1 OVERVIEW

This is the Ontario Energy Board's (OEB) Decision and Order on an application filed by Atikokan Hydro Inc. (Atikokan Hydro) seeking approval for changes to the rates Atikokan Hydro charges for electricity distribution effective May 1, 2025.

Atikokan Hydro filed a settlement proposal (Settlement Proposal), dated March 20, 2025, that reflected a comprehensive settlement between Atikokan Hydro, Vulnerable Energy Consumers Coalition (VECC), and OEB staff, collectively the parties, on all issues included on the approved Issues List.¹

As OEB staff was a party to the settlement, it did not file a separate submission on the Settlement Proposal.

For the reasons described in this Decision and Order, the OEB approves the Settlement Proposal as filed.

As a result of this Decision and Order, it is estimated that a typical residential customer with a monthly consumption of 750 kWh could see a total bill decrease (excluding taxes and the Ontario Electricity Rebate) of approximately \$6.87 per month (4.8%).

¹ The Issues List approved in the <u>OEB's Decision on Issues</u> List dated February 4, 2025.

2 CONTEXT AND PROCESS

The OEB's Renewed Regulatory Framework for Electricity² and Handbook for Utility Rate Applications³ provide distributors with performance-based rate application options that support the cost-effective planning and efficient operation of a distribution network. This framework provides an appropriate alignment between a sustainable, financially viable electricity sector and the expectations of customers for reliable service at a reasonable price.

On October 30, 2024, Atikokan Hydro filed a cost of service application with the OEB under section 78 of the *Ontario Energy Board Act, 1998*. The application requested OEB approval of Atikokan Hydro's proposed electricity distribution rates for five years, using the Price Cap Incentive Rate-setting (Price Cap IR) option described in the *Renewed Regulatory Framework for Electricity*. Under the Price Cap IR option, with an approved 2025 Test Year, Atikokan Hydro will be eligible to apply to have its 2026-2029 rates adjusted mechanistically, based on inflation and the OEB's assessment of Atikokan Hydro's efficiency.

The application was accepted by the OEB as complete on November 13, 2024. The OEB issued a Notice of Hearing on November 21, 2024, inviting parties to apply for intervenor status. VECC was granted intervenor status and eligibility for cost awards.

The OEB issued Procedural Order No. 1 on December 16, 2024. This order established, among other things, the timetable for a discovery process and a settlement conference.

This proceeding participated in the OEB's pilot for new adjudicative process for very small utilities (the VSU pilot). This new process included a one-day Issues Meeting, held on January 15, 2025, in order for OEB staff and parties to discuss the application and seek agreement on (i) an Issues List for the application that sets out issues that are relevant to the application; and (ii) an Interrogatory Issues List that sets out issues that require further discovery.

On January 21, 2025, OEB staff filed an Issues List and a list of clarifications, updates and corrections to be made by Atikokan Hydro that had been agreed to by all parties for the OEB's consideration. The OEB approved the proposed Issues List and list of clarifications, updates and corrections on February 4, 2025. Atikokan Hydro responded

_

² Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach, October 18, 2012

³ Handbook for Utility Rate Applications, October 13, 2016.

to the list of clarifications, updates and corrections submitted by OEB staff and VECC on February 19, 2025.

A settlement conference was held on February 24-25 and re-convened on March 4, 2025. Atikokan Hydro, VECC, and OEB staff participated in the settlement conference. OEB staff was a party to the settlement. As part of the VSU pilot, the facilitator for the settlement conference was an OEB Commissioner.

Atikokan Hydro filed a Settlement Proposal covering all issues on March 20, 2025. The Settlement Proposal is attached as Schedule A to this Decision and Order.

3 DECISION ON THE SETTLEMENT PROPOSAL

The Settlement Proposal addresses all issues on the OEB's approved Issues List for this proceeding and represents a full settlement on all issues.

Key aspects of the Settlement Proposal are summarized below.

- A reduction to the as-filed base revenue requirement of \$1.74M by \$96k to \$1.64M
- Atikokan Hydro will comply with any orders or directions from the OEB resulting from the Cost of Capital Generic Proceeding that are applicable to Atikokan Hydro. Atikokan also agreed to use the OEB's long-term debt rate instead of the weighted average cost of long-term debt.
- A reduction to the as-filed 2025 net capital in-service additions of \$153k (24%), resulting in a 2025 in-service additions budget of \$482k.
- An increase of \$50k annually to the capital contributions budget from 2025-2029.
- Commitment by Atikokan Hydro to provide at its next Cost of Service application an in-house summary of its assets by asset type and the number of assets in each of its condition ratings based on data available at the time.
- A 2025 Operations, Maintenance & Administration (OM&A) expenditures envelope reduction of \$5k, resulting in a 2025 OM&A of \$1.34M.
- Commitment by Atikokan Hydro to internally investigate ways to improve or reduce its Activity and Program-Based Benchmarking (APB) OM&A unit costs and report back at its next Cost of Service application on the areas investigated and the results.
- A \$1,445 reduction to the as-filed 2025 PILs forecast, reducing it to NIL.
- A \$1,522 reduction to Other Revenue.
- An update to the 2025 demand forecast for the Street Lighting rate class from 1,058 kW to 956.52 kW, and an update to the 2025 demand forecast for the General Service > 50 to 4999 kW rate class from 46,637 kW to 44,938 kW.
- Disposition of Group 1 deferral and variance accounts (DVA) over a one-year period, and Group 2 DVAs over a two-year period.
 - Group 1 DVAs credit balance of \$36,847
 - Group 2 DVAs credit balance of \$228,450

 Atikokan Hydro's new rates will be effective on the same date that Atikokan Hydro is able to implement them, subject to May 1, 2025 being the earliest effective date permitted.

