## INTRODUCTION AND PROCESS

EPCOR Natural Gas Limited Partnership (EPCOR) filed an application with the Ontario Energy Board (OEB) on December 9, 2024 for an order approving just and reasonable rates and other charges for the sale of natural gas commencing January 1, 2025 for its Aylmer service area (the Application). The purpose of the Application is to set rates to pass-through to customers the market price of the natural gas commodity. EPCOR does not make a profit on the sale of the natural gas commodity to its customers.

An interim rate order was issued on December 3, 2024, for EPCOR's natural gas distribution rates and other charges that declared EPCOR's rates interim as of January 1, 2025, including removal of rate riders expiring December 31, 2024.<sup>1</sup>

The Application was made pursuant to section 36(1) of the *Ontario Energy Board Act, 1998* and in accordance with the Quarterly Rate Adjustment Mechanism (QRAM) established by the OEB for dealing with changes in natural gas costs.<sup>2</sup>

EPCOR provided written evidence in support of the proposed changes. EPCOR provided the Application to all parties of record in EPCOR Aylmer's last major rates proceeding.<sup>3</sup>

Parties and OEB staff wishing to file questions or comments on the Application were required to file these questions or comments with the OEB by December 14, 2024.

On December 12, 2024, OEB staff requested that EPCOR elaborate on the need for additional volumes from a newly proposed Local Production (E) and confirm the heat value used in the application.

On December 16, 2024, EPCOR filed its response. In the response, EPCOR noted that additional volumes of gas are needed for a large industrial customer and that EPCOR was seeking approval for the cost consequences of its Clearbeach contract from the time of commencement of the contract.

No other party filed questions or comments.

<sup>2</sup> EB-2008-0106

<sup>3</sup> EB-2018-0336

## FINDINGS

The OEB approves the Application as filed on an interim basis.

The QRAM is intended to strike a balance between ensuring that consumers are receiving appropriate price signals which reflect natural gas market prices, and protecting the interest of consumers that purchase their gas from the distributor by reducing, to some extent, the volatility in the price of natural gas. Natural gas commodity prices charged by EPCOR are based on:

- a market price forecast for the commodity over the next 12 months
- a true-up between actual and forecast commodity prices for prior periods as actual costs are passed on to customers without a mark-up.

EPCOR's Aylmer rates will be adjusted effective January 1, 2025 to reflect an increase in forecast natural gas prices.

EPCOR procures natural gas for its system gas customers in the Aylmer service area from Enbridge Gas Inc. (Enbridge Gas) and local producers. EPCOR is itself a system gas customer of Enbridge Gas. As such, EPCOR pays Enbridge Gas in accordance with the rates that are approved in Enbridge Gas's own QRAM proceedings. In addition, the formula for the price paid to local producers takes into account Enbridge Gas's approved rates including for the new Local Production (E).

The OEB notes that there are other related proceedings associated with EPCOR's proposed new Local Production (E)<sup>4</sup> and the OEB will therefore provide interim approval of the cost consequences in line with the interim nature of this Decision and Order.

For the purpose of this interim decision, the OEB finds that the proposed gas commodity charge is set appropriately to reflect the change in the Purchased Gas Commodity Variance Account (PGVCA) reference price and the change in the recovery amount for inventory revaluation recorded in the Gas Purchase Rebalancing Account (GPRA). The PGCVA reference price is adjusted, effective January 1, 2025, based on: (a) the estimated accumulated balance in the account as of the end of December 2024; and (b) the forecasted cost of natural gas over the next 12-month period. The PGCVA reference price is set to bring the PGCVA balance to nearly zero over a 12-month period. The GPRA recovery amount is also set to bring the GPRA balance to nearly zero over a 12-month period.

---

<sup>4</sup> EB-2024-0130; EB-2024-0239; and EB-2024-0139

The total annual bill impact for a typical Aylmer residential customer who purchases their gas supply from EPCOR is a decrease of approximately \$5.70 or 0.5%.

As per the Decision and Interim Rate Order for the EPCOR Aylmer's 2025-2029 rates application, the proposed rates will remain interim pending the outcome of the OEB's final decision in that proceeding and potentially the outcome of other related proceedings.<sup>5</sup>

- e) Gas Supply Charge and System Gas Refund Rate Rider (if applicable) Schedule A

f) Overrun Gas Charges:

Overrun gas is available without penalty provided that it is authorized by the company in advance. The company will not unreasonably withhold authorization.

If, on any day, the customer should take, without the company's approval in advance, a volume of gas in excess of the maximum quantity of gas which the company is obligated to deliver to the customer on such day, or if, on any day, the customer fails to comply with any curtailment notice reducing the customer's take of gas, then,

- (i) the volume of gas taken in excess of the company's maximum delivery obligation for such day, or
- (ii) the volume of gas taken in the period on such day covered by such curtailment notice (as determined by the company in accordance with its usual practice) in excess of the volume of gas authorized to be taken in such period by such curtailment notice,

as the case may be, shall constitute unauthorized overrun volume.

Any unauthorized firm overrun gas taken in any month shall be paid for at the Rate 3 Firm Delivery Charge in effect at the time the overrun occurs. In addition, the Contract Demand level shall be adjusted to the actual maximum daily volume taken and the Demand Charges stated above shall apply for the whole contract year, including retroactively, if necessary, thereby requiring recomputation of bills rendered previously in the contract year.

Any unauthorized interruptible overrun gas taken in any month shall be paid for at the Rate 1 Delivery Charge in effect at the time the overrun occurs plus any Gas Supply Charge applicable.

For any unauthorized overrun gas taken, the customer shall, in addition, indemnify the company in respect of any penalties or additional costs imposed on the company by the company's suppliers, any additional gas cost incurred or any sales margins lost as a consequence of the customer taking the unauthorized overrun volume.

2. In negotiating the Monthly Interruptible Commodity Charge referred to in 1(c)(ii) above, the matters to be considered include:

- a) The volume of gas for which the customer is willing to contract;
- b) The load factor of the customer's anticipated gas consumption, the pattern of annual use, and the minimum annual quantity of gas which the customer is willing to contract to take or in any event pay for;
- c) Interruptible or curtailment provisions; and
- d) Competition.

3. In each contract year, the customer shall take delivery from the company, or in any event pay for it if available and not accepted by the customer, a minimum volume of gas as specified in the contract between the parties. Overrun volumes will not contribute to the minimum volume. The rate applicable to the shortfall from this minimum shall be 3.4003 cents per m<sup>3</sup> for firm gas and 5.8681 cents per m<sup>3</sup> for interruptible gas.

4. The contract may provide that the Monthly Demand Charge specified in Rate Section 1 above

shall not apply on all or part of the daily contracted firm demand used by the customer during the testing, commissioning, phasing in, decommissioning and phasing out of gas-using equipment for a period not to exceed one year (the transition period). In such event, the contract will provide for a Monthly Firm Delivery Commodity Charge to be applied on such volume during the transition of 5.9678 cents per m<sup>3</sup> and a gas supply commodity charge as set out in Schedule A, if applicable. Gas purchased under this clause will not contribute to the minimum volume.

<sup>(1)</sup> Aggregated within Monthly Fixed Charge is the amount of one dollar per month in accordance with Bill 32 and Ontario Regulation 24/19.

<sup>(2)</sup> The Federal Carbon Charge is only “applicable” to 20% of the natural gas volumes used by eligible greenhouses, reducing their effective Federal Carbon Charge rate.
