54 to 56, available for use before 2024 are:
 - _ 2 1/3 for property in Classes 43.1, 54, and 56
 - _ 1 1/2 for property in Class 55
 - _ 1 for property in Classes 43.2 and 53
 - _ 0 for property in Classes 12, 13, 14, and 15, as well as properties that are Canadian vessels included in paragraph 1100(1)(v) of the Regulations (see note 20 for additional information) and
 - 0.5 for all other property that is an AIIP

 Tillsonburg Hydro 2023 - PIL.223
 2023-12-31
 Tillsonburg Hydro Inc.

 2024-04-29 13:13
 86374 2599 RC0001

¬ Part 2 – CCA calculation (continued)

- Note 16: The UCC adjustment for property acquired during the year (formerly known as the half-year rule or 50% rule) does not apply to certain property (including AIIP, property included in Classes 54 to 56, and property to which the immediate expensing was applied). Include only elements from columns 6 and 7 that are not related to the DIEP.

 For special rules and exceptions, see Income Tax Folio S3-F4-C1, General Discussion of Capital Cost Allowance.
- Note 17: Enter a rate only if you are using the declining balance method. For any other method (for example, the straight-line method, where calculations are always based on the cost of acquisitions), enter N/A. Then enter the amount you are claiming in column 23.
- Note 18: If the amount in column 10 is negative, you have a recapture of CCA. If applicable, enter the negative amount from column 10 in column 21 as a positive. The recapture rules do not apply to passenger vehicles in Class 10.1. However, they do apply to a passenger vehicle that was, at any time, a DIEP.
- Note 19: If no property is left in the class at the end of the tax year and there is still a positive amount in the column 10, you have a terminal loss. If applicable, enter the positive amount from column 10 in column 22. The terminal loss rules do not apply to:
 - passenger vehicles in Class 10.1
 - _ property in Class 14.1, unless you have ceased carrying on the business to which it relates
 - limited-period franchises, concessions, or licences in Class 14 if, at the time of acquisition, the property was a former property of the transferor or any similar property attributable to the same fixed place of business, and you had jointly elected with the transferor to have the replacement property rules apply, unless certain conditions are met
- Note 20: If the tax year is shorter than 365 days, prorate the CCA claim. Some classes of property do not have to be prorated. See the T2 Corporation Income Tax Guide for more information. For property in class 10.1 disposed of during the year, deduct a maximum of 50% of the regular CCA deduction if you owned the property at the beginning of the tax year. For AIIP listed below, the maximum first year allowance you can claim is determined as follows:
 - _ Class 13: the lesser of 150% of the amount calculated in Schedule III of the Regulations and the UCC at the end of the tax year (before any CCA deduction)
 - Class 14: the lesser of 150% of the allocation for the year of the capital cost of the property apportioned over the remaining life of the property (at the time the cost was incurred) and the UCC at the end of the tax year (before any CCA deduction)
 - Class 15: the lesser of 150% of an amount computed on the basis of a rate per cord, board foot, or cubic metre cut in the tax year and the UCC at the end of the tax year (before any CCA deduction)
 - _ Canadian vessels described under paragraph 1100(1)(v) of the Regulations: the lesser of 50% of the capital cost of the property and the UCC at the end of the tax year (before any CCA deduction)
 - Class 41.2: use a 25% CCA rate. The additional allowance under paragraphs 1100(1)(y.2) (for single mine properties) and 1100(1)(ya.2) (for multiple mine properties) of the Regulations is not eligible for the accelerated investment incentive. The additional allowance in respect of natural gas liquefaction under paragraph 1100(1)(yb) of the Regulations is eligible for the accelerated investment incentive.

The AIIP also apply to property (other than a timber resource property) that is a timber limit or a right to cut timber from a limit as well as to industrial mineral mine or a right to remove minerals from an industrial mineral mine. See the Income Tax Regulations for more detail.

Taxable Capital Employed in Canada – Large Corporations

Corporation's name	Business number	Tax year-end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

- Use this schedule in determining if the total taxable capital employed in Canada of the corporation (other than a financial institution or an insurance corporation) and its related corporations is greater than \$10,000,000.
- If the total taxable capital employed in Canada of the corporation and its related corporations is greater than \$10,000,000, file a completed Schedule 33 with your T2 Corporation Income Tax Return no later than six months from the end of the tax year.
- Unless otherwise noted, all legislative references are to the Income Tax Act and the Income Tax Regulations.
- Subsection 181(1) defines the terms financial institution, long-term debt, and reserves.
- Subsection 181(3) provides the basis to determine the carrying value of a corporation's assets or any other amount under Part I.3 for its capital, investment allowance, taxable capital, or taxable capital employed in Canada, or for a partnership in which it has an interest.
- If the corporation was a non-resident of Canada throughout the year and carried on a business through a permanent establishment in Canada, go to Part 4,
 Taxable capital employed in Canada.