Findings

The OEB has reviewed the Settlement Proposal and finds that it reflects a reasonable outcome that balances the interests of Atikokan Hydro and its customers. Furthermore, the OEB finds that the Settlement Proposal is comprehensive, addressing all issues on the approved Issues List.

The OEB accepts the agreed-upon reductions to Atikokan Hydro's revenue requirement, capital expenditures, and OM&A envelope, as well as the commitments made regarding asset management and benchmarking improvements. These measures are expected to contribute to cost-effectiveness while ensuring continued reliable service. The OEB also finds that the proposed disposition periods for Group 1 and Group 2 deferral and variance accounts are appropriate.

Given the thorough consideration of all issues and the fair outcome for all parties, the OEB approves the Settlement Proposal as filed.

4 IMPLEMENTATION

As part of the Settlement Proposal, the parties agreed that new rates should be effective on the date that they are implemented.

Atikokan Hydro filed tariff sheets and detailed supporting material with the Settlement Proposal, including all relevant calculations showing the impact of the implementation of the Settlement Proposal on its revenue requirement, the allocation of the revenue requirement to its rate classes and the determination of the final rates and rate riders, including bill impacts. These tariff sheets included cost of capital parameters issued by the OEB on October 31, 2024.⁴

Subsequent to the Settlement Proposal filed by Atikokan Hydro, the OEB issued its Decision and Order in the generic Cost of Capital proceeding on March 27, 2025.⁵

The OEB understands that, to implement rates effective May 1, 2025, Atikokan Hydro requires a final rate order by **May 19, 2025**. The OEB is of the view that there is sufficient time to proceed with a draft rate order process that incorporates the final 2025 cost of capital parameters before that date. Unless Atikokan Hydro is not able to update its draft rate order to allow for implementation by **May 1, 2025**, it should file an updated draft rate order, incorporating the final 2025 cost of capital parameters, with detailed supporting material showing the impact of any required adjustments for the OEB's review and approval.

Alternatively, if Atikokan Hydro is not able to update its draft rate order to allow for implementation by **May 1, 2025**, it should advise the OEB of such by **April 1, 2025**, and continue to follow the requirements within the OEB's letter dated **October 31, 2024**, with respect to cost of capital parameter updates.⁶ In this case, no further updates to the models or tariff sheets will be required and the OEB will issue a final rate order in April 2025.

VECC is eligible to apply for cost awards in this proceeding. The OEB will make provision for VECC to file its cost claim at a later date.

⁴ EB-2024-0063, OEB Letter, 2025 Cost of Capital Parameters, October 31, 2024

⁵ EB-2024-0063, Decision and Order, March 27, 2025

⁶ EB-2024-0063, OEB Letter, October 31, 2024

5 ORDER

THE ONTARIO ENERGY BOARD ORDERS THAT:

- 1. The Settlement Proposal set out in Schedule A is approved.
- 2. Atikokan Hydro Inc. shall file a letter with the OEB advising as to whether it will be able to update the proposed Tariff of Rates and Charges to reflect the decision in the cost of capital generic proceeding by **April 1, 2025**.
- 3. If Atikokan Hydro Inc. is able to update the proposed Tariff of Rates and Charges, it shall file with the OEB and forward to VECC a draft rate order with the proposed Tariff of Rates and Charges by **April 7, 2025**. Atikokan Hydro Inc. shall also include customer rate impacts and detailed information in support of the calculation of final rates in the draft rate order.
- 4. If Atikokan Hydro Inc. updates the proposed Tariff of Rates and Charges, VECC and OEB staff may file any comments on the draft rate order with the OEB by **April 14**, **2025**.
- 5. If Atikokan Hydro Inc. updates the proposed Tariff of Rates and Charges, it may file with the OEB and forward to VECC, responses to any comments on its draft rate order by **April 22, 2025**.
- 6. Atikokan Hydro Inc. will file at its next Cost of Service application an in-house summary of its assets by asset type and the number of assets in each of its condition ratings based on data available at the time.
- 7. Atikokan Hydro Inc. will internally investigate, on a best-efforts basis, ways to improve or reduce its Activity and Program-Based Benchmarking OM&A unit costs and report back at its next Cost of Service application on the areas investigated and the results.

Please quote file number, **EB-2024-0008** for all materials filed and submit them in searchable/unrestricted PDF format with a digital signature through the <u>OEB's online</u> filing portal.

• Filings should clearly state the sender's name, postal address, telephone number and e-mail address.

- Please use the document naming conventions and document submission standards outlined in the <u>Regulatory Electronic Submission System (RESS)</u> <u>Document Guidelines</u> found at the <u>File documents online page</u> on the OEB's website.
- Parties are encouraged to use RESS. Those who have not yet <u>set up an account</u>, or require assistance using the online filing portal can contact registrar@oeb.ca for assistance.
- Cost claims are filed through the OEB's online filing portal. Please visit the <u>File</u>
 documents online page of the OEB's website for more information. All
 participants shall download a copy of their submitted cost claim and serve it on
 all required parties as per the <u>Practice Direction on Cost Awards</u>.

All communications should be directed to the attention of the Registrar and be received by end of business, 4:45 p.m., on the required date.

With respect to distribution lists for all electronic correspondence and materials related to this proceeding, parties must include the Case Manager, Petar Prazic at Petar.Prazic@oeb.ca and OEB Counsel, Lawren Murray at Lawren.Murray@oeb.ca.

