Dear Board,

Re: EB-2026-0129 - Toronto Hydro Non-Wires Solutions Incentive

I object to Toronto Hydro's proposed 25% Margin-on-Payments incentive rate because a 25% markup on demand-response costs is excessive and places an unfair burden on ratepayers already facing high electricity costs. The OEB should reject or reduce the proposed MoP rate and require Toronto Hydro to demonstrate that any incentive directly benefits customers before approval.
Thank you