Reserves that have not been deducted in calculating income for the year under Part I Capital stock (or members' contributions if incorporated without share capital) Retained earnings Contributed surplus Any other surpluses Deferred unrealized foreign exchange gains All loans and advances to the corporation All indebtedness of the corporation represented by bonds, debentures, notes, mortgages, hypothecary claims, bankers' acceptances, or similar obligations Any dividends declared but not paid by the corporation before the end of the year All other indebtedness of the corporation (other than any indebtedness for a lease) that has been outstanding for more than 365 days before the end of the year The total of all amounts, each of which is the amount, if any, in respect of a partnership in which the corporation held a membership interest at the end of the year, either directly or indirectly through another partnership (see note below) Subtotal (add lines 101 to 112) 12,626,190 101 103	Part 1 – Capital —

	Subtotal (add lines 101 to 112)	12,626,190	<u>12,626,190</u> A

Note:

Line 112 is determined by the formula (A – B) x C/D (as per paragraph 181.2(3)(g)) where:

- A is the total of all amounts that would be determined for lines 101, 107, 108, 109, and 111 in respect of the partnership for its last fiscal period that ends at or before the end of the year if
 - a) those lines applied to partnerships in the same manner that they apply to corporations, and
 - b) those amounts were computed without reference to amounts owing by the partnership
 - (i) to any corporation that held a membership interest in the partnership either directly or indirectly through another partnership, or
 - (ii) to any partnership in which a corporation described in subparagraph (i) held a membership interest either directly or indirectly through another partnership.
- B is the partnership's deferred unrealized foreign exchange losses at the end of the period,
- C is the share of the partnership's income or loss for the period to which the corporation is entitled either directly or indirectly through another partnership, and
- D is the partnership's income or loss for the period.

Deferred tax debit balance at the end of the year	2024-04-29 13:13			86374 2599 RC0001
Deferred tax debit balance at the end of the year Any deficit deducted in calculating its shareholders' equity (including, for this purpose, the amount of any provision for the redemption of preferred shares) at the end of the year To the extent that the amount may reasonably be regarded as being included in any of lines 101 to 112 above for the year, any amount deducted under subsection 135(1) in calculating income under Part I for the year, any amount deducted under subsection 135(1) in calculating income under Part I for the year, any amount deducted under subsection 135(1) in calculating income under Part I for the year. Deferred unrealized foreign exchange losses at the end of the year Subtotal (add lines 121 to 124) Part 2 — Investment allowance Add the carrying value at the end of the year of the following assets of the corporation: A share of another corporation A share of another corporation (other than a financial institution) A bond, debenture, note, mortgage, hypothecary claim, or similar obligation of another corporation (other than a financial institution) A dividend payable on a share of the capital stock of another corporation (other than a financial institution) A dividend payable on a share of the capital stock of another corporation A loan or advance to, or a bond, debenture, note, mortgage, hypothecary claim or similar obligation of, a partnership each member of which was, throughout the year, another corporation (other than a financial institution) A loan by the capital stock of another corporation (other than a financial institution) A loan or advance to, or a bond, debenture, note, mortgage, hypothecary claim or similar obligation of, a partnership each member of which was, throughout the year, another corporation (other than a financial institution) that was not exempt from tax under this Part (otherwise than because of paragraph 181.1(3)(d)), or another partnership described in paragraph 181.1(4)(d.11) An interest in a partnership (see note 2 below) Investment allowance for t	Part 1 – Capital (continued)

General Rate Income Pool (GRIP) Calculation

Corporation's name	Business number	Tax year-end Year Month Day
Tillsonburg Hydro Inc.	86374 2599 RC0001	2023-12-31

On: 2023-12-31

- If you are a Canadian-controlled private corporation (CCPC) or a deposit insurance corporation (DIC), use this schedule to determine the general rate income pool (GRIP).
- Credit unions are **not** required to complete this schedule.
- All legislative references are to the federal Income Tax Act and Income Tax Regulations.
- When an eligible dividend was paid in the tax year or there was a change in the GRIP balance, file a completed copy of this schedule with your T2 Corporation Income Tax Return. Do not send your worksheets with your return, but keep them in your records in case we ask to see them later.
- Subsection 89(1) defines the terms eligible dividend, excessive eligible dividend designation, general rate income pool, and low rate income pool.

┌ Eligibility for the various additions ────────────────────────────────────	
Answer the following questions to determine the corporation's eligibility for the various additions:	
2006 addition	
1. Is this the corporation's first taxation year that includes January 1, 2006?	Yes X No
2. If not, what is the date of the taxation year end of the corporation's first year that includes January 1, 2006? Enter the date and go directly to question 4	2006-12-31
3. During that first year, was the corporation a CCPC or would it have been a CCPC if not for the election of subsection 89(11) ITA?	Yes No
If the answer to question 3 is yes, complete Part "GRIP addition for 2006".	
Change in the type of corporation	
4. Was the corporation a CCPC during its preceding taxation year?	X Yes No
5. Corporations that become a CCPC or a DIC	Yes X No
If the answer to question 5 is yes, complete Part 4.	
Amalgamation (first year of filing after amalgamation)	
6. Corporations that were formed as a result of an amalgamation	Yes X No
If the answer to question 6 is yes, answer questions 7 and 8. If the answer is no, go to question 9.	
7. Was one or more of the predecessor corporations neither a CCPC nor a DIC?	Yes No
8. Was one or more of the predecessor corporation a CCPC or a DIC during the taxation year that ended immediately	
before amalgamation? If the answer to question 8 is yes, complete Part 3.	Yes No
if the answer to question o is yes, complete Fart 3.	
Winding-up	
9. Has the corporation wound-up a subsidiary in the preceding taxation year?	Yes X No
If the answer to question 9 is yes, answer questions 10 and 11. If the answer is no, go to Part 1.	
10. Was the subsidiary neither a CCPC nor a DIC during its last taxation year? If the answer to question 10 is yes, complete Part 4.	Yes No
11. Was the subsidiary a CCPC or a DIC during its last taxation year? If the answer to question 11 is yes, complete Part 3.	Yes No