- GA Analysis Workform
- Text Year Income Tax PILS Model
- Load Forecast Model
- Load Profile
- Cost Allocation Model
- DVA Continuity Schedule Model
- RTSR Workform Model
- Tariff Schedule and Bill Impact Model

SETTLEMENT PROPOSAL

Atikokan Hydro Inc. (the "Applicant" or "Atikokan") filed a Cost of Service application with the Ontario Energy Board (the OEB) on October 30, 2024 under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that Atikokan charges for electricity distribution, to be effective May 1, 2025 (OEB file number EB-2024-0008) (the "Application").

The OEB issued a completeness letter November 13, 2024 and published a Notice of Hearing dated November 21, 2024.

The OEB also issued a Letter of Direction and Notice of Application on November 21, 2024. In Procedural Order No. 1, dated December 16, 2024, the OEB approved the request of the Vulnerable Energy Consumers Coalition (VECC) to be an intervenor in this proceeding. The Procedural Order also indicated the prescribed dates for a one-day Issues Day meeting, and a settlement conference.

On January 13, 2025, the OEB issued a direction that OEB staff would be a party to the settlement conference and to any resulting settlement proposal.

All parties (i.e, OEB staff, VECC and Atikokan) participated in a one-day Issues Day meeting held January 15, 2025.

On January 21, 2025, OEB staff, on behalf of all the parties, submitted a proposed issues list to the OEB for approval. The OEB approved the Issues List on February 4, 2025. The OEB also accepted the mutually agreed to list of evidentiary clarifications, updates and corrections to be made by Atikokan (commitment responses).

Atikokan filed its commitment responses with the OEB on February 19, 2025.

A settlement conference was convened virtually on February 24-25 and March 4, 2025 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's *Practice Direction on Settlement Conferences* (the "Practice Direction").

Atikokan and the following participated in the Settlement Conference

- VECC.
- OEB staff

OEB Commissioner Allison Duff acted as a facilitator for the Settlement Conference.

Atikokan, VECC and OEB staff (collectively the "Parties"), reached a full settlement regarding Atikokan's 2025 Cost of Service Application. The details and specific components of the settlement are detailed in this Settlement Proposal.

This document is called a "Settlement Proposal" as this is a proposal by the Parties presented to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and is binding and enforceable in accordance with its terms. As set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms herein.

The Parties acknowledge that the Settlement Conference is privileged and confidential in accordance with the Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's *Practice Direction on Confidential Filings* and the rules of that latter document do not apply. Instead, in the Settlement Conference, and in this Agreement, the Parties have interpreted "confidential" to mean that the documents and other information provided during the course of the Settlement Conference, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the Settlement Conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the Settlement Conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not in attendance via video conference at the Settlement Conference but were a) any persons or entities that the Parties engage to assist them with the Settlement Conference, and b) any persons or entities from whom

they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include a) additional information included by the Parties in this Settlement Proposal, and b) the Appendices to this document. The supporting Parties for each settled issue, as applicable, agree that the evidence in respect of that settled issue, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context otherwise requires, include, in addition to the Application, the commitment responses, and all other components of the record up to and including the date hereof, including additional information included by the Parties in this Settlement Proposal and the Attachments to this document.

Included with the Settlement Proposal are Attachments that provide further support for the proposed settlement. The Parties acknowledge that the Attachments were prepared by Atikokan. While VECC and OEB staff have reviewed the Attachments, they are relying on the accuracy of the underlying evidence in entering into this Settlement Proposal.

For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List.

The Parties are pleased to advise the OEB that a complete settlement with respect to all of the issues in this proceeding was reached, specifically:

| Description | Number of issues settled |
|--|--------------------------|
| "Complete Settlement "means an issue for which complete settlement was reached by all Parties, and if this Settlement Proposal is accepted by the OEB, the Parties will not adduce any evidence or argument during the hearing in respect of these issues. | All |
| "Partial Settlement" means an issue for which there is partial settlement as Atikokan and the other Parties who take any position on the issue were able to agree on some but not all aspects of the particular issues. If this Settlement Proposal is accepted by the OEB, the Parties will only adduce evidence and/or argument during the hearing on those portions of the issue for which no agreement has been reached. | Not Applicable |
| "No Settlement" means an issue for which no settlement was reached. Atikokan and the other Parties who take a position on the issue will adduce evidence and/or argument at the hearing on the issue. | Not Applicable |

Atikokan Hydro Inc EB-2024-0008 Settlement Proposal

Per the Practice Direction (p.2), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. These adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does not accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

If the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all Parties who took a position on an issue must agree with any revised Settlement Proposal as it relates to that issue prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not Atikokan is a party to such proceeding, so long as no Party shall take a position that would result in this Settlement Proposal not applying in accordance with the terms contained herein.

Where in this Agreement, the Parties "accept" the evidence of Atikokan, or "agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

SUMMARY

The Parties have reached a complete settlement on all aspects of the Application with respect to capital costs, operations, maintenance & administration (OM&A) costs, revenue requirement-related issues, including the accuracy of the revenue requirement determination and the application of OEB policies and practices.

In reaching this Settlement, the Parties have been guided by the Filing Requirements for 2025 rates and the Approved Issues List.

The Settlement Proposal, if accepted, results in a total bill decrease of \$6.87 or 4.80% per month for the typical residential customer consuming 750 kWh per month.

The financial impact of the Settlement Proposal is to reduce the base revenue requirement requested of \$1,817,018 by \$174,295 to \$1,642,723.

The Parties agree that Atikokan's new rates should be effective on the same date that Atikokan is able to implement them, subject to May 1, 2025, being the earliest effective date that will be permitted. The proposed new rates can be implemented for May 1, 2025, by Atikokan if approved by the OEB before May 19, 2025, which is the date the May consumption billing process begins.

