Dear Ontario Energy Board,

I am a Toronto resident and electricity customer. I would like to share my comments regarding Toronto Hydro's application for the Non-Wires Solutions Incentive Mechanism (EB-2026-0129).

I understand the goal of reducing electricity demand during peak hours and avoiding expensive infrastructure upgrades. However, I am concerned that the proposed 25% Margin-on-Payments incentive may eventually increase electricity costs for customers.

Many residents are already struggling with the high cost of living, including housing, food, and utilities. I respectfully ask the OEB to carefully review whether this incentive is fair and provides clear long-term benefits to the public before approving additional costs that may affect customer bills.

I also encourage transparency regarding:

how much this program may cost ratepayers, how savings will be measured, and how customers will benefit over time.

Thank you for considering public input on this matter.

Sincerely,