┌ Part 1 – General rate income pool (GRIP)
GRIP at the end of the previous tax year
Taxable income for the year (DICs enter "0")*
Amount on line 400, 405, 410, or 428 of the T2 return, whichever is the least*
Subtotal (line 130 plus line 140) A
Income taxable at the general corporate rate (line 110 minus amount A) (if negative enter "0")
After-tax income (line 150 multiplied by 0.72 (the general rate factor for the tax year))
Eligible dividends received in the tax year
Dividends deductible under section 113 received in the tax year
Subtotal (line 200 plus line 210) B
Becoming a CCPC (amount W5 in Part 4) Post-amalgamation (total of amount E4 in Part 3 and amount W5 in Part 4) Post-wind-up (total of amount E4 in Part 3 and amount W5 in Part 4) Subtotal (add lines 220, 230, and 240) Subtotal (add lines 100, 190, 290, and amount B) 416,343 C
Eligible dividends paid in the previous tax year
Excessive eligible dividend designations made in the previous tax year
(If becoming a CCPC (subsection 89(4) applies), enter "0" on lines 300 and 310.)
Subtotal (line 300 minus line 310) D
GRIP before adjustment for specified future tax consequences (amount C minus amount D) (amount can be negative) 490 416,343
Total GRIP adjustment for specified future tax consequences to previous tax years (amount L3 in Part 2)
GRIP at the end of the tax year (line 490 minus line 560)
* For lines 110, 130, and 140, the income amount is the amount before considering specified future tax consequences. This phrase is defined in subsection 248(1). It includes the deduction of a loss carryback from subsequent tax years, a reduction of Canadian exploration expenses and Canadian development expenses that were renounced in subsequent tax years (for example, flow-through share renunciations), reversals of income inclusions where an option is exercised in subsequent tax years, and the effect of certain foreign tax credit adjustments.

Tillsonburg Hydro Inc. 86374 2599 RC0001

─ Part 3 – Worksheet to calculate the GRIP addition post-amalgamation or post-wind-up (predecessor or subsidiary was a CCPC or a DIC in its last tax year)
nb. 1 Post amalgamation Post wind-up
• Complete this part when there has been an amalgamation (within the meaning assigned by subsection 87(1)) or a wind-up (to which subsection 88(1) applies) and the predecessor or subsidiary corporation was a CCPC or a DIC in its last tax year. The last tax year for a predecessor corporation was its tax year that ended immediately before the amalgamation and for a subsidiary corporation was its tax year during which its assets were distributed to the parent on the wind-up.
• Calculate the GRIP addition of a successor corporation following an amalgamation at the end of its first tax year.
• Calculate the GRIP addition of a parent corporation upon wind-up at the end of the tax year that ends immediately after the tax year in which the parent has received the assets of the subsidiary.
• In the calculation below, corporation means a predecessor or a subsidiary. Complete a separate worksheet for each predecessor and each subsidiary that was a CCPC or a DIC in its last tax year. Keep a copy of this calculation for your records, in case we ask to see it later.
Corporation's GRIP at the end of its last tax yearA
Eligible dividends paid by the corporation in its last tax year B4
Excessive eligible dividend designations made by the corporation in its last tax year
Subtotal (amount B4 minus amount C4) D
GRIP addition post-amalgamation or post-wind-up (predecessor or subsidiary was a CCPC or a DIC in its last tax year) (amount A4 minus amount D4)
After you complete this calculation for each predecessor and each subsidiary, calculate the total of all the E4 amounts. Enter this total amount on: — line 230 for post-amalgamation; or
line 240 for post-wind-up.

Part 4 – Worksheet to calculate the GRIP addition (predecessor or subsidiary was not a CCF or the corporation is becoming a CCPC		
nb. 1 Corporation becoming a CCPC Post ama	algamation Post wind-up	
 Complete this part when there has been an amalgamation (within and the predecessor or subsidiary was not a CCPC or a DIC in its year. The last tax year for a predecessor corporation was its tax y its tax year during which its assets were distributed to the parent 	ts last tax year, or when a corporation has become a CCP year that ended immediately before the amalgamation and	C since the end of its previous tax

^{***} The adjusted Part IV tax multiplied by the multiplication factor before current-year loss carrybacks takes into account loss carrybacks that were made in prior taxation years. This amount is multiplied by the multiplication factor to help you determine the loss amount that must be used to reduce Part IV tax payable to zero.