The Parties note that this Settlement Proposal includes all tables, appendices and the live Excel models that represent the evidence and the settlement between the Parties at the time of filing the Settlement Proposal.

A Revenue Requirement Work Form, incorporating all terms that have been agreed to is filed as Appendix A to the Settlement Proposal. Through the settlement process, Atikokan has agreed to certain adjustments to its original Application evidence. The changes are described in the following sections.

Atikokan has provided the following tables summarizing the Application and highlighting the changes to its Rate Base and Capital, OM&A Expenses and Revenue Requirement from Atikokan's original Application evidence, the commitment responses and this Settlement Proposal.

Based on the above, and the evidence and rationale provided below, the Parties accept this Settlement Proposal as appropriate and recommend its acceptance by the OEB. Tables 2 and 3 below illustrate the updated bill impacts that would result from the acceptance of this Settlement Proposal. The updated bill impacts are also included in Appendix D of this proposal.

Table 2 - 2025 Summary of Total Bill Impacts

1. Capital Spending and Rate Base

1.1 Are the proposed capital expenditures and in-service additions appropriate?

Full Settlement

The Parties agree to Atikokan's proposed 2025 capital expenditures and 2025 net capital inservice additions for the purpose of setting rates, subject to adjustments in settlement.

Atikokan filed for \$634,274 in 2025 net capital expenditures. As part of the commitment responses, Atikokan updated the 2024 rate base for the 2024 audited capital spending and depreciation, thereby adjusting the opening balances of the test year. The 2025 test year project costs in-service additions were also updated as part of the commitment responses. In addition, the Parties agree to the following adjustments through settlement:

- Atikokan to reduce its System Renewal 2025 capital spend by \$15,000.
- Atikokan to include an additional \$50,000 in capital contributions for 2025. While Atikokan had no plans of capital contributions in its prior cost of service, for its distribution system plan period, Atikokan received an annual average capital contribution of \$50,000 for the historical years of 2019 through 2023. The Parties agree it was reasonable for Atikokan to receive an additional \$50,000 in the test year. The Parties also agree to include an additional \$50,000 annually to 2026 through 2029. Atikokan's added these contributions to System Renewal.
- Atikokan to increase the 2025 test year capital expenditures by an additional \$5,038 to include distribution station equipment upgrades as listed in Commitment Response 1b. Atikokan Hydro had inadvertently omitted the expenditure from its capital expenditure plan models as part of its commitment responses.

The following table summarizes the agreed upon capital expenditures and in-service additions for the test year by Category - net of any capital contributions.

Table 4 – 2025 Capital Expenditures/In-Service Additions

| Particulars | Application (a) | Commitment Responses (b) | Variance (c) = (b)-(a) | Settlement (d) | Variance (e) = (d)- (b) |
|-------------------|-----------------|--------------------------------|---------------------------|----------------|----------------------------|
| System Access | \$165,274 | \$180,548 | \$15,274 | \$180,548 | \$0 |
| System Renewal | \$185,000 | \$185,000 | \$0 | \$175,038 | (9,962) |
| System Service | \$200,000 | \$565,000 | \$365,000 | \$565,000 | \$0 |

| General | \$384,000 | \$384,000 | \$0 | \$384,000 | \$0 |
|---------------|-------------|-------------|-------------|-------------|------------|
| Plant | | | | | |
| Total | \$934,274 | \$1,314,548 | \$380,274 | \$1,304,586 | (\$9,962) |
| Expenditures | | | | | |
| Capital | | | | | |
| Contributions | (\$300,000) | (\$773,000) | (\$473,000) | (\$823,000) | (50,000) |
| Net Capital | | | | | |
| Expenditures | \$634,274 | \$541,548 | (\$92,726) | \$481,586 | (\$59,962) |

The Parties accept the evidence of Atikokan that the level of planned capital expenditures over the course of its Distribution System Plan and the rationale for planning and pacing choices are appropriate to maintain system reliability, service quality objectives and reliable and safe operations of the distribution system. The net 2025 test year in-service additions budget of \$482k is 73% greater than the net historical average in-service additions of \$279k (2017-2024). The increase in the 2025 test year budget is attributable to the purchase of a backyard track machine for \$350k. The Parties believe this expenditure is prudent given Atikokan's assertion that the truck will allow for better access to cut trees as well as better access to some off-road poles that are inaccessible with Atikokan's current fleet.¹

Atikokan indicates it has age data related to its assets but has less information on its condition ratings by asset type and no data was provided in this application. At its next Cost of Service application, Parties agreed that Atikokan has committed to providing a summary of assets by asset type and the number of assets in each of its condition ratings based on data available at the time. The Parties agree that the summary can be done in-house to avoid third-party costs using Atikokan's asset management data.²

ΑII

1.2 Are the proposed rate base and depreciation amounts appropriate?

Full Settlement

The Parties accept that the updated rate base and depreciation amounts adjusted to reflect various aspects of the proposed Settlement, are appropriate.

Changes in rate base and depreciation in the Settlement Proposal resulted from settlement on all issues that were flowed through to depreciation and rate base calculations.

The Parties agree to the updated depreciation expense which reflects the updated 2025 opening fixed assets updated for the 2024 additions and updated 2025 in-service capital additions.

The Parties agree that the working capital calculations have been appropriately determined in accordance with OEB policies and practices. Atikokan utilizes the OEB default allowance for working capital of 7.5% of the sum of cost of power and controllable expenses.

