Dear Ms. Marconi:

**Subject: Electricity Distribution Licence No. ED-2002-0556
2024 Electricity Distribution Rate Application (EB-2024-0035) - Draft
Decision and Rate Order**

On November 13, 2024, Hydro Ottawa Limited ("Hydro Ottawa") submitted an update ("Update Application") to its 2025 annual electricity distribution rate application to incorporate specific annual and mid-term adjustments as agreed to as part of its five-year Custom Incentive Rate-setting ("Custom IR") plan.

Hydro Ottawa has reviewed the Ontario Energy Board's (OEB) draft Distribution Rate Order (DRO) received on December 3, 2024. This application seeks approval for electricity distribution rates, and other charges, effective January 1, 2025. Hydro Ottawa confirms that the rates outlined in Schedule A of the DRO are complete and accurate.

Subsequent to Hydro Ottawa receiving its draft decision, the OEB released the 2025 Regulatory charges (RRRP and WMS) Decision on December 10, 2024. As a result of this update, Hydro Ottawa is submitting an updated OEB tariffs of rates and charges workform as well as the Drycore calculations. With the updated regulatory charge, the monthly total bill increase for a residential customer consuming 750 kWh is \$0.16.

In addition, we are submitting a final OEB revenue requirement workform that includes values under the "Per Board Decision" section, which remain unchanged from the "Initial Application" values, as no adjustments were necessary.

The following updated/revised models are attached:

- Attachment 6-1-1 (A) Updated OEB Workform - 2025 Revenue Requirement (FINAL)
- Attachment 8-7-1(A) RRRP Update - Drycore Calculations
- Attachment 8-10-1(A) RRRP Update - OEB Workform - 2024 Current and 2025 Proposed Tariff of Rates and Charges

Please do not hesitate to contact me if you require anything further.

Yours truly,

Signed by:
