Submissions of

ERTH Power Corporation

April 15, 2025

On April 11, 2025, OEB Staff provided its submission on the above-reference proceeding.

OEB Staff took no issue with ERTH Power's proposed Price Cap Adjustment, Shared Tax Adjustment Treatment, adjustments to its Retail Transmission Service Rates, The disposition of its Group 1 Deferral and Variance Accounts, nor the adjustments to its Low Voltage Service rates.

OEB Staff made submissions on ERTH Power's IRM Rate Generator Models. OEB Staff updated the IRM Rate Generator Models for Both the Main Rate Zone and the Goderich Rate Zone to remove the adders for the ICM Amount. OEB Staff provided revised models, exclusive of the ICM request. With the updates, a typical residential customer with a monthly consumption of 750 kWh will see a total bill decrease of \$2.37 (1.71%) per month in the Goderich Rate Zone, and an increase of \$0.63 (0.46%) in the Main Rate Zone, before taxes and the Ontario Electricity Rebate. ERTH Power agrees with the updates made by OEB Staff.

All of which is respectfully submitted.