The Parties accept the evidence that the rate base calculations, after making the adjustments as detailed in this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices. Table 5 below outlines Atikokan's Rate Base calculation.

Table 5 - 2025 Rate Base

| Particulars | Application (a) | Commitment Responses (b) | Variance (c) = (b)-(a) | Settlement (d) | Variance (e) = (d)-(b) | | | | | | |
|--------------------------------|-----------------|-----------------------------|---------------------------|----------------|------------------------|--|--|--|--|--|--|
| | | | | | | | | | | | |
| Gross Fixed Assets (avg) | \$8,290,346 | \$8,200,375 | (\$89,971) | \$8,167,875 | -\$32,500 | | | | | | |
| Accumulated Depreciation (avg) | -\$4,816,116 | -\$4,824,455 | \$8,339 | -\$4,703,692 | \$120,763 | | | | | | |
| Net Fixed Assets (avg) | \$3,474,230 | \$3,375,920 | (\$98,310) | \$3,464,184 | \$88,264 | | | | | | |
| Allowance for Working Capital | \$339,393 | \$335,229 | -\$4,164 | \$339,115 | \$3,886 | | | | | | |
| Total Rate Base | \$3,813,623 | \$3,711,150 | (\$102,474) | \$3,803,298 | \$92,149 | | | | | | |

Table 6 - 2025 Depreciation Expense

| Particulars | | Commitment Responses (b) | ` ' | Settlement (d) | Variance (e) = (d)-(b) |
|----------------------|-----------|-----------------------------|-----------|----------------|---------------------------|
| Depreciation Expense | \$247,835 | \$204,780 | -\$43,055 | \$205,111 | \$305,331 |

- While capital spending was reduced during settlement, depreciation increased by \$331;
 the net of the two following adjustments: Decrease of \$166 for removal of \$15,000 in system renewal CAPEX
- Increase of \$497 for computer software fully amortized

2. OM&A

2.1 Are the proposed OM&A expenditures appropriate?

Full Settlement

The Parties agree that Atikokan will reduce its proposed OM&A expenses in the 2025 Test Year by \$5,000, resulting in a 2025 Test Year OM&A Budget of \$1,335,301.

The Parties also agree that Atikokan will manage its OM&A budget as it sees fit. Atikokan has applied the \$5,000 reduction in operations for purposes of the settlement.

As shown below, Total 2025 Settlement Test Year OM&A Expenses have increased by \$202,354 compared to the 2017 Actuals, representing an annual growth rate of approximately 2.23%. It is expected that Atikokan will remain in Group 3 productivity rating in 2025.

The Parties have also agreed that, on a best-efforts basis, Atikokan will internally investigate ways to improve or reduce its Activity and Program-Based Benchmarking (APB) unit costs in Table 13 at Exhibit 1 Page 33 and report back at its next Cost of Service application on the areas investigated and the results.

3. Cost of Capital, PILS, and Revenue Requirement

3.1 Is the proposed cost of capital (interest on debt, return on equity) and capital structure appropriate?

Full Settlement

The Parties agree to the cost of capital parameters issued by the OEB set out below in Table 8. Parties have also agreed to use the OEB's long term debt rate instead of the weighted average cost of long term debt rate.

Table 8 - 2025 Cost of Capital

| Capital Structure: | Application (a) | Commitment Responses (b) | Settlement (c) | Settlement Dollars (d) |
|---|-----------------|-----------------------------|----------------|---------------------------|
| Long-term debt Capitalization Ratio (%) | 56.0% | 56.0% | 56.0% | \$2,129,847 |
| Short-term debt Capitalization Ratio (%) | 4.0% | 4.0% | 4.0% | \$152,132 |
| Common Equity Capitalization Ratio (%) | 40.0% | 40.0% | 40.0% | \$1,521,319 |
| Preferred Shares Capitalization Ratio (%) | 0.0% | 0.0% | 0.0% | |
| | 100.0% | 100.0% | 100.0% | \$3,803,298 |
| | | | | |
| Cost of Capital | | | | |
| Long-term debt Cost Rate (%) | 6.70% | 4.66% | 4.66% | \$2,129,847 |
| Short-term debt Cost Rate (%) | 6.23% | 5.04% | 5.04% | \$152,132 |
| Common Equity Cost Rate (%) | 9.21% | 9.25% | 9.25% | \$1,521,319 |
| TOTAL | | 6.51% | 6.51% | \$3,803,298 |

The Parties agree that Atikokan Hydro will comply with any orders or directions from the OEB resulting from the Cost of Capital Generic Proceeding that are applicable to Atikokan Hydro. The Parties agree that Atikokan Hydro shall: (a) use the interim cost of capital parameters and the deferral and variance accounts from the OEB letter dated October 31, 2024 from EB-2024-0063; and (b) shall use the interim deemed short term debt rate and deferral and variance

account established in the OEB letter dated July 26, 2024 to capture the revenue requirement impact from the changes to the deemed short term debt rate described therein.

3.2 Is the proposed PILS (or Tax) amount appropriate?

Full Settlement

For the purposes of settlement of all the issues in this proceeding, and subject to the other adjustments arising in this Settlement Proposal, the Parties accept the evidence of Atikokan that its forecast PILs, as updated for the settlement agreement is appropriate and has been correctly determined in accordance with OEB accounting policies and practices.

The parties accept Atikokan's calculations of forecast PILs in this Settlement Proposal resulting in NIL PILS embedded in rates.

A summary of the adjusted PILs to use accelerated CCA in the test year is presented in Table 9 below.

Table 9 - 2025 Payment in Lieu of Taxes

| Particulars | Application (a) | Commitment Responses (b) | Variance (c) = (b)-(a) | Settlement (d) | Variance (e) = (d)- (b) |
|-------------------|-----------------|-----------------------------|---------------------------|----------------|-------------------------------|
| PILs (Grossed up) | \$1,445 | \$0 | -\$1,445 | \$0 | \$0 |

An updated PILs Model has been submitted in Live Excel format as part of this Settlement Proposal.

3.3 Is the proposed Other Revenue forecast appropriate?

Full Settlement

The Parties accept the evidence provided by Atikokan that its proposed Other Revenues are appropriate and have been correctly determined in accordance with OEB accounting policies and practices.

The Parties agree to other revenue income of \$174,295, net of the following settlement adjustments.

Table 10 - Other Revenue Settlement Adjustments

| Other Income | Application | Commitment | Variance | Settlement | Variance | Change |
|---|-------------|------------------|-----------------|-----------------|------------------|--|
| Account | (a) | Responses (b) | (c)=(b)- (a) | (d) | (e) =(d)- (b) | Explanation |
| 4210 - Rent from Electric Property | \$61,615 | \$64,174 | \$2,559 | \$64.174 | \$0 | Correction to pole attachment revenue to account for 2025 test year Board Approved attachment rate |
| 4245 - Government & Other Assistance Income | \$30,726 | \$30,726 | \$0 | \$33,204 | \$2,478 | Deferred revenue adjusted for agreed contributions for the test year |
| 4405 - Interest and Dividend Income | \$18,000 | \$18,000 | \$0 | \$14,000 | \$(4,000) | Exclusion of DVA Interest |
| | | | \$2,559 | Net Variance | \$-1,522 | |

The breakdown of the agreed other revenue is summarized in Table 11 below.

Table 11- 2025 Summary of Other Revenues

| | Application (a) | Commitment Responses (b) | Variance (c) = (b)-(a) | Settlement (d) | Variance (e) = (d)-(b) |

4. Load Forecast

4.1 Is the proposed load forecast methodologies and the resulting load forecasts appropriate?

Full Settlement

The Parties agree that the updated load forecast provided in the commitment responses is appropriate for the purpose of setting rates. The updated load forecast filled with this Settlement Proposal includes incorporating actual consumption and customer count data for 2024 that was not filed with the original application as it was unavailable at the time of filing. Further, the Parties agree that the pre-established Street Lighting demand values for 2025 would be used in the load forecast given the absolute certainty of the preset values producing an accurate as possible forecast. The details of the billing determinate updates are provided in Table 13 through Table 15 below.

5. Cost Allocation, Rate Design, and Other Charges

5.1 Are the proposed cost allocation methodology, allocations, and revenue-to-cost ratios, appropriate?

The Parties accept the evidence of Atikokan that, subject to the adjustments identified below, the cost allocation methodology, allocations and revenue-to-cost ratios are appropriate.

Atikokan agrees to balance its revenue requirement across customer classes by moving the revenue to cost ratios to the edge of the OEB range, if outside of the range, and then beginning with the lowest revenue to cost ratios, as determined by the cost allocation model, increasing it until it matches the next lowest revenue to cost ratio, then continuing to increase each in this manner until the revenue requirement is balanced.

Further, the Parties agree that, because Atikokan has sub-transmission lines, the sub-transmission asset value from the primary asset account 1830 should be allocated to sub-transmission asset account 1835 for calculation of the cost allocation model. This methodology is consistent with that used in Atikokan's previous 2017 Cost of Service Settlement Proposal.³ The balance of the assets in account 1830 are assumed to be 31.84% primary and 68.16% secondary.

Table 16 sets out the revenue to cost ratios settled upon by the Parties.

³ EB-2016-0056, Settlement Proposal, p. 31

Table 16 - Proposed 2025 Revenue to Cost Ratios

| | | Application | | Commi | tment Respo | nses | | Settlement | |
|--|----------------------|--------------------|--------|----------------------|--------------------|--------|----------------------|--------------------|--------|
| Rate Class | Calculated R/C Ratio | Proposed R/C Ratio | Var | Calculated R/C Ratio | Proposed R/C Ratio | Var | Calculated R/C Ratio | Proposed R/C Ratio | Var |
| Residential | 96.38% | 97.28% | 0.90% | 96.11% | 96.11% | 0.00% | 98.92% | 98.92% | 0.00% |
| General Service < 50 kW | 118.68% | 118.69% | 0.01% | 119.09% | 119.09% | 0.00% | 116.95% | 116.95% | 0.00% |
| General Service > 50 to 4999 kW | 83.20% | 83.21% | 0.01% | 82.82% | 84.32% | 1.50% | 84.88% | 85.07% | 0.19% |
| Street Lighting | 161.58% | 151.88% | -9.70% | 161.20% | 154.95% | -6.25% | 120.58% | 120.00% | -0.58% |

The Parties accept the evidence of Atikokan that all elements of the cost allocation methodology allocation and Revenue-to-Cost ratios have been correctly determined in accordance with OEB policies and practices. Further the proposed revenue-to-cost ratios for all rate classes are within the OEB policy range; 85-115% for residential and 80-120% respectively for all other rate classes.

The Parties further accept Atikokan's updated Load Profile demand allocators calculation and agree to the scaled demand allocators to the 2025 consumption forecast.

5.2 Is the proposed rate design, including fixed/variable splits, appropriate?

Full Settlement

The Parties agree to the rate design including fixed/variable splits included in the Settlement Proposal. The Parties also agree that for all rate classes, except for residential which is fully fixed, where the current fixed service charge is greater than the minimum Peak Load Carrying Capability (PLCC), the current fixed service charge would be maintained, and the volumetric variable rate would be adjusted accordingly. The Parties further agree to keep the fixed service charges for the GS > 50, GS < 50 and Street Lighting customer classes at the 2024 OEB's approved rates and adjust the volumetric rates accordingly, in accordance with OEB Policy.⁴

Table 19 - Summary of 2025 Fixed to Variable Split

| Rate Class | Application | | Settleme | nt Proposal |
|---------------------------------|-------------|------------|----------|-------------|
| | Fixed % | Variable % | Fixed % | Variable % |

5.4 Are the proposed loss factors Appropriate?

Full Settlement

The Parties agree to the Loss Factors proposed in settlement.

The Parties acknowledge that the Application proposed Total Loss Factor of 1.0742 was based on the five-year historical average of 2019 through 2023 per the filing requirements but the most recent 5-year average of 2020 through 2024 was consistent with the load forecast being updated to include the 2024 actual consumption and customer count/connections. As a result, the Parties believe that using the most current historical 5-year average for rate setting purposes is most appropriate.

Table 18 - 2025 Loss Factor

| Particulars | Application (a) | Commitment Responses (b) | Variance (c) = (b)-(a) | Settlement (d) | Variance (e) = (d)-(b) |

6. Deferral and Variance Accounts

6.1 Are the proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts, request for discontinuation of accounts, and continuation of existing accounts, appropriate?

Full Settlement

The Parties agree that Atikokan's proposal for deferral and variance accounts including balances in the existing accounts and their disposition, request for new accounts, requests for disposition of accounts, and the continuation of existing accounts appropriate on a final basis, subject to the following adjustments:

- the Pole Attachment variance (1508) account should be forecast to the end of April 30, 2025; disposed on final basis and account closed.
- while currently Atikokan has no costs recorded in a Cloud Computing Implementation Costs Deferral Account and no present need for an account is required; this Settlement Proposal does not preclude Atikokan from coming forward with a request to establish such an account should Atikokan implement cloud computing prior to its next Cost of Service application.
- The GA Workform was adjusted from the original Application evidence to correct clerical errors with 1589 within the unresolved difference.
- Gross up 1592 CCA Change variances previously recorded up to December 31, 2023 balances
- discontinue use of the Retail Cost variance (1518) account
- discontinue use of the STR Retail Cost variance (1548) account

The Parties further agree to the default disposition period of 12 months for the deferral and variance accounts to be cleared in the Application except for group 2 deferral and variance accounts, which are being cleared over 24 months.

7. Other

7.1 Is the proposed effective date appropriate?

Full Settlement

The Parties agree that Atikokan's new rates should be effective on the same date that Atikokan is able to implement them, subject to May 1, 2025 being the earliest effective date that will be permitted. It is the Parties' expectation that there should be sufficient time for Atikokan to implement rates effective May 1, 2025, should it receive approval of the final updated Rate Order on or before May 19, 2025.

| Utility Name | Atikokan Hydro Inc. | |
|--------------------|-----------------------|--|
| Service Territory | | |
| Assigned EB Number | EB-2025-0008 | |
| Name and Title | Jennifer Wiens, CEO | |
| Phone Number | 807-597-6600 | |
| Email Address | ien.wiens@athydro.com | |
| Test Year | 2025 | |
| Bridge Year | 2024 | |
| Last Rebasing Year | 2017 | |

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filled in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

Commencing with 2023 rate applications, the RRWF has been enhanced with an additional column, so that two stages of processing of an application (e.g. interrogatory responses and settlement agreement) between the initial application filing and the OEB decision and draft rate order ("Per Board Decision") can be used. Functionality of the RRWF is the same as in previous versions of the RRWF. (May 2022)

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

- Votes:

 General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each 50me Applicants may have a unique rate as a result of a lead-leg study. The default rate for cost of service applications is 7.5%, per the letter issued by the Board on June 3, 2015.

 Data in column E is for Applicants no singlenily feed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column 1 in Average of Rocumulated Depreciation at the beginning and end of the Test Year.

 Average of Rocumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.

 Select option from drop-down list by clicking on cell M12 or U12. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected. Beginning for 2023 two intermediates targes can be shown (e.g., Interrogatory Responses and Settlement Agreement).

 Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement

 Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement.

 The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study with supporting rationale could be provided.

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for numbers of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-B** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

| | Stage in Process: | Set | ttlement Agreement | | | | | | | | | | |
|---|---|---|---|---------------------------------|---|---|---------------------------------|---|---|--|---|----------------------|---------------------------------|
| | Customer Class | In | nitial Application | | Interr | rogatory Responses | | Settl | lement Agreement | | Pe | er Board Decision | |
| | Input the name of each customer class. | Customer / Connections Test Year average or mid-year | kWh Annual | kW/kVA ⁽¹⁾ Annual | Customer / Connections Test Year average or mid-year | kWh Annual | kW/kVA ⁽¹⁾ Annual | Customer / Connections Test Year average or mid-year | kWh Annual | kW/kVA ⁽¹⁾ Annual | Customer / Connections Test Year average or mid-year | kWh Annual | kW/kVA ⁽¹⁾ Annual |
| 3 | Residential General Servie Less than 50 kW General Service greater than 50 kW Street Lighting | 1,365 232 15 622 | 8,776,264 4,495,158 15,506,375 341,006 | 46,637 1,058 | 1,368 234 15 622 | 8,853,697 4,712,336 14,914,371 355,073 | 44,856 1,058 | 1,368 234 15 622 | 8,867,818 4,719,852 14,933,631 314,176 | 44,938 957 | | | |
| | Total | | 29,118,803 | 47,695 | | 28,835,477 | 45,914 | | 28,835,477 | 45,895 | | | |

Note s:

(1) Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Se

Settlement Agreement

A) Allocated Costs

| Name of Customer Class ⁽³⁾ From Sheet 10. Load Forecast | | ts Allocated from % evious Study ⁽¹⁾ | | | located Class Revenue couirement (1) (7A) | % |
|--|---------------|--|-------------------------------|----|--|---------|
| 1 Residential | \$ | 653,986 | 70.83% | \$ | 1,022,047 | 56.25% |
| 2 General Servie Less than 50 kW | \$ | 124,521 | 13.49% | \$ | 261,567 | 14.40% |
| General Service greater than 50 kW | \$ | 42,459 | 4.60% | \$ | 400,832 | 22.06% |
| 4 Street Lighting 5 6 7 8 9 0 1 1 2 3 4 5 6 7 7 8 | \$ | 102,412 | 11.09% | \$ | 132,571 | 7.30% |
| | \$ | 923 378 | 100.00% | \$ | 1.817.017 | 100 00% |
| Total | \$ Service | 923,378 Revenue Requirement | 100.00% ent (from Sheet 9) | \$ | 1,817,017 | 100.00% |

⁽¹⁾ Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 - Low Voltage (LV) Costs are also excluded.

⁽²⁾ Host Distributors - Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.

⁽³⁾ Customer Classes - If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

| Name of Customer Class | Forecast (LF) X ent approved rates | X current oved rates X (1+d) | LF X | Proposed Rates | Miscellaneous Revenues | | | | | |
|------------------------------------|--|------------------------------------|------|----------------|---------------------------|---------|--|--|--|--|
| | (7B) | (7C) | | (7D) | | (7E) | | | | |
| Residential | \$ 899,761 | \$ 912,242 | \$ | 912,242 | \$ | 98,793 | | | | |
| General Servie Less than 50 kW | \$ 276,831 | \$ 280,671 | \$ | 280,671 | \$ | 25,221 | | | | |
| General Service greater than 50 kW | \$ 305,664 | \$ 309,904 | \$ | 310,680 | \$ | 30,327 | | | | |
| Street Lighting | \$ 137,990 | \$ 139,904 | \$ | 139,130 | \$ | 19,955 | | | | |
| Total | \$ 1,620,246 | \$ 1,642,723 | \$ | 1,642,723 | \$ | 174,296 | | | | |

- (4) In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.
- (5) Columns 7C and 7D Column Total should equal the Base Revenue Requirement for each.
 Column 7C The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current
 (6) Rates.
- (7) Column 7E If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19.

C) Rebalancing Revenue-to-Cost Ratios

| Name of Customer Class | Previously Approved Ratios | Status Quo Ratios | Proposed Ratios | Policy Range |
|--|-------------------------------|-------------------|------------------|--------------|
| | Most Recent Year: | (7C + 7E) / (7A) | (7D + 7E) / (7A) | |
| | 2017 | | | |
| | % | % | % | % |
| Residential | 97.95% | 98.92% | 98.92% | 85 - 115 |
| General Servie Less than 50 kW | 120.00% | 116.95% | 116.95% | 80 - 120 |
| General Service greater than 50 kW | 86.19% | 84.88% | 85.07% | 80 - 120 |
| Street Lighting | 120.00% | 120.58% | 120.00% | 80 - 120 |
| 6 7 8 9 0 1 1 2 3 4 5 6 7 8 | | | | |

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2020 with further adjustments to move within the range over two years, the Most Recent Year would be 2023. However, the ratios in 2023 would be equal to those after the adjustment in 2022.

⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

⁽¹⁰⁾ Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios (11)

| Name of Customer Class | Propose | d Revenue-to-Cost Ratio | | Policy Range |
|------------------------------------|-----------|-------------------------|---------|--------------|
| | Test Year | Price Cap IR F | | , - |
| | 2025 | 2026 | 2027 | |
| Residential | 98.92% | 98.92% | 98.92% | 85 - 115 |
| General Servie Less than 50 kW | 116.95% | 116.95% | 116.95% | 80 - 120 |
| General Service greater than 50 kW | 85.07% | 85.07% | 85.07% | 80 - 120 |
| Street Lighting | 120.00% | 120.00% | 120.00% | 80 - 120 |
| | | | | |
| | | | | |
| | | | | |

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2025 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2026 and 2027 Price Cap IR models, as necessary. For 2026 and 2027, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2026 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

New Rate Design Policy For Residential Customers

Please complete the following tables.

A Data Inputs (from Sheet 10. Load Forecast)

| Test Year Billing Determinants for R | esidentia | al Class |
|---|------------|------------|

| Change in Fixed Rate | |
| Difference Between Revenues @ Proposed Rates | |
| and Class Specific Revenue Requirement | |

TOTAL

- 1 The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. The change in residential rate design is almost complete and distributors should have either 0 or 1 year remaining. If the distributor has fully transitioned to fixed rates put "0" in cell D40. If the distributor has proposed an additional transition year because the change in the residential rate design will result in the fixed charge increasing by
- Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluemtric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PlLs,

² The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

The Volumetric rate is calculated as [(allocated volumetric revenue requirement for the class + transformer allowance credit for the class)(annual estimate of the charge determinant for the test year (either kW or kVA for demand-billed customer classes, or kWh for non-demand-billed classes)]

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

(2) Short description of change, issue, etc.

Appendix E – Proposed May 1 2025 Tariff Sheets

Effective and Implementation Date May 1, 2025

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2024-0008

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2024-0008

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non-residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2024-0008

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50kW but less than 5,000kW. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.
